

Share of each model's variance explained, by model term

organoid_norm: each box summarises all fitted models
(patient x treatment x feature); 'residual' is the unexplained share

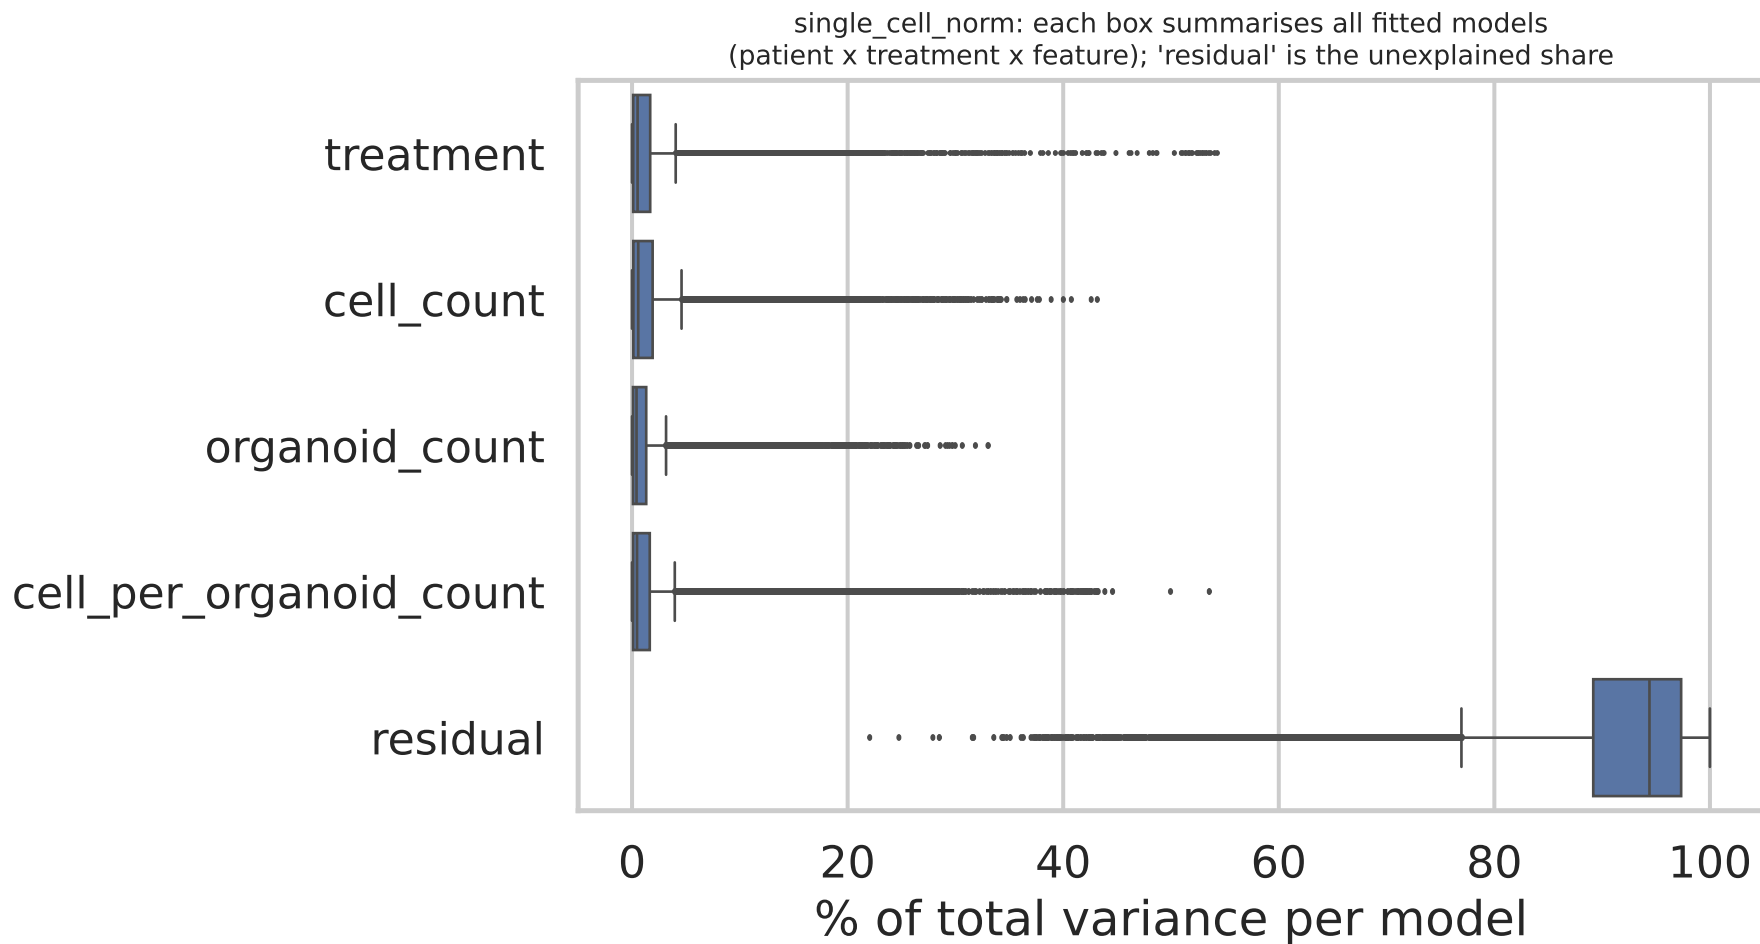

Share of each model's variance explained, by model term

Model term

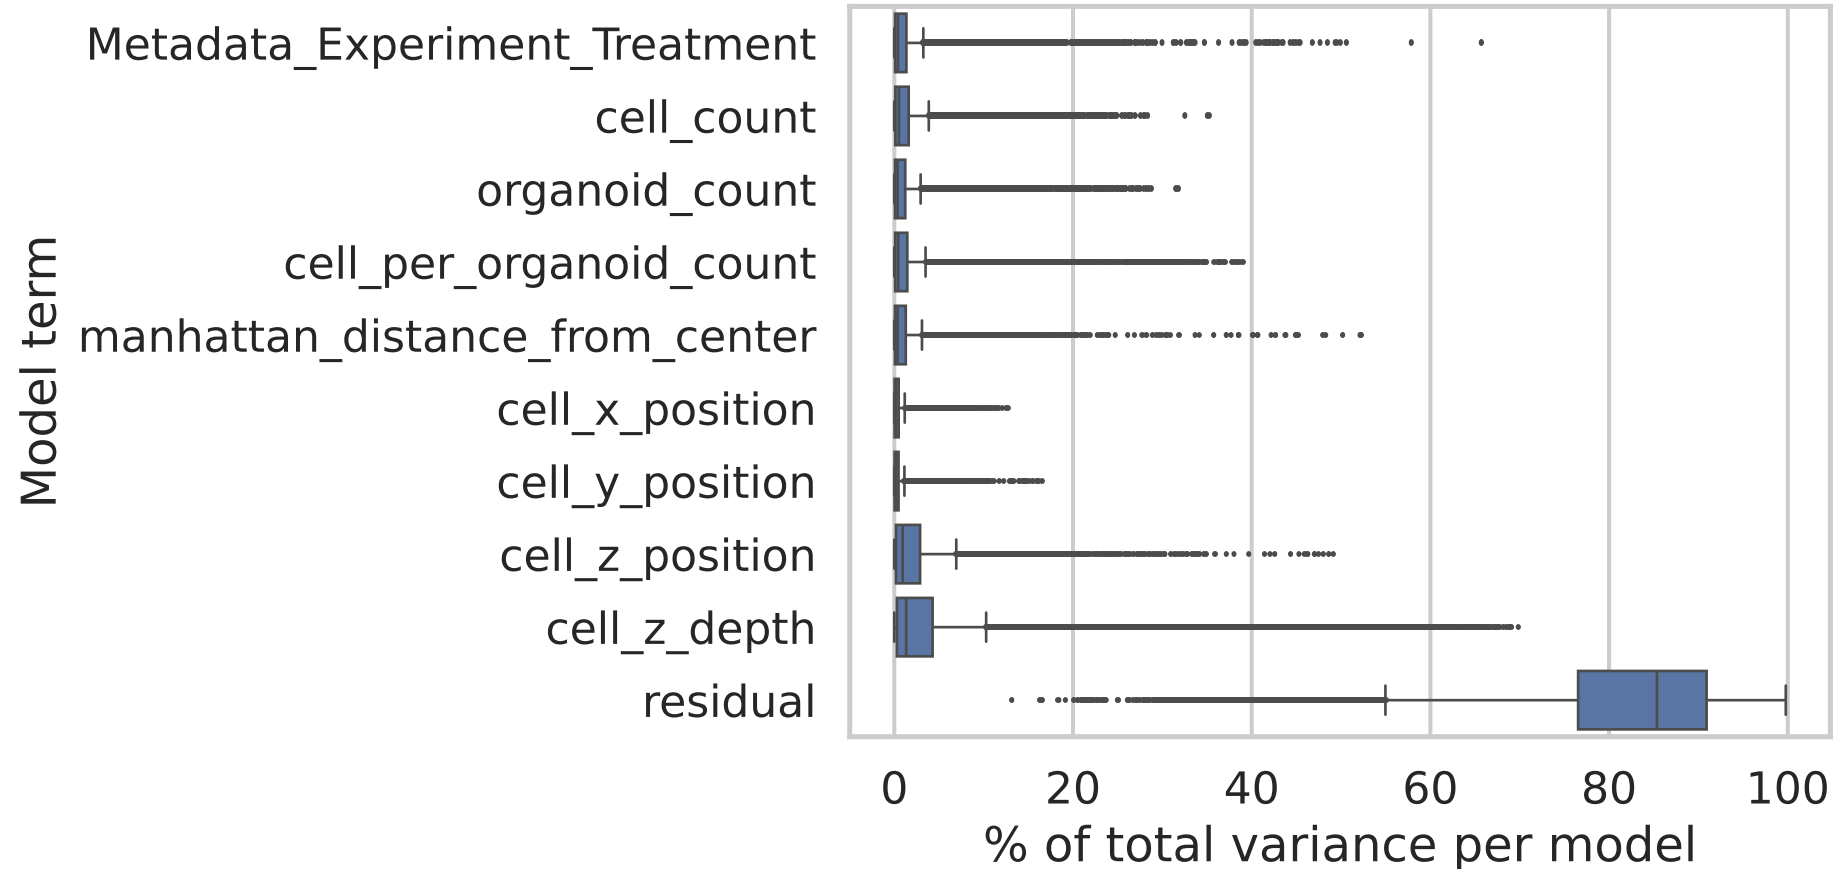

Share of each model's variance explained, by model term

Model term

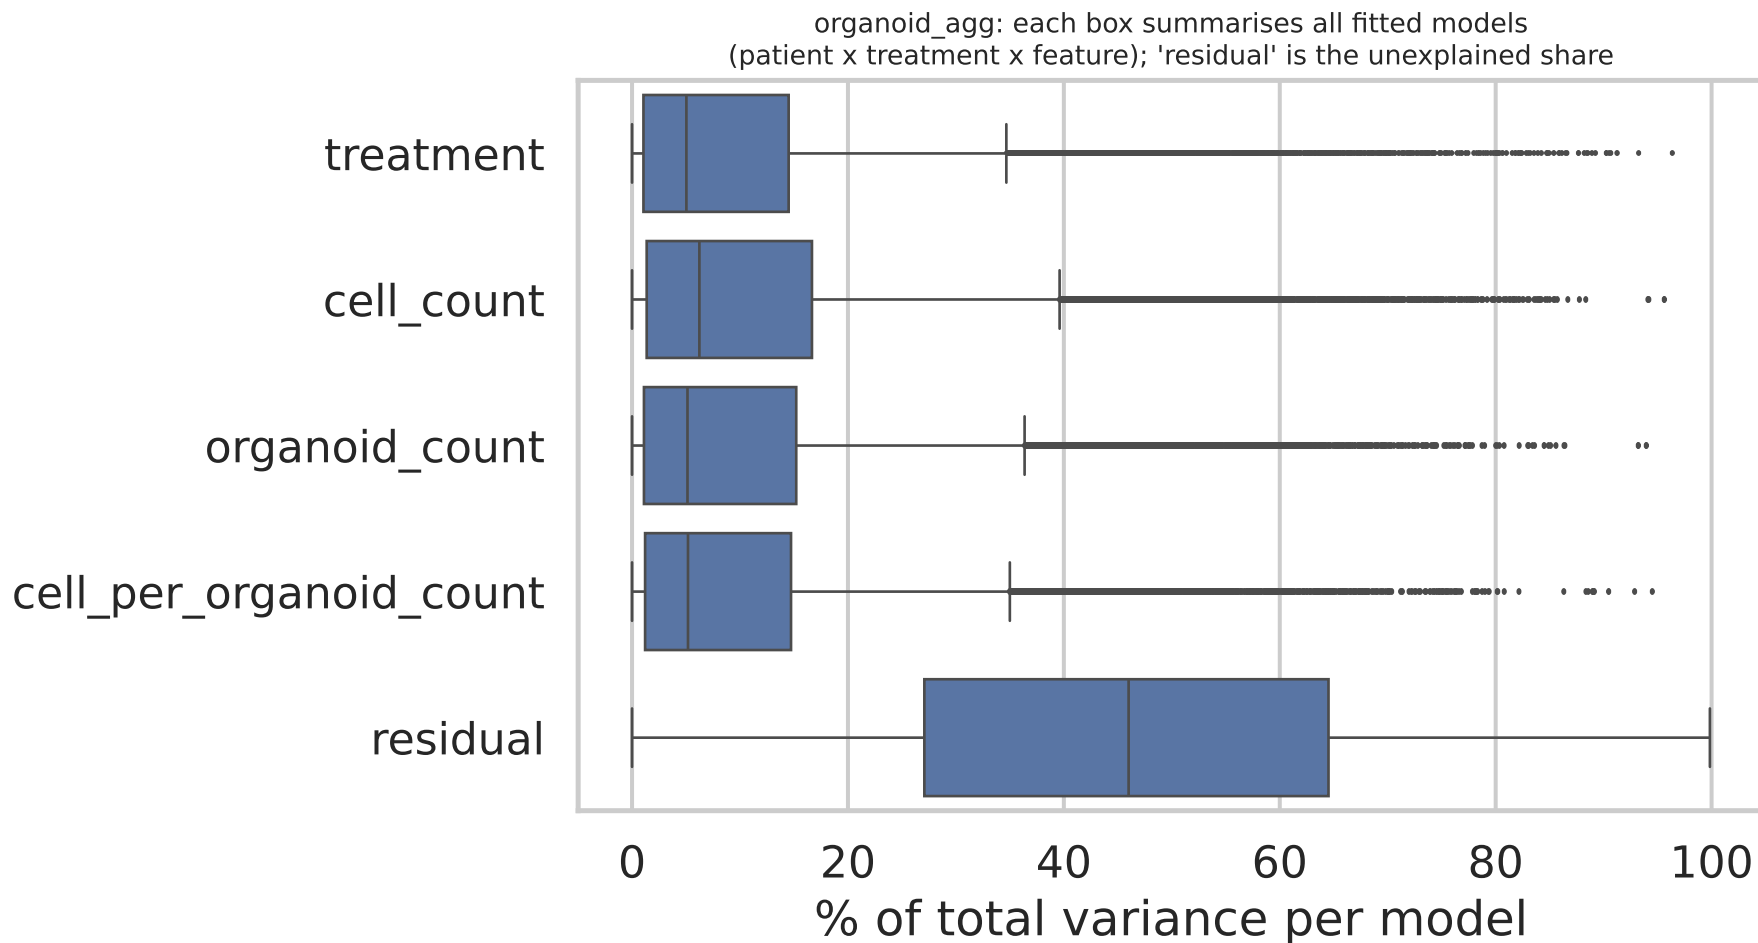

Share of each model's variance explained, by model term

single_cell_norm_technical_model: each box summarises all fitted models (patient x treatment x feature); 'residual' is the unexplained share

Share of each model's variance explained, by model term

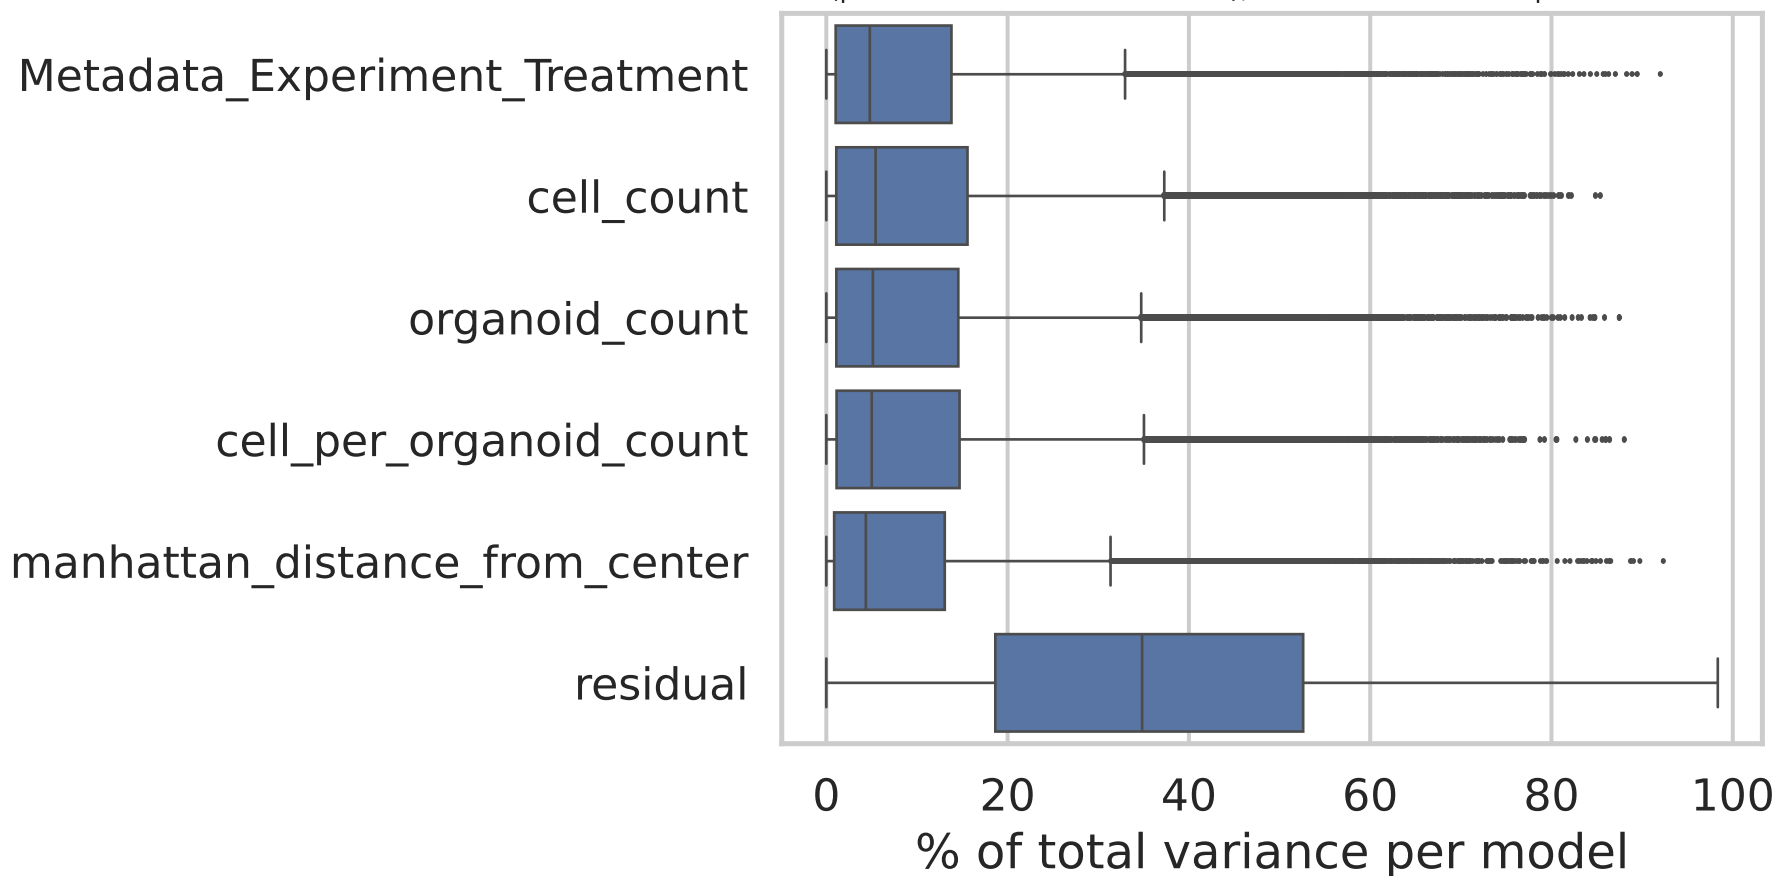

Model term

Share of each model's variance explained, by model term

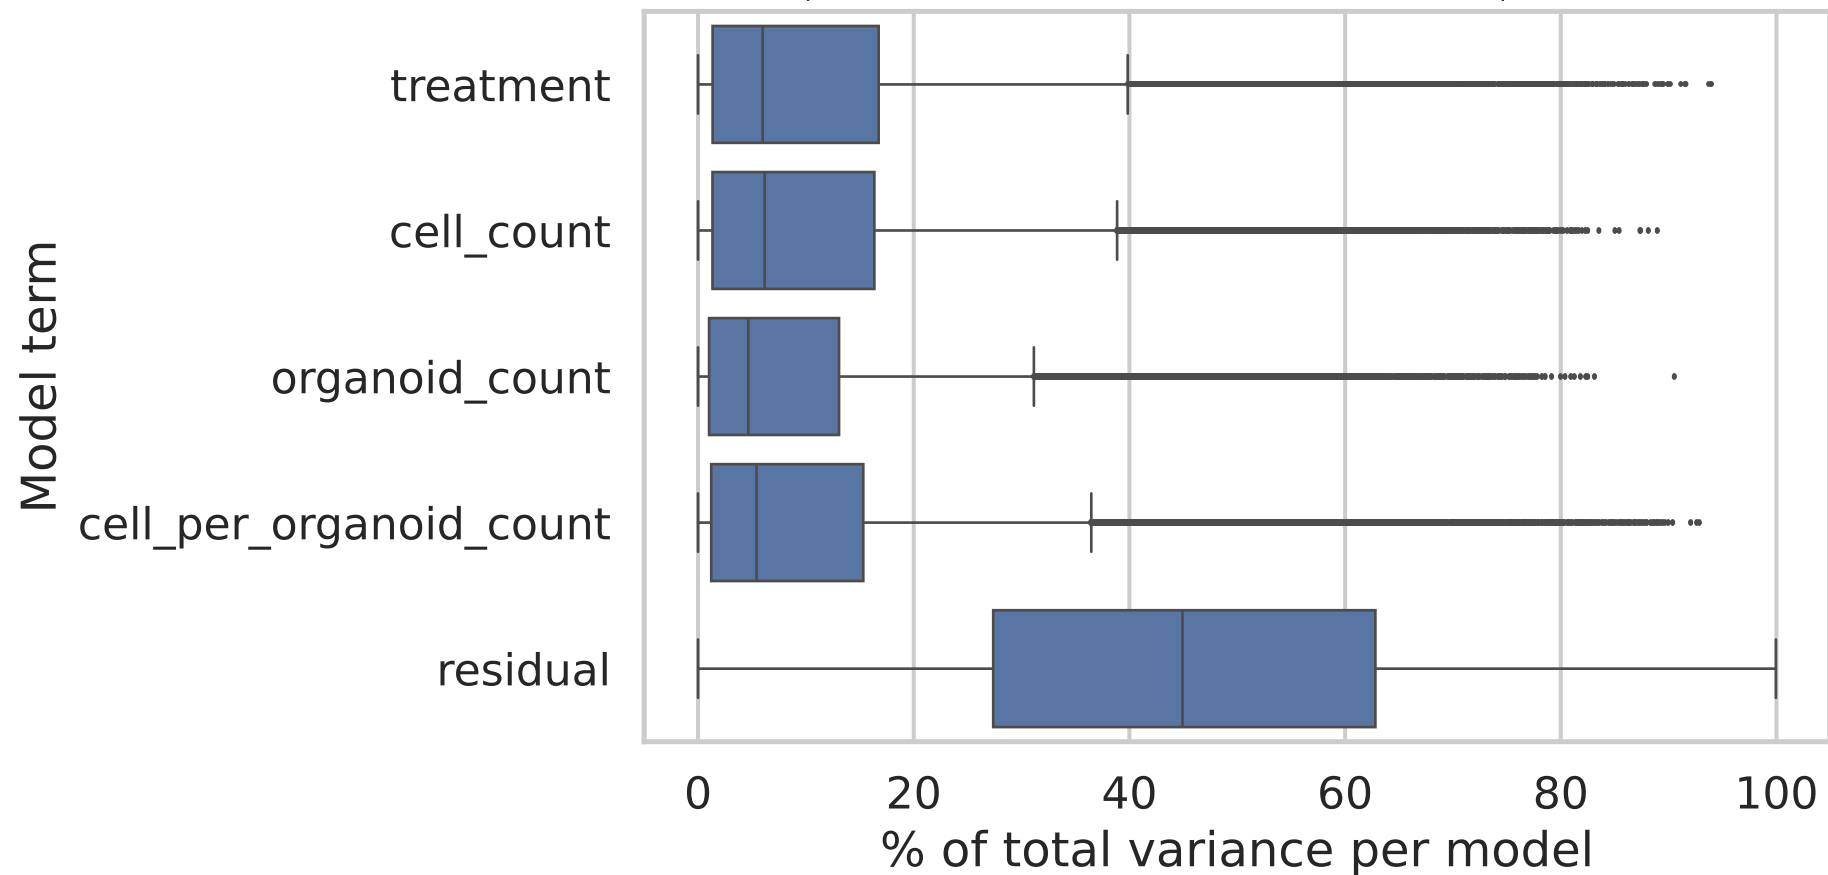

organoid_agg_technical_model: each box summarises all fitted models (patient x treatment x feature); 'residual' is the unexplained share

Model term

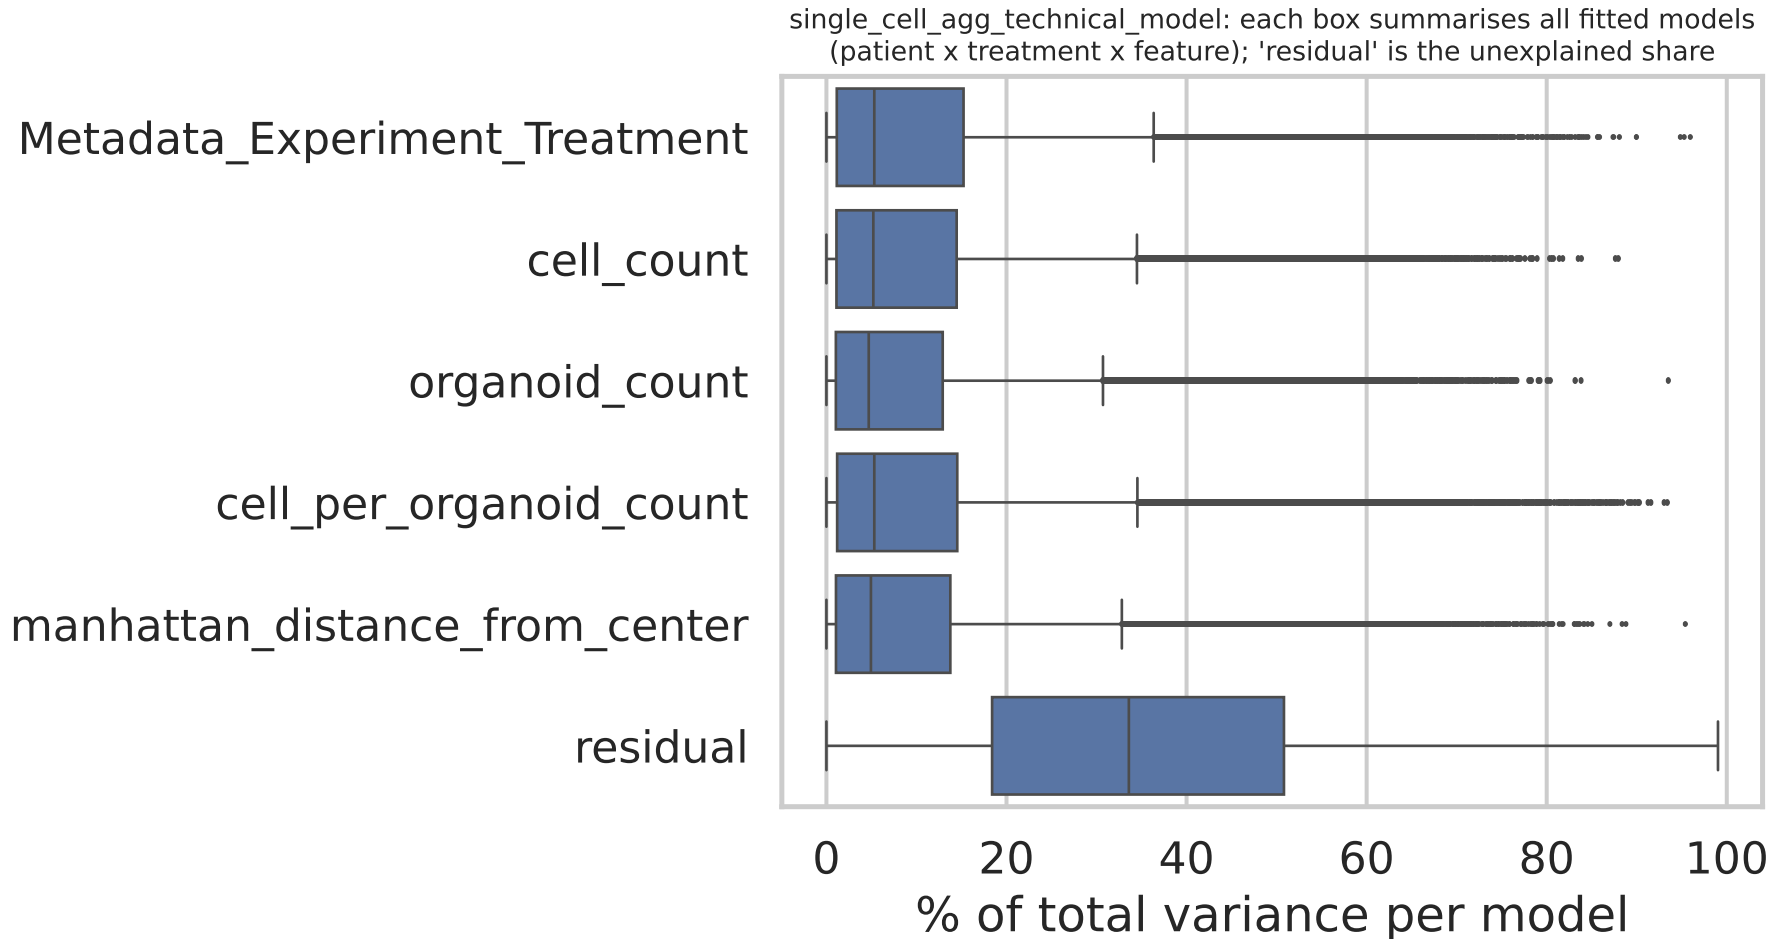

Share of each model's variance explained, by model term

single_cell_agg: each box summarises all fitted models
(patient x treatment x feature); 'residual' is the unexplained share

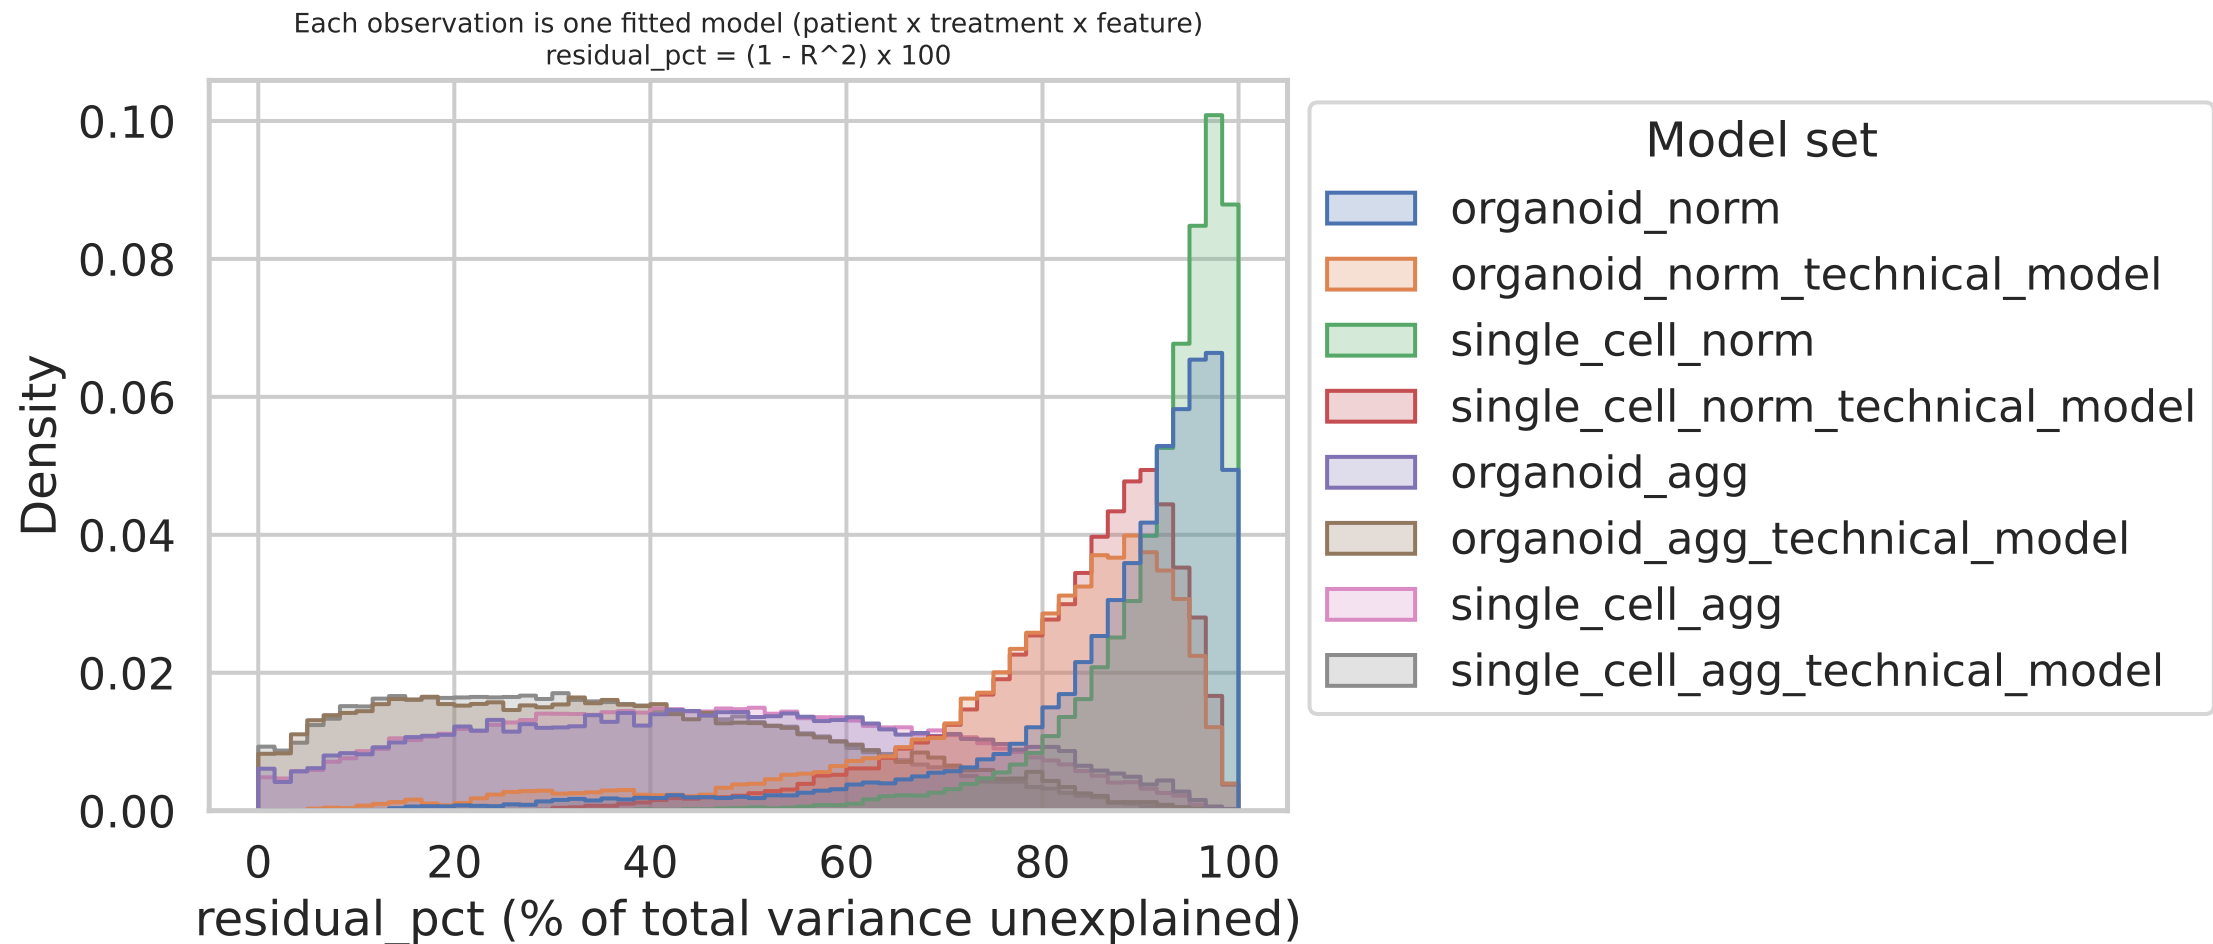

Share of each model's variance explained, by model term

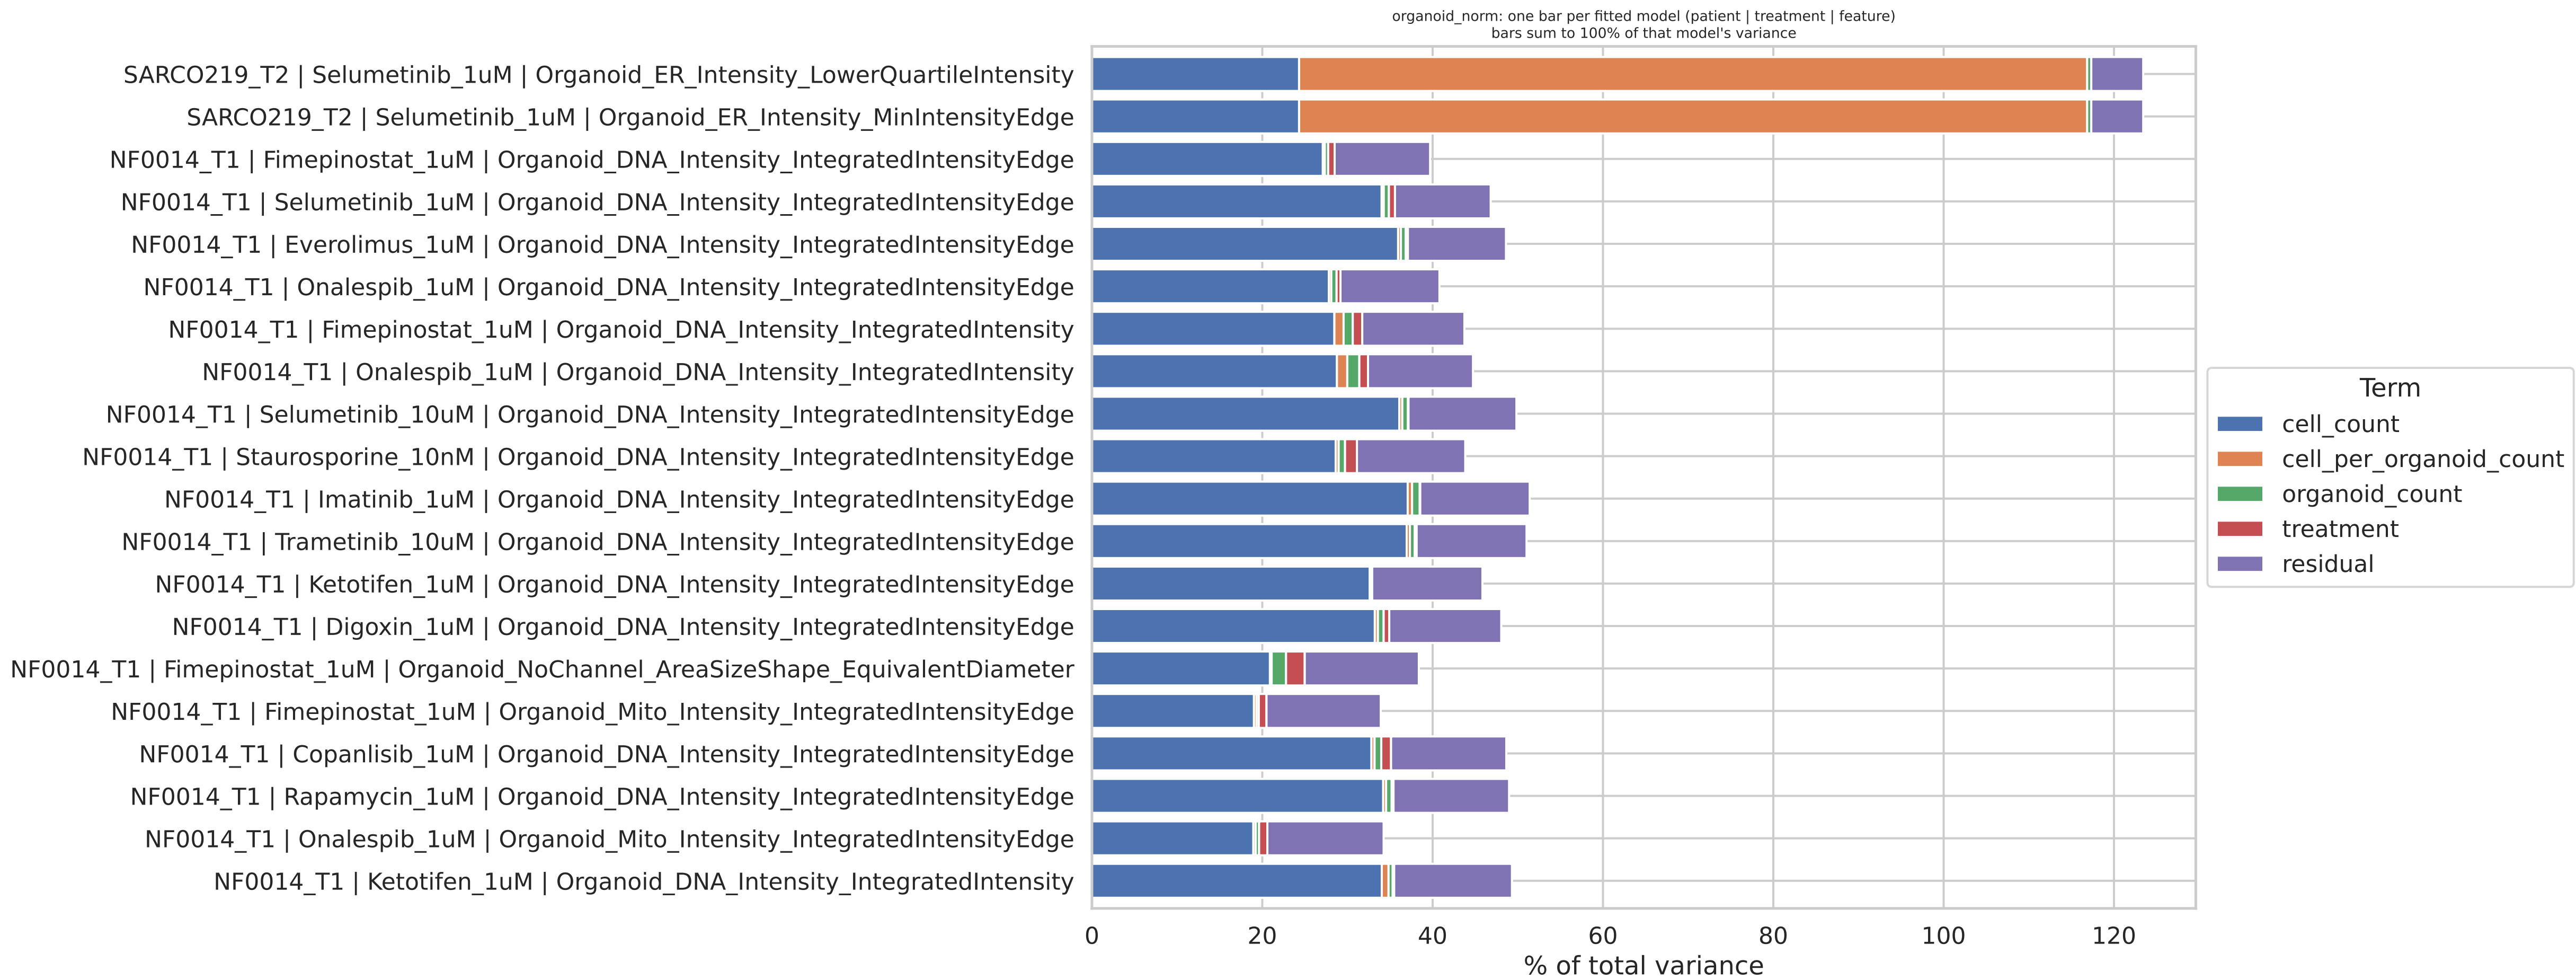

Model term

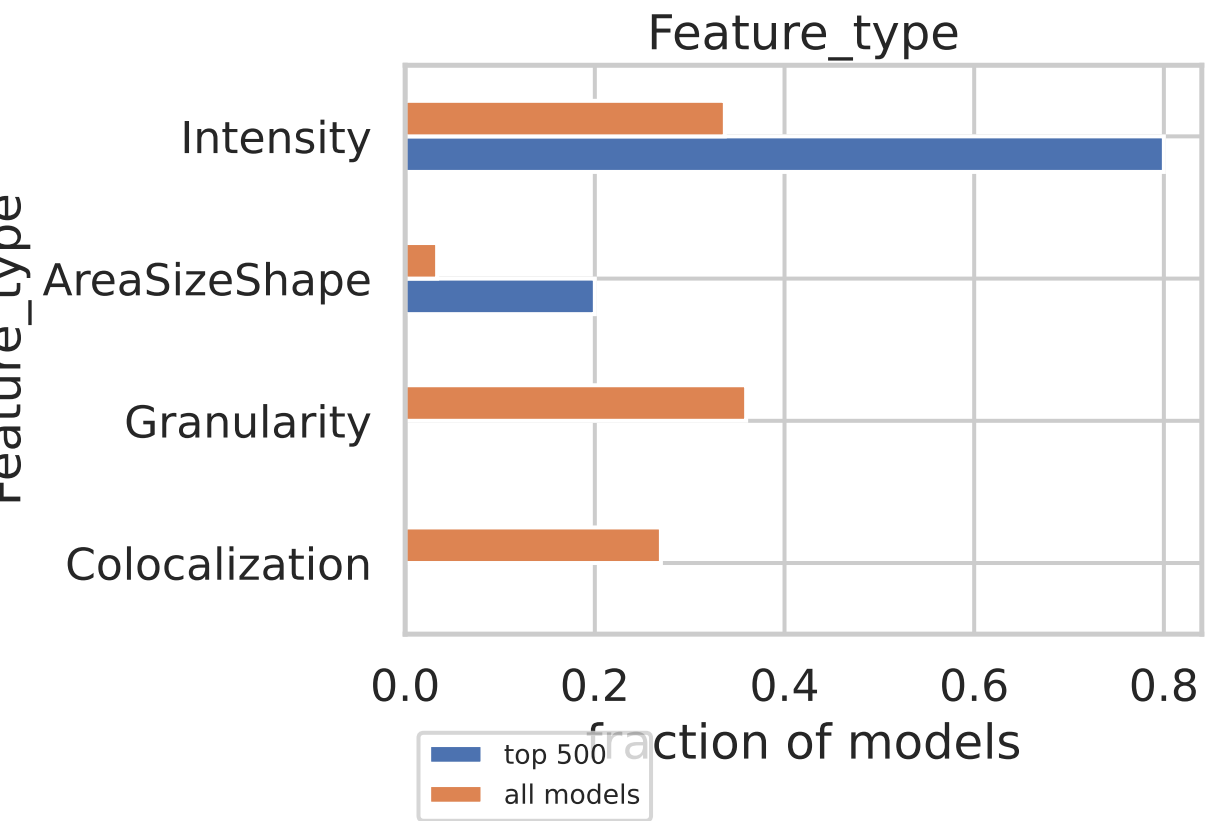

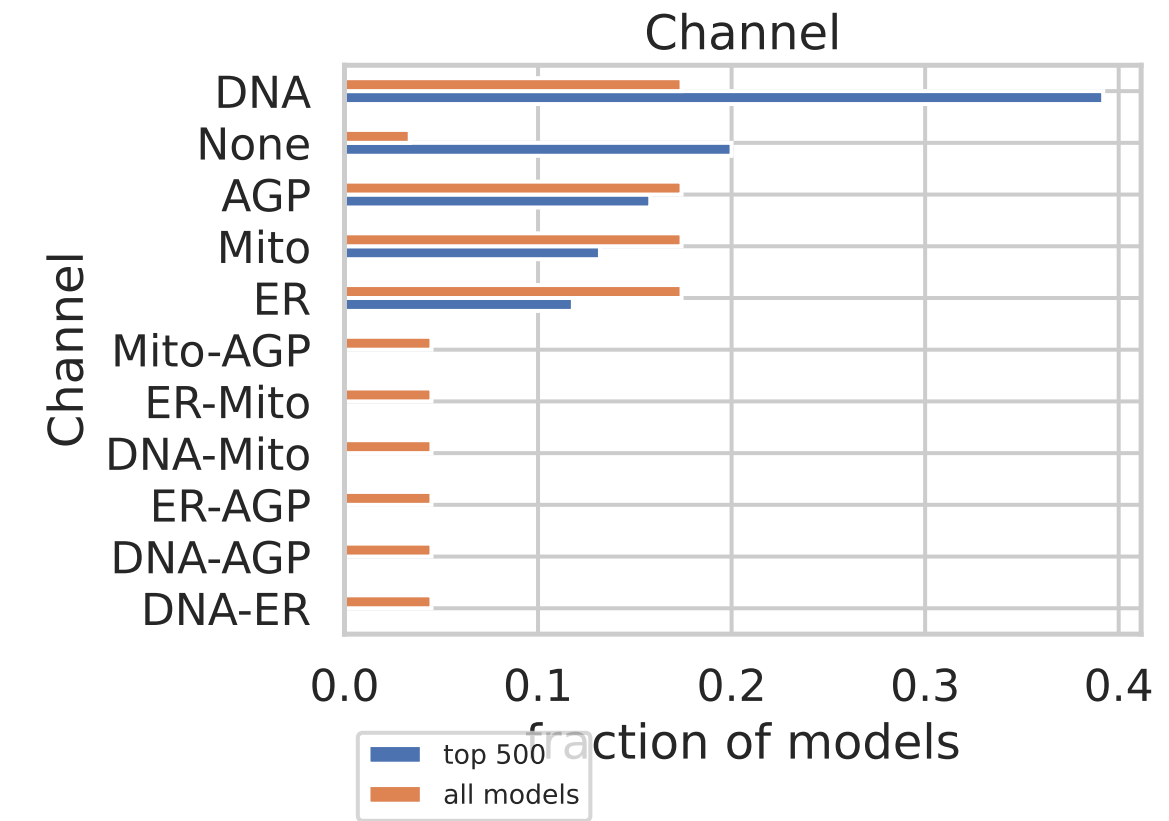

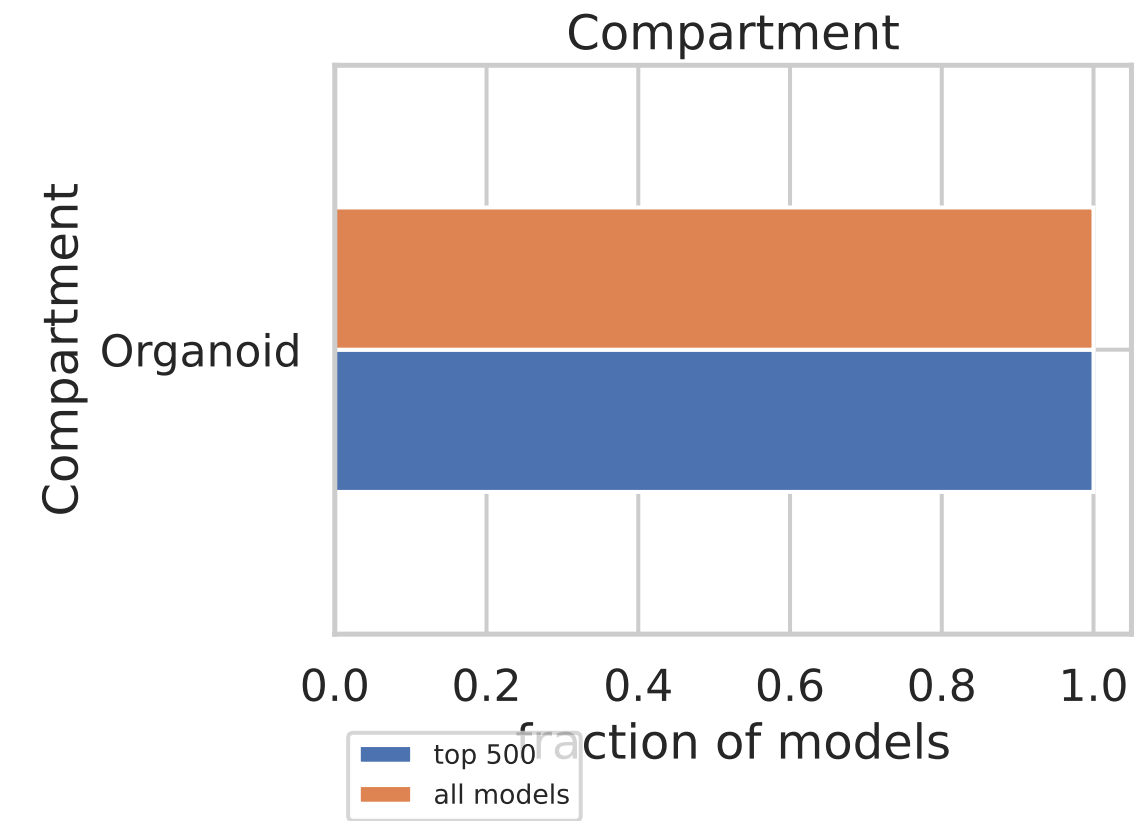

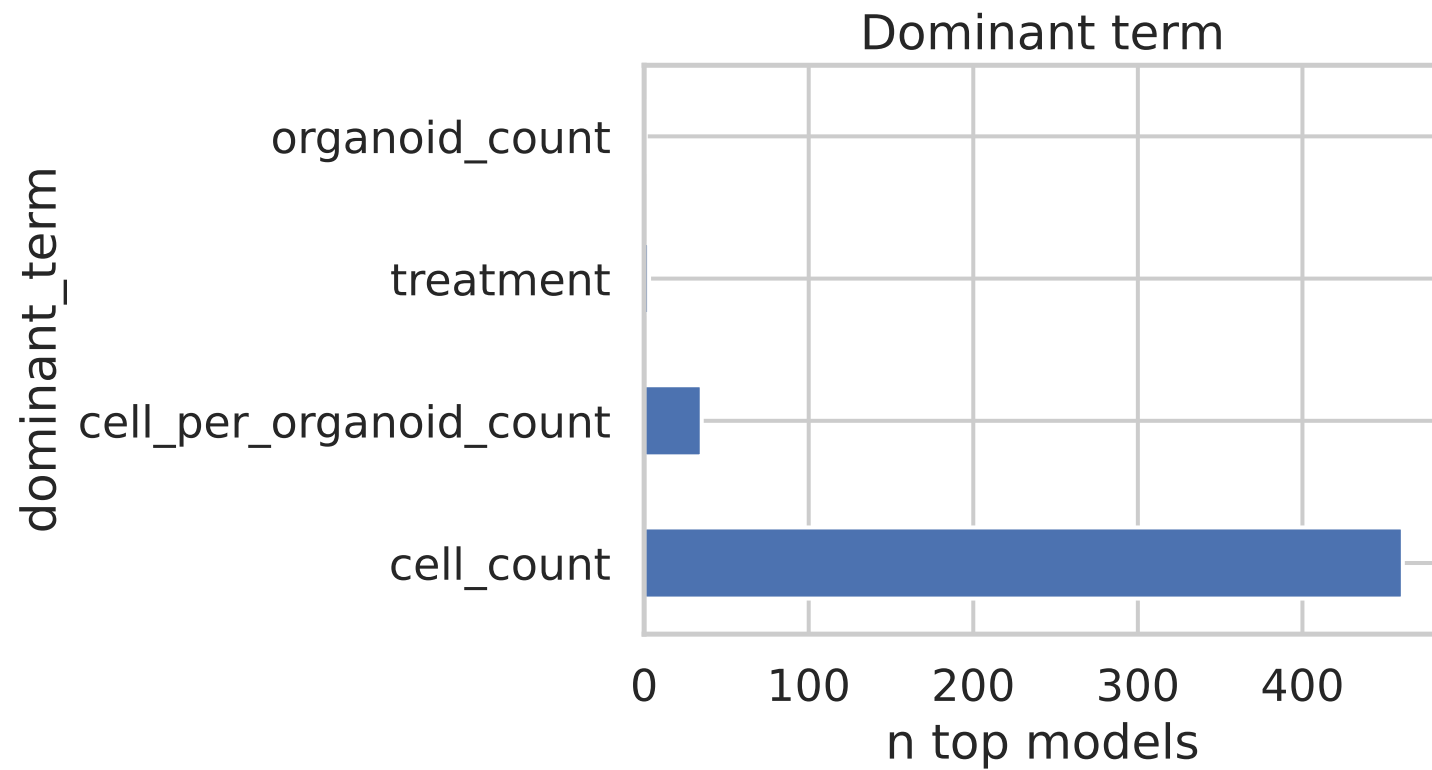

Unexplained (residual) variance across fitted models

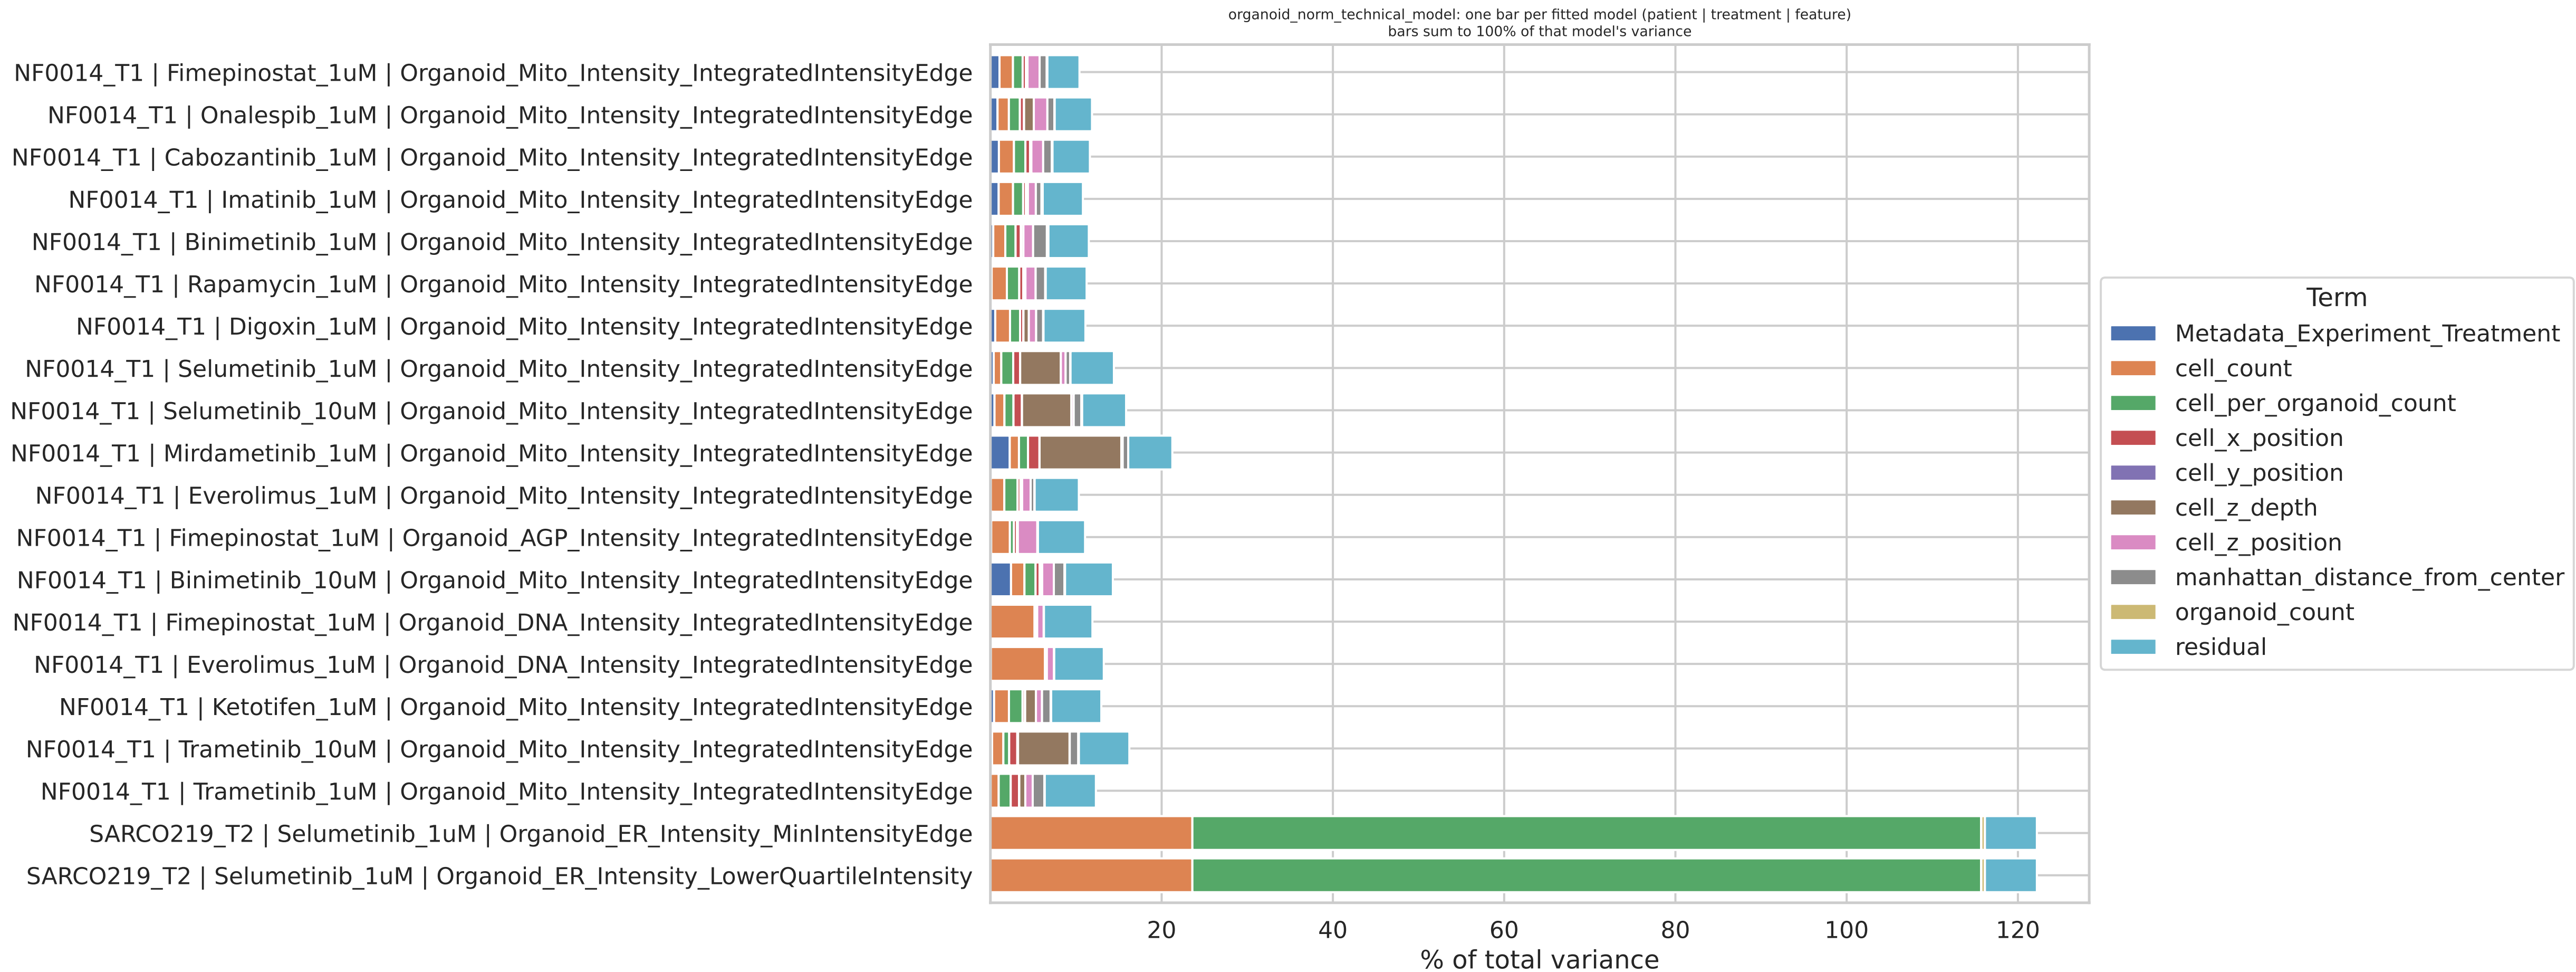

Variance explained by each term in the 20 best-explained models

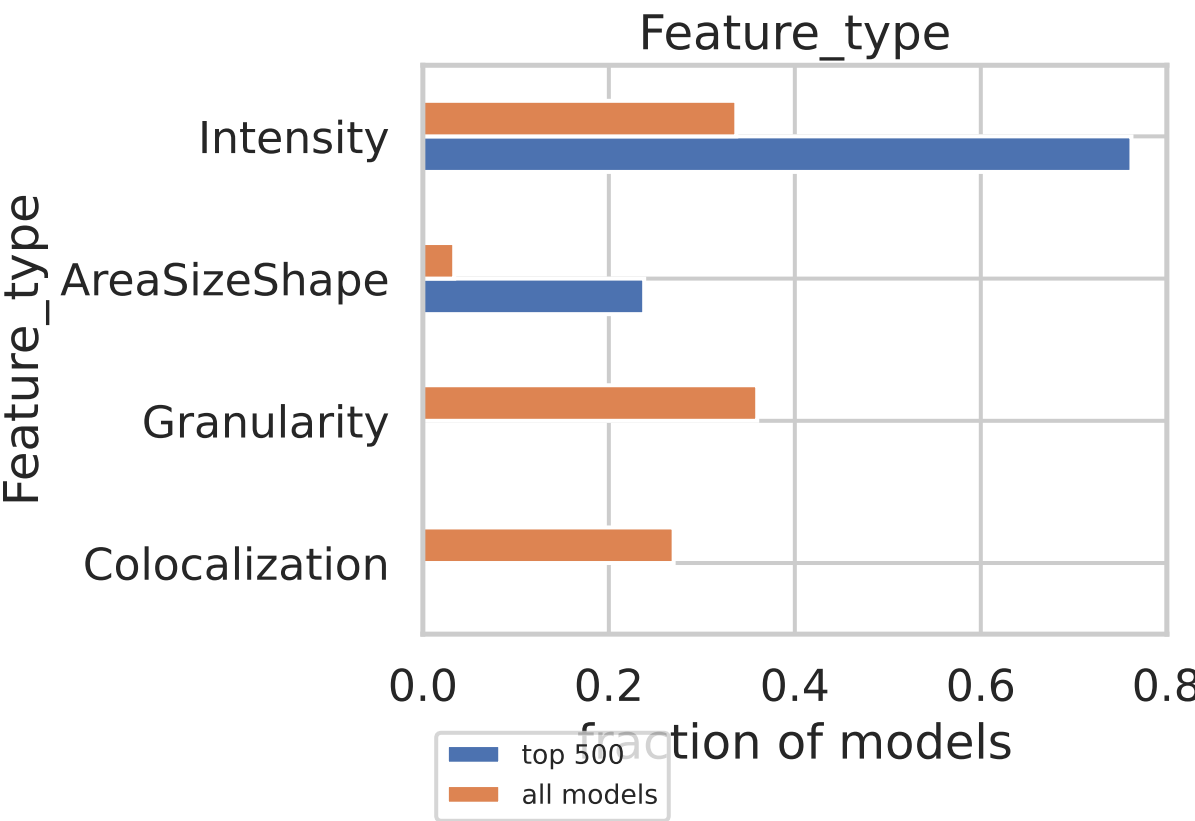

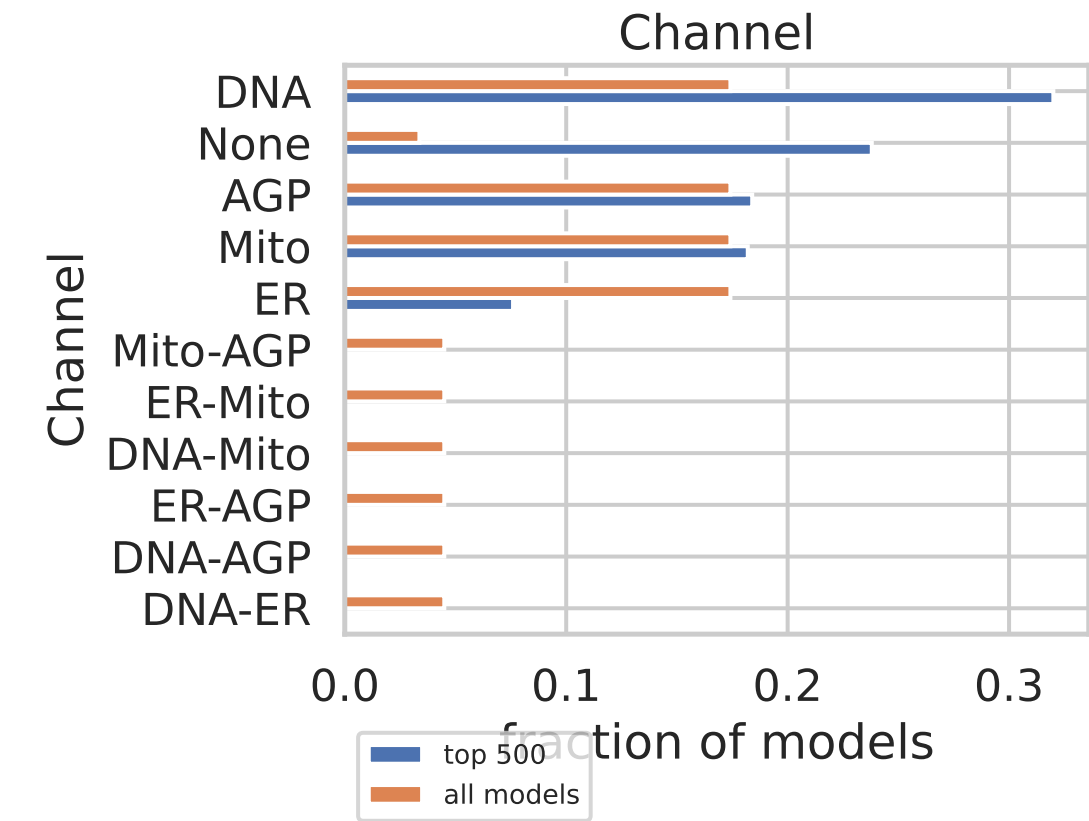

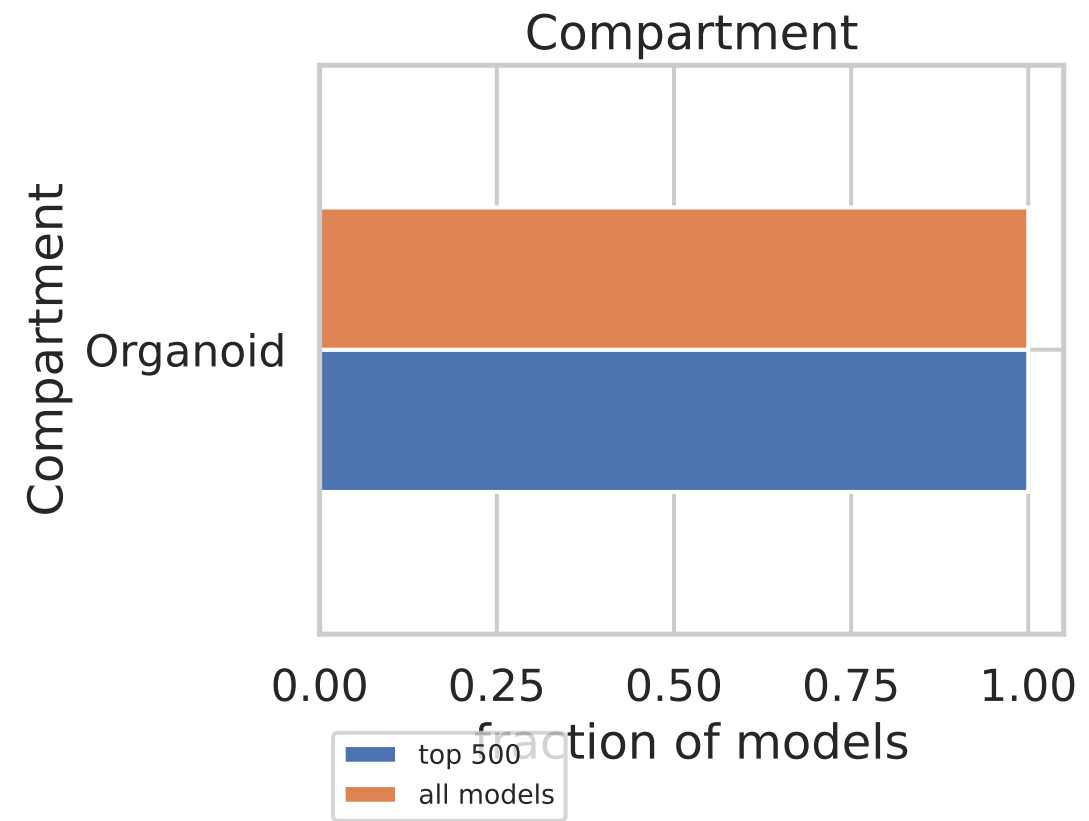

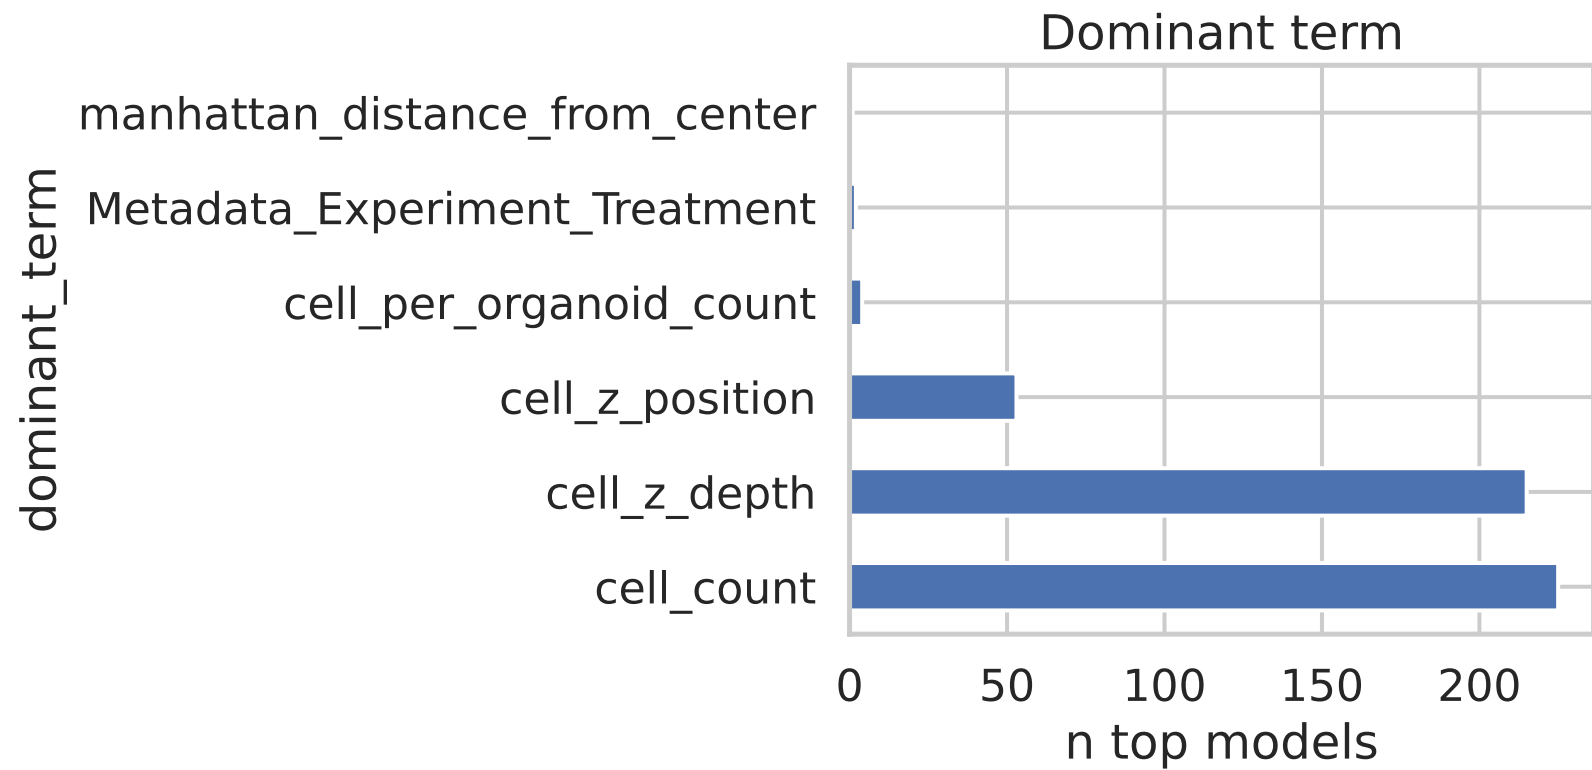

What drives the 500 best-explained models? (organoid_norm)

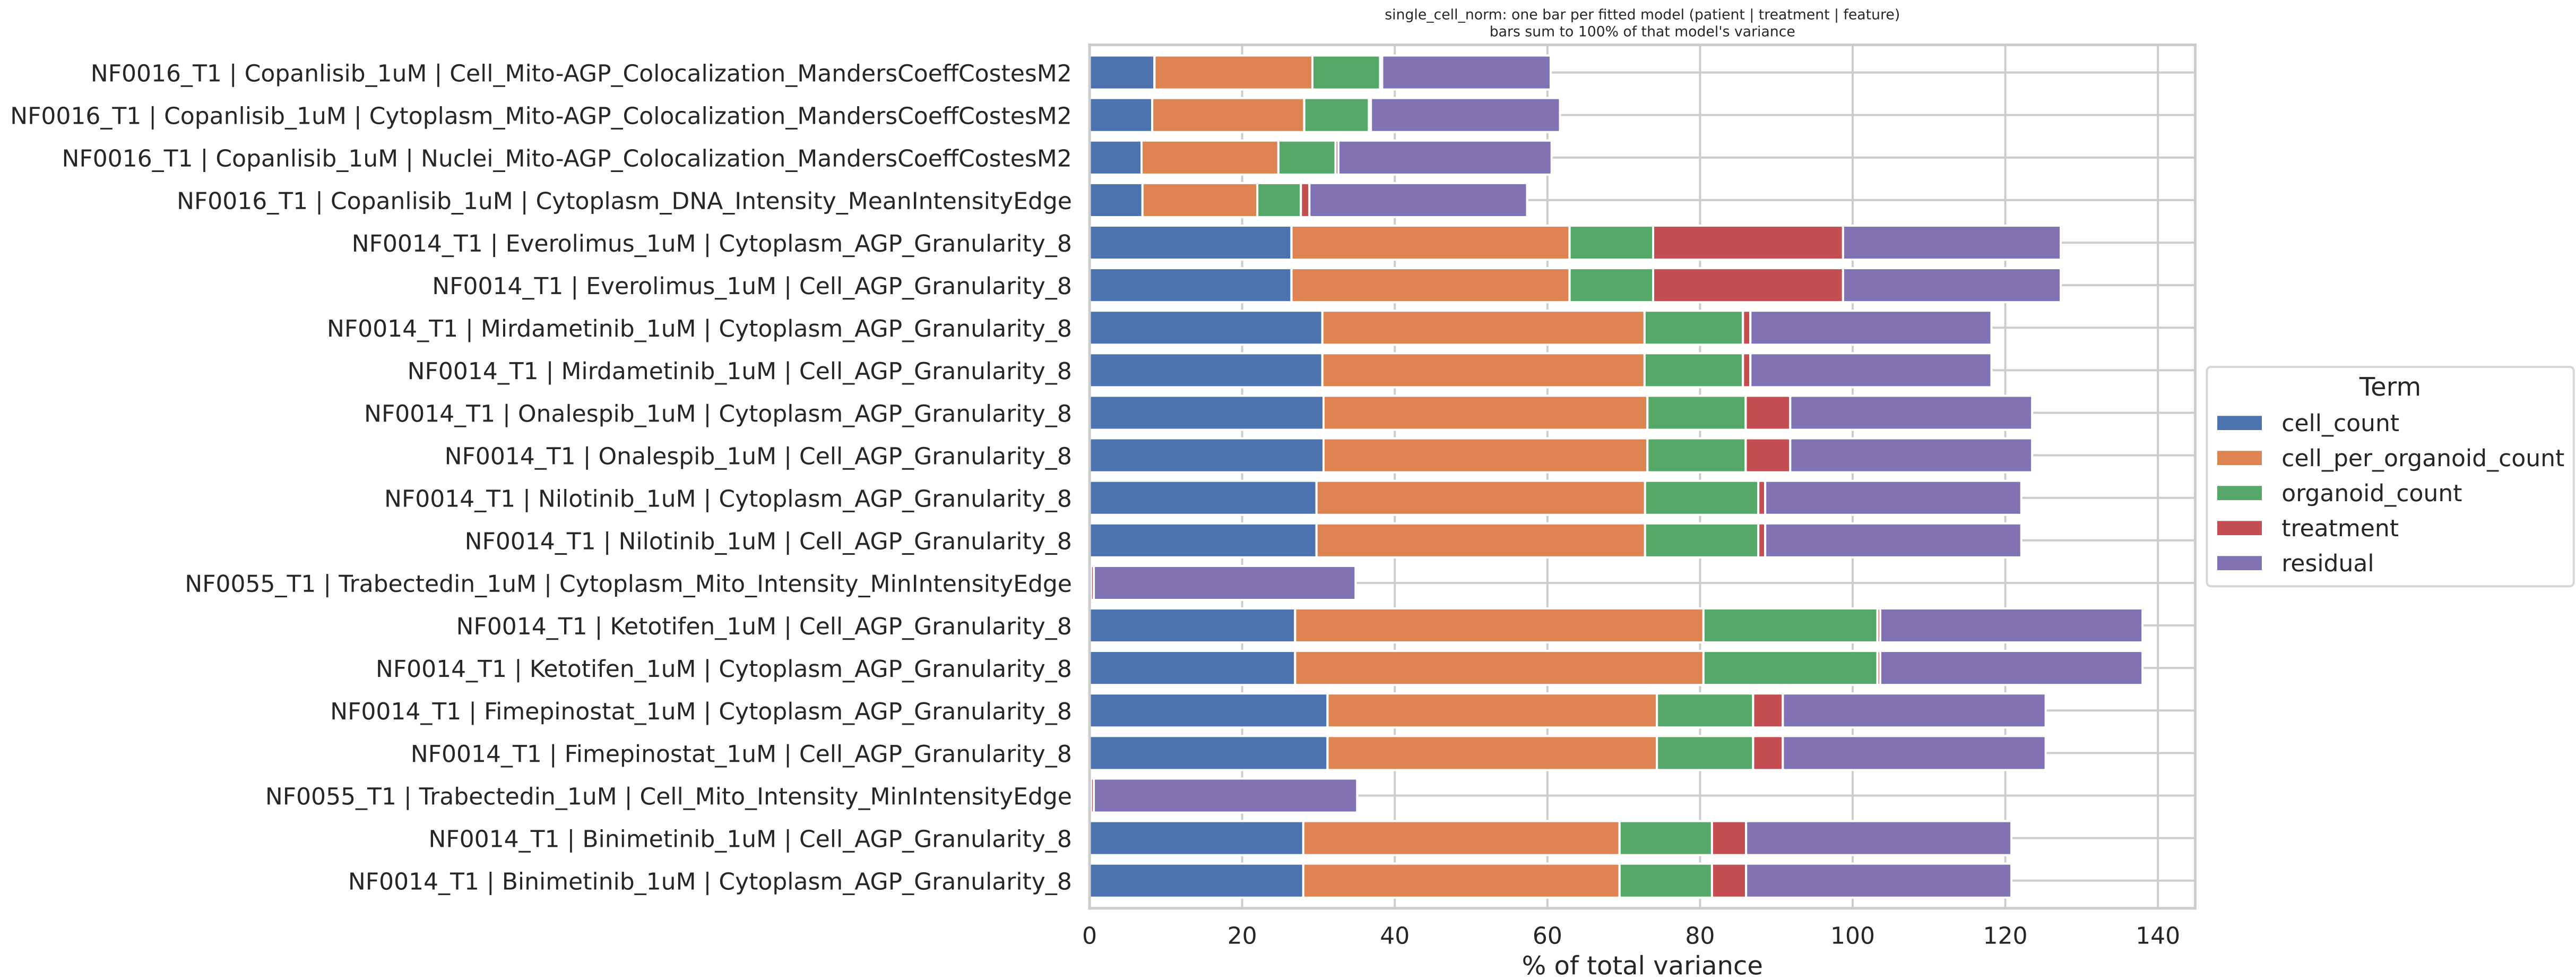

Variance explained by each term in the 20 best-explained models

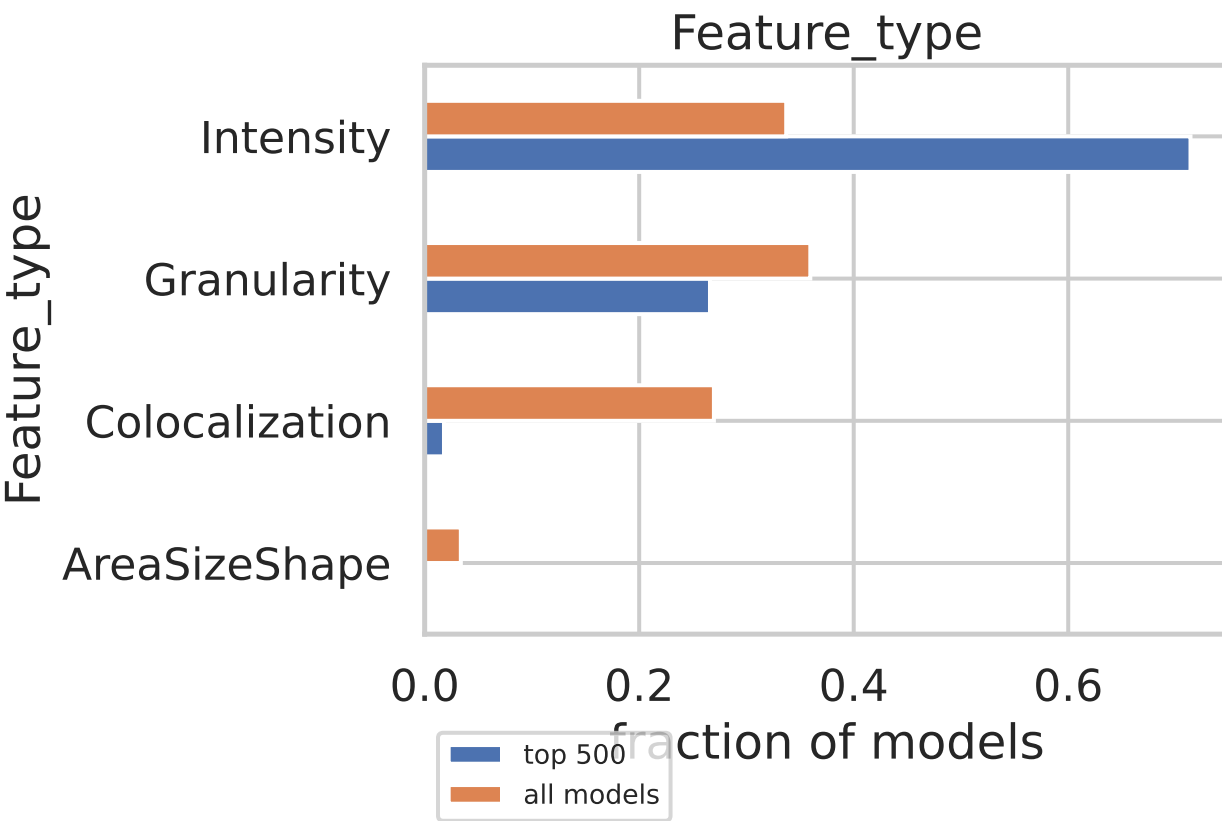

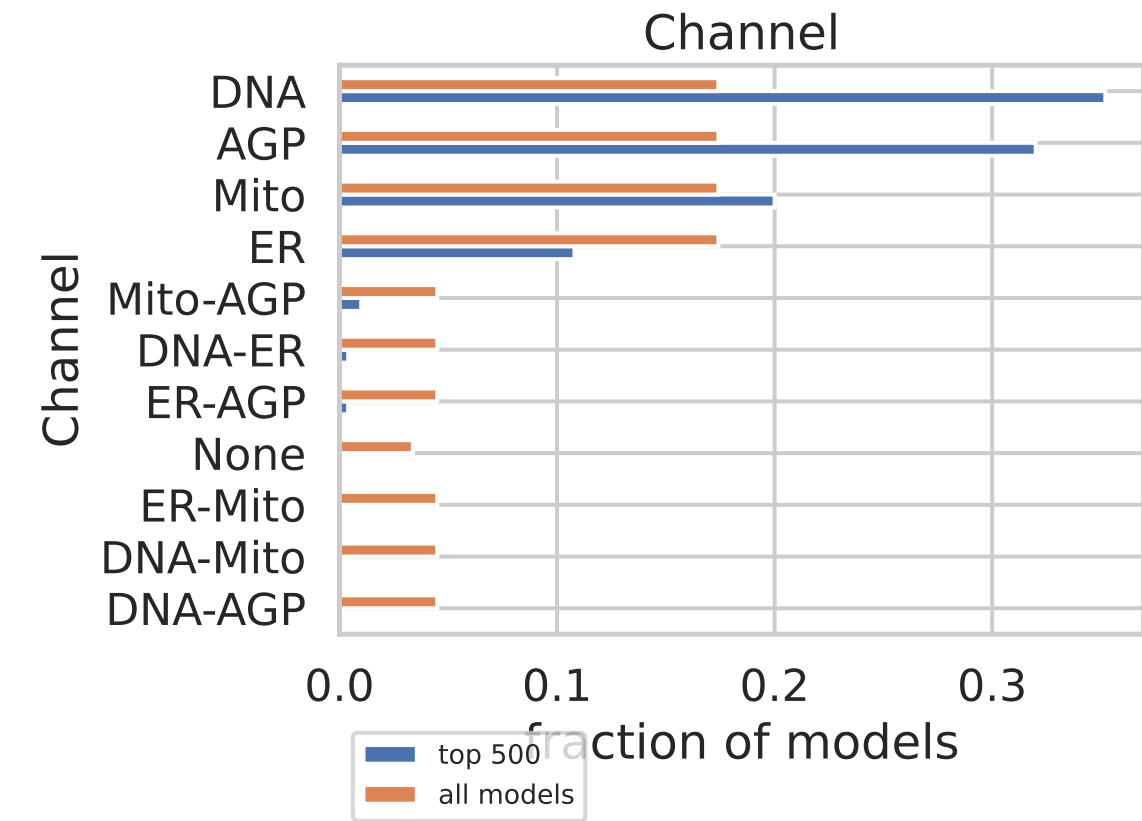

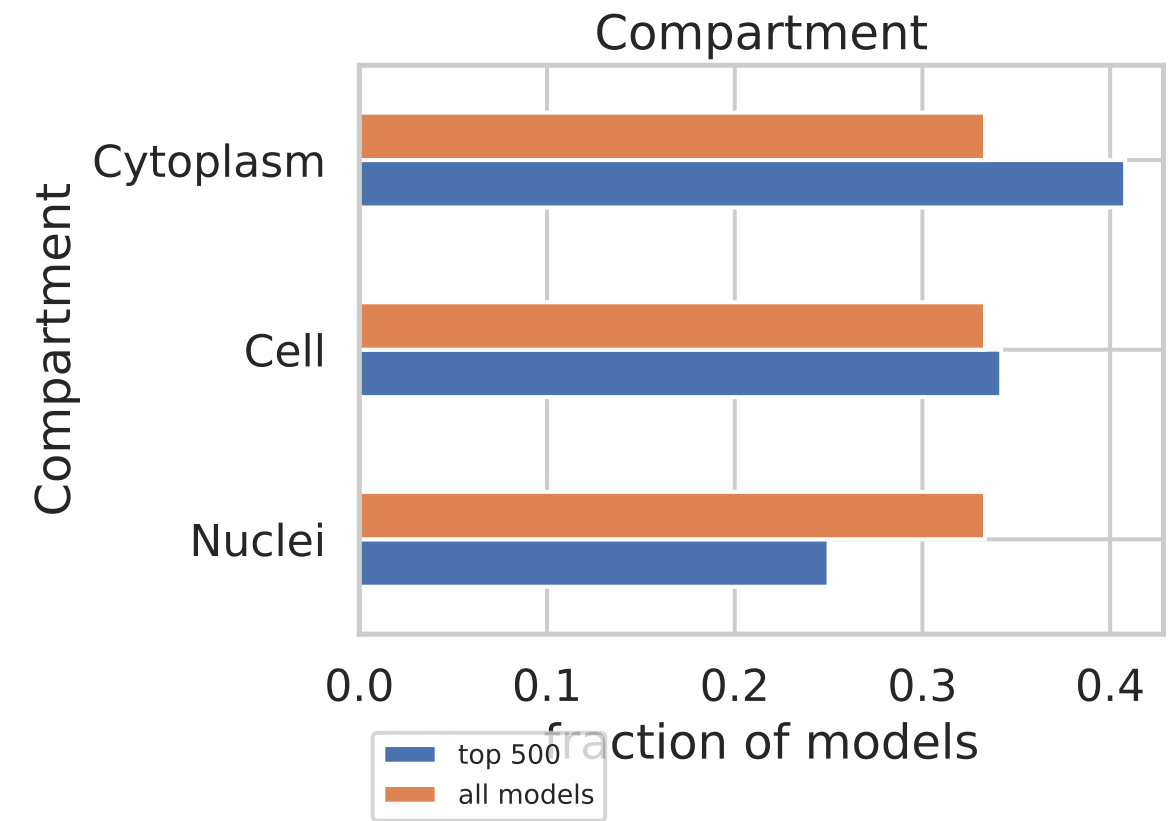

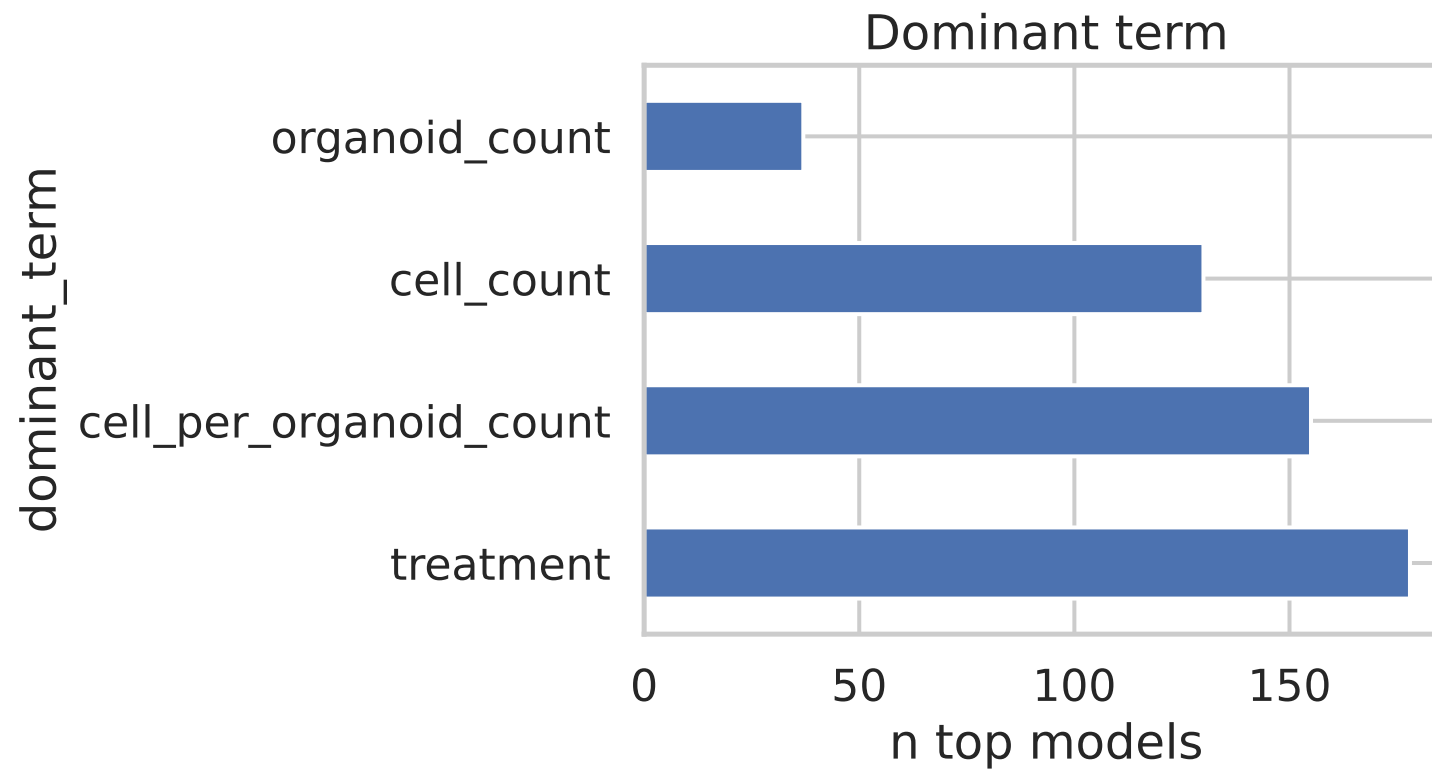

What drives the 500 best-explained models? (organoid_norm_technical_model)

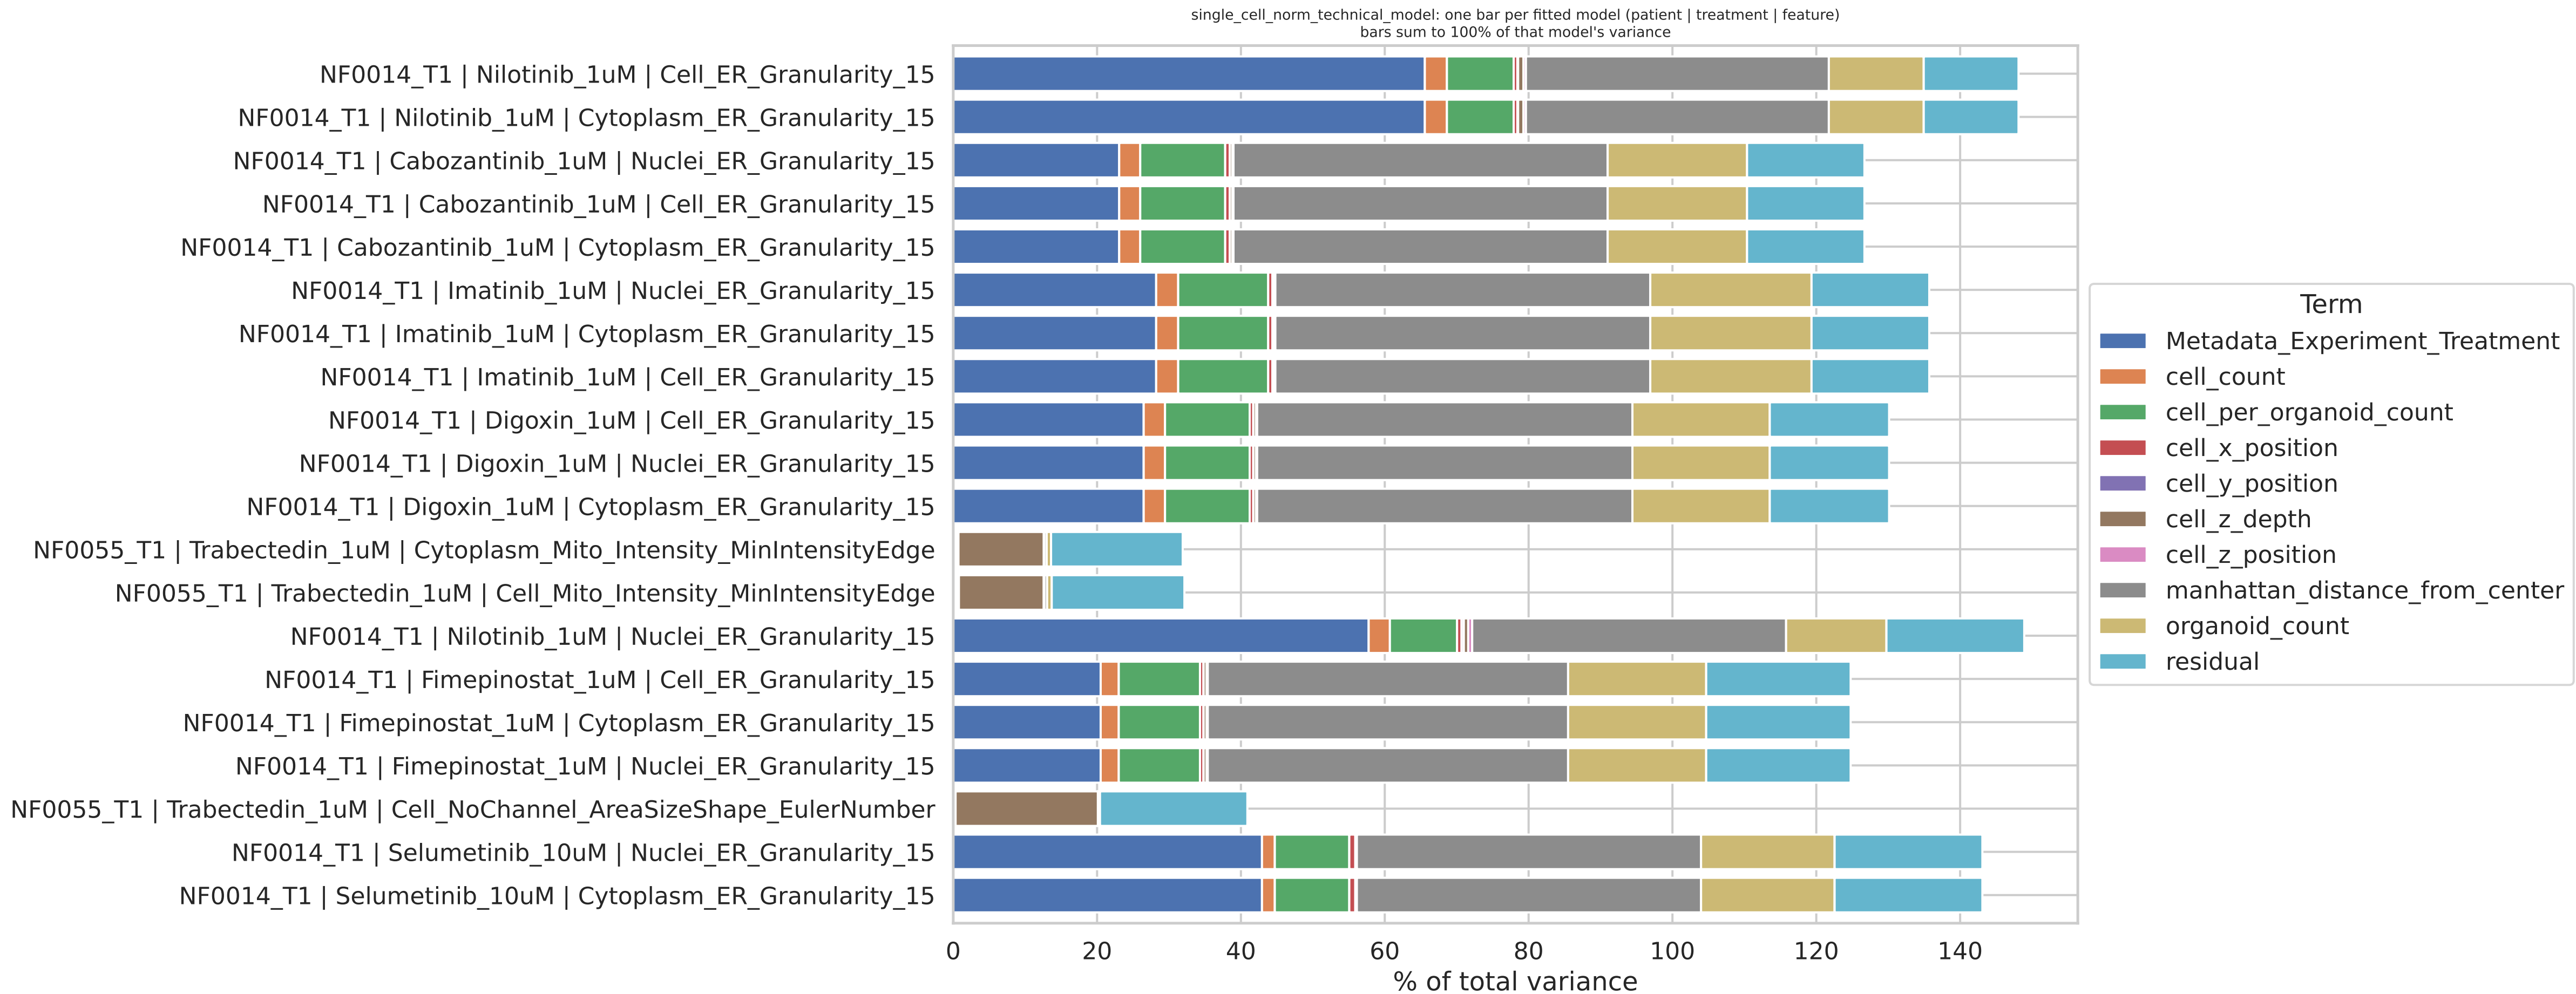

Variance explained by each term in the 20 best-explained models

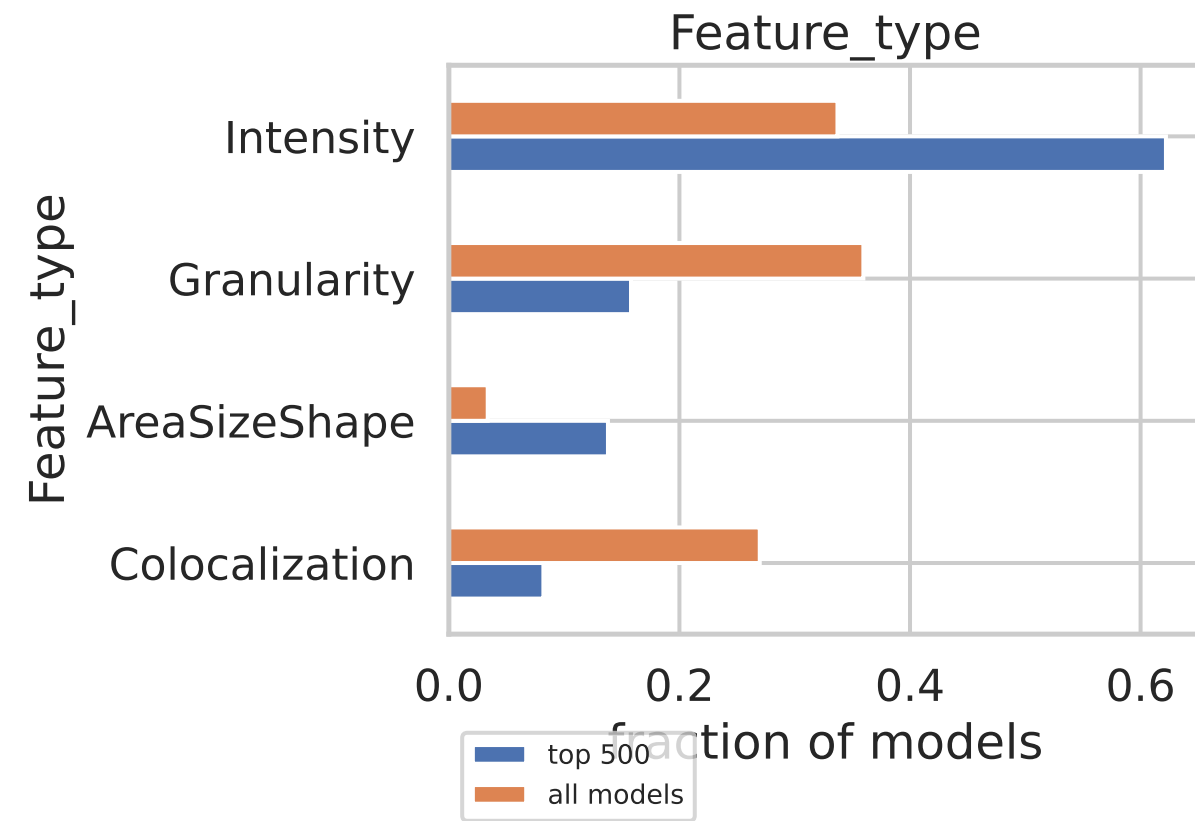

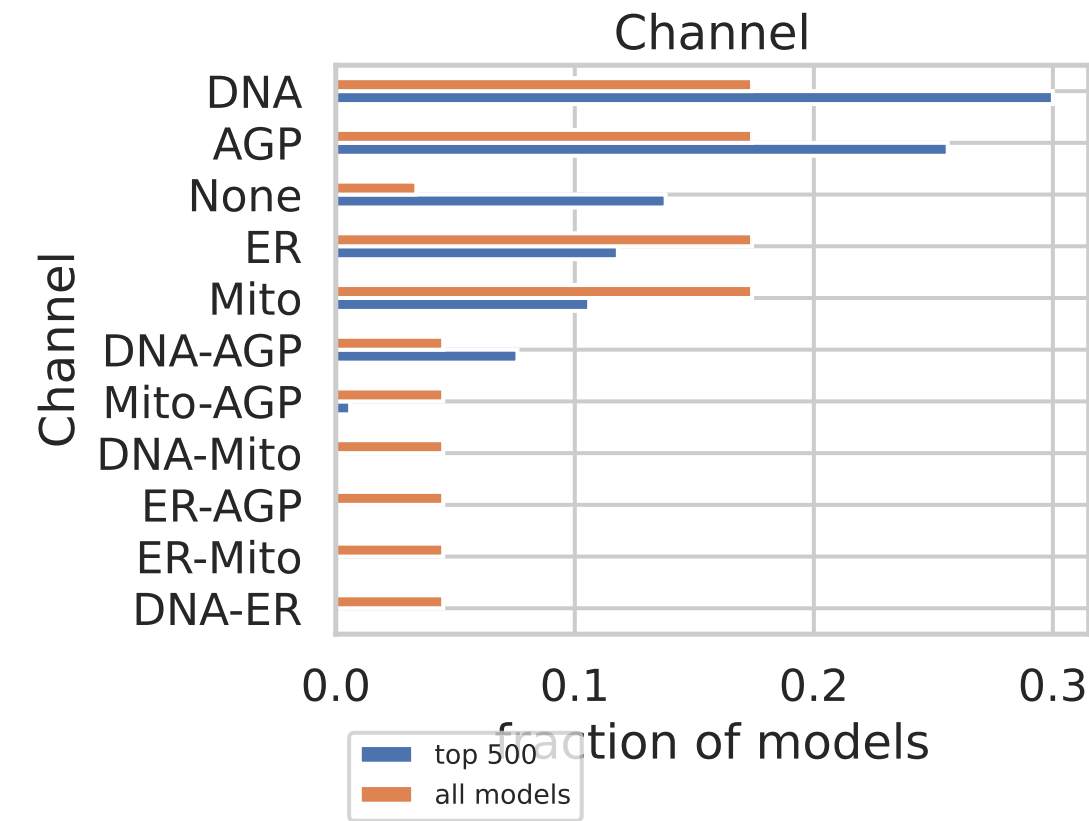

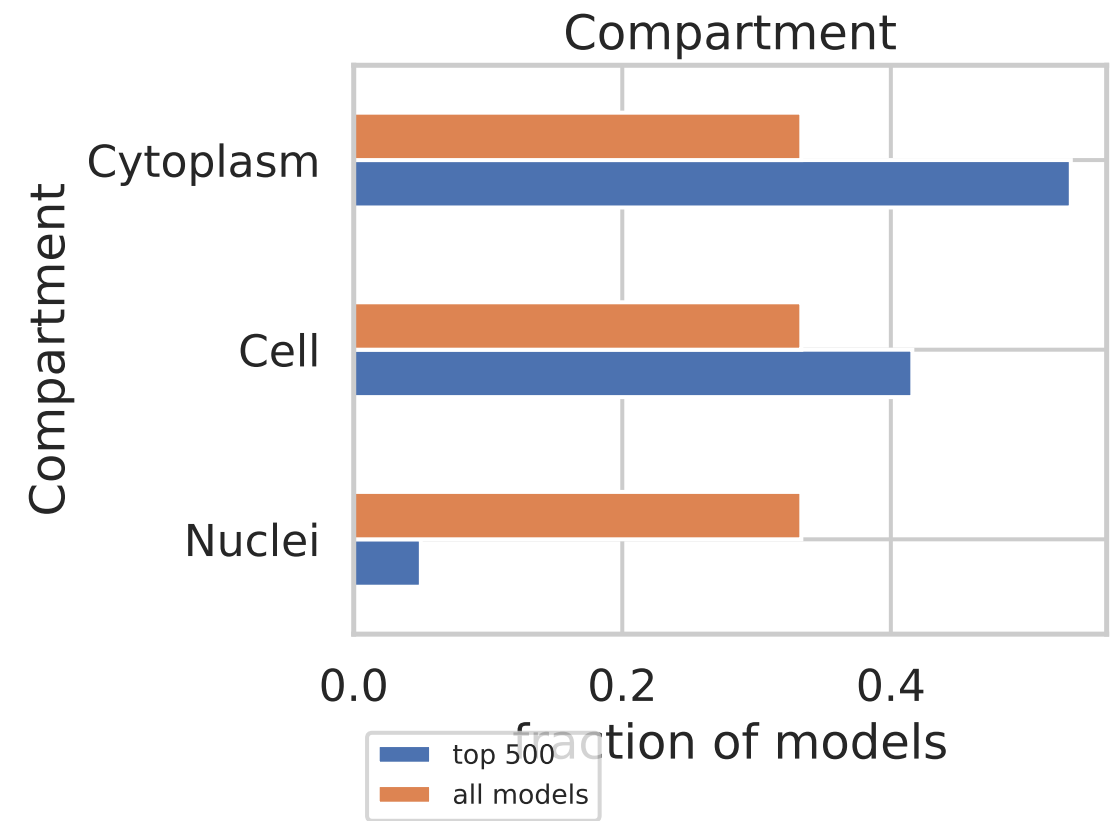

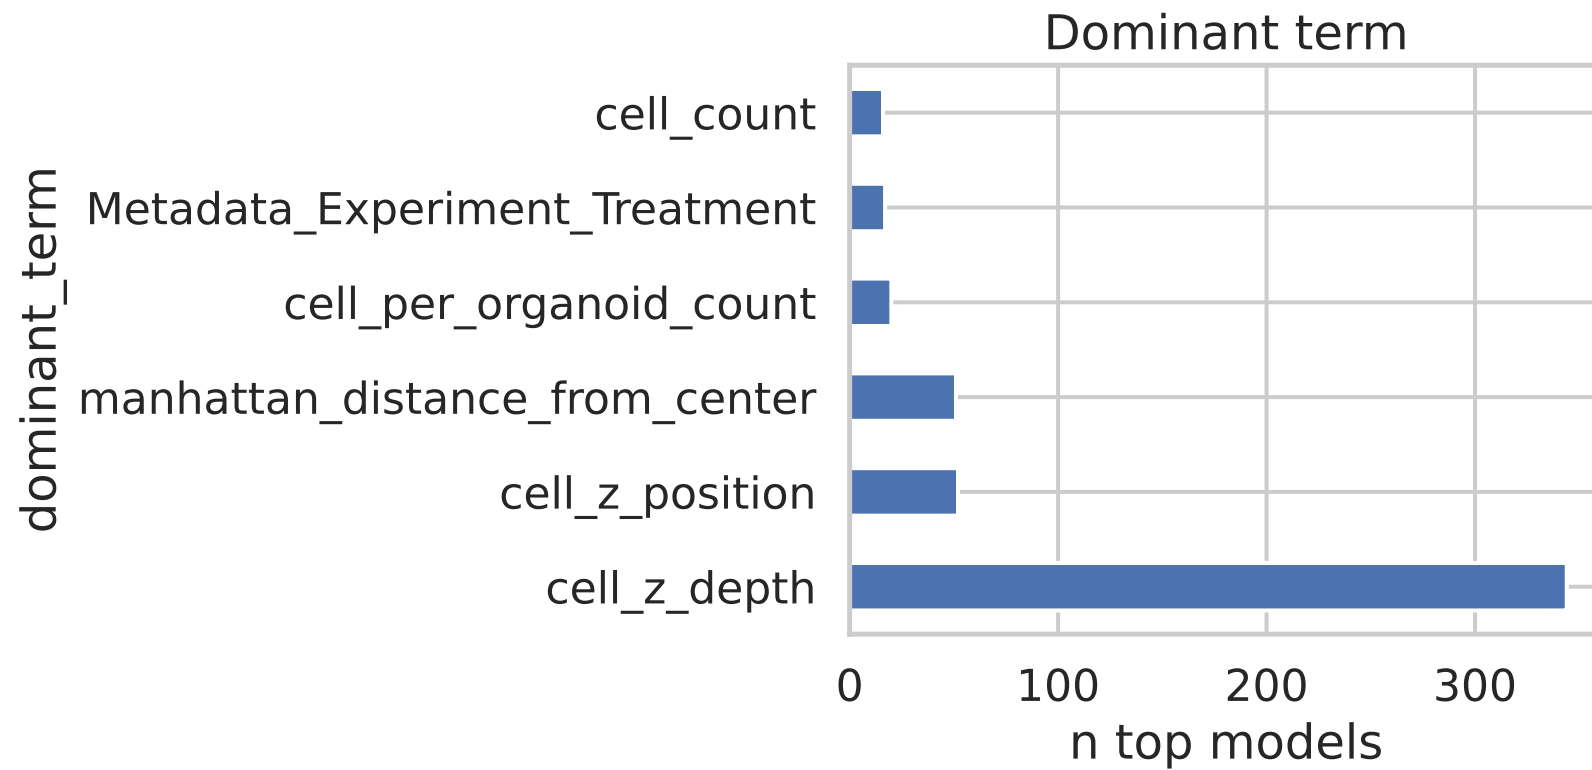

What drives the 500 best-explained models? (single_cell_norm)

Variance explained by each term in the 20 best-explained models

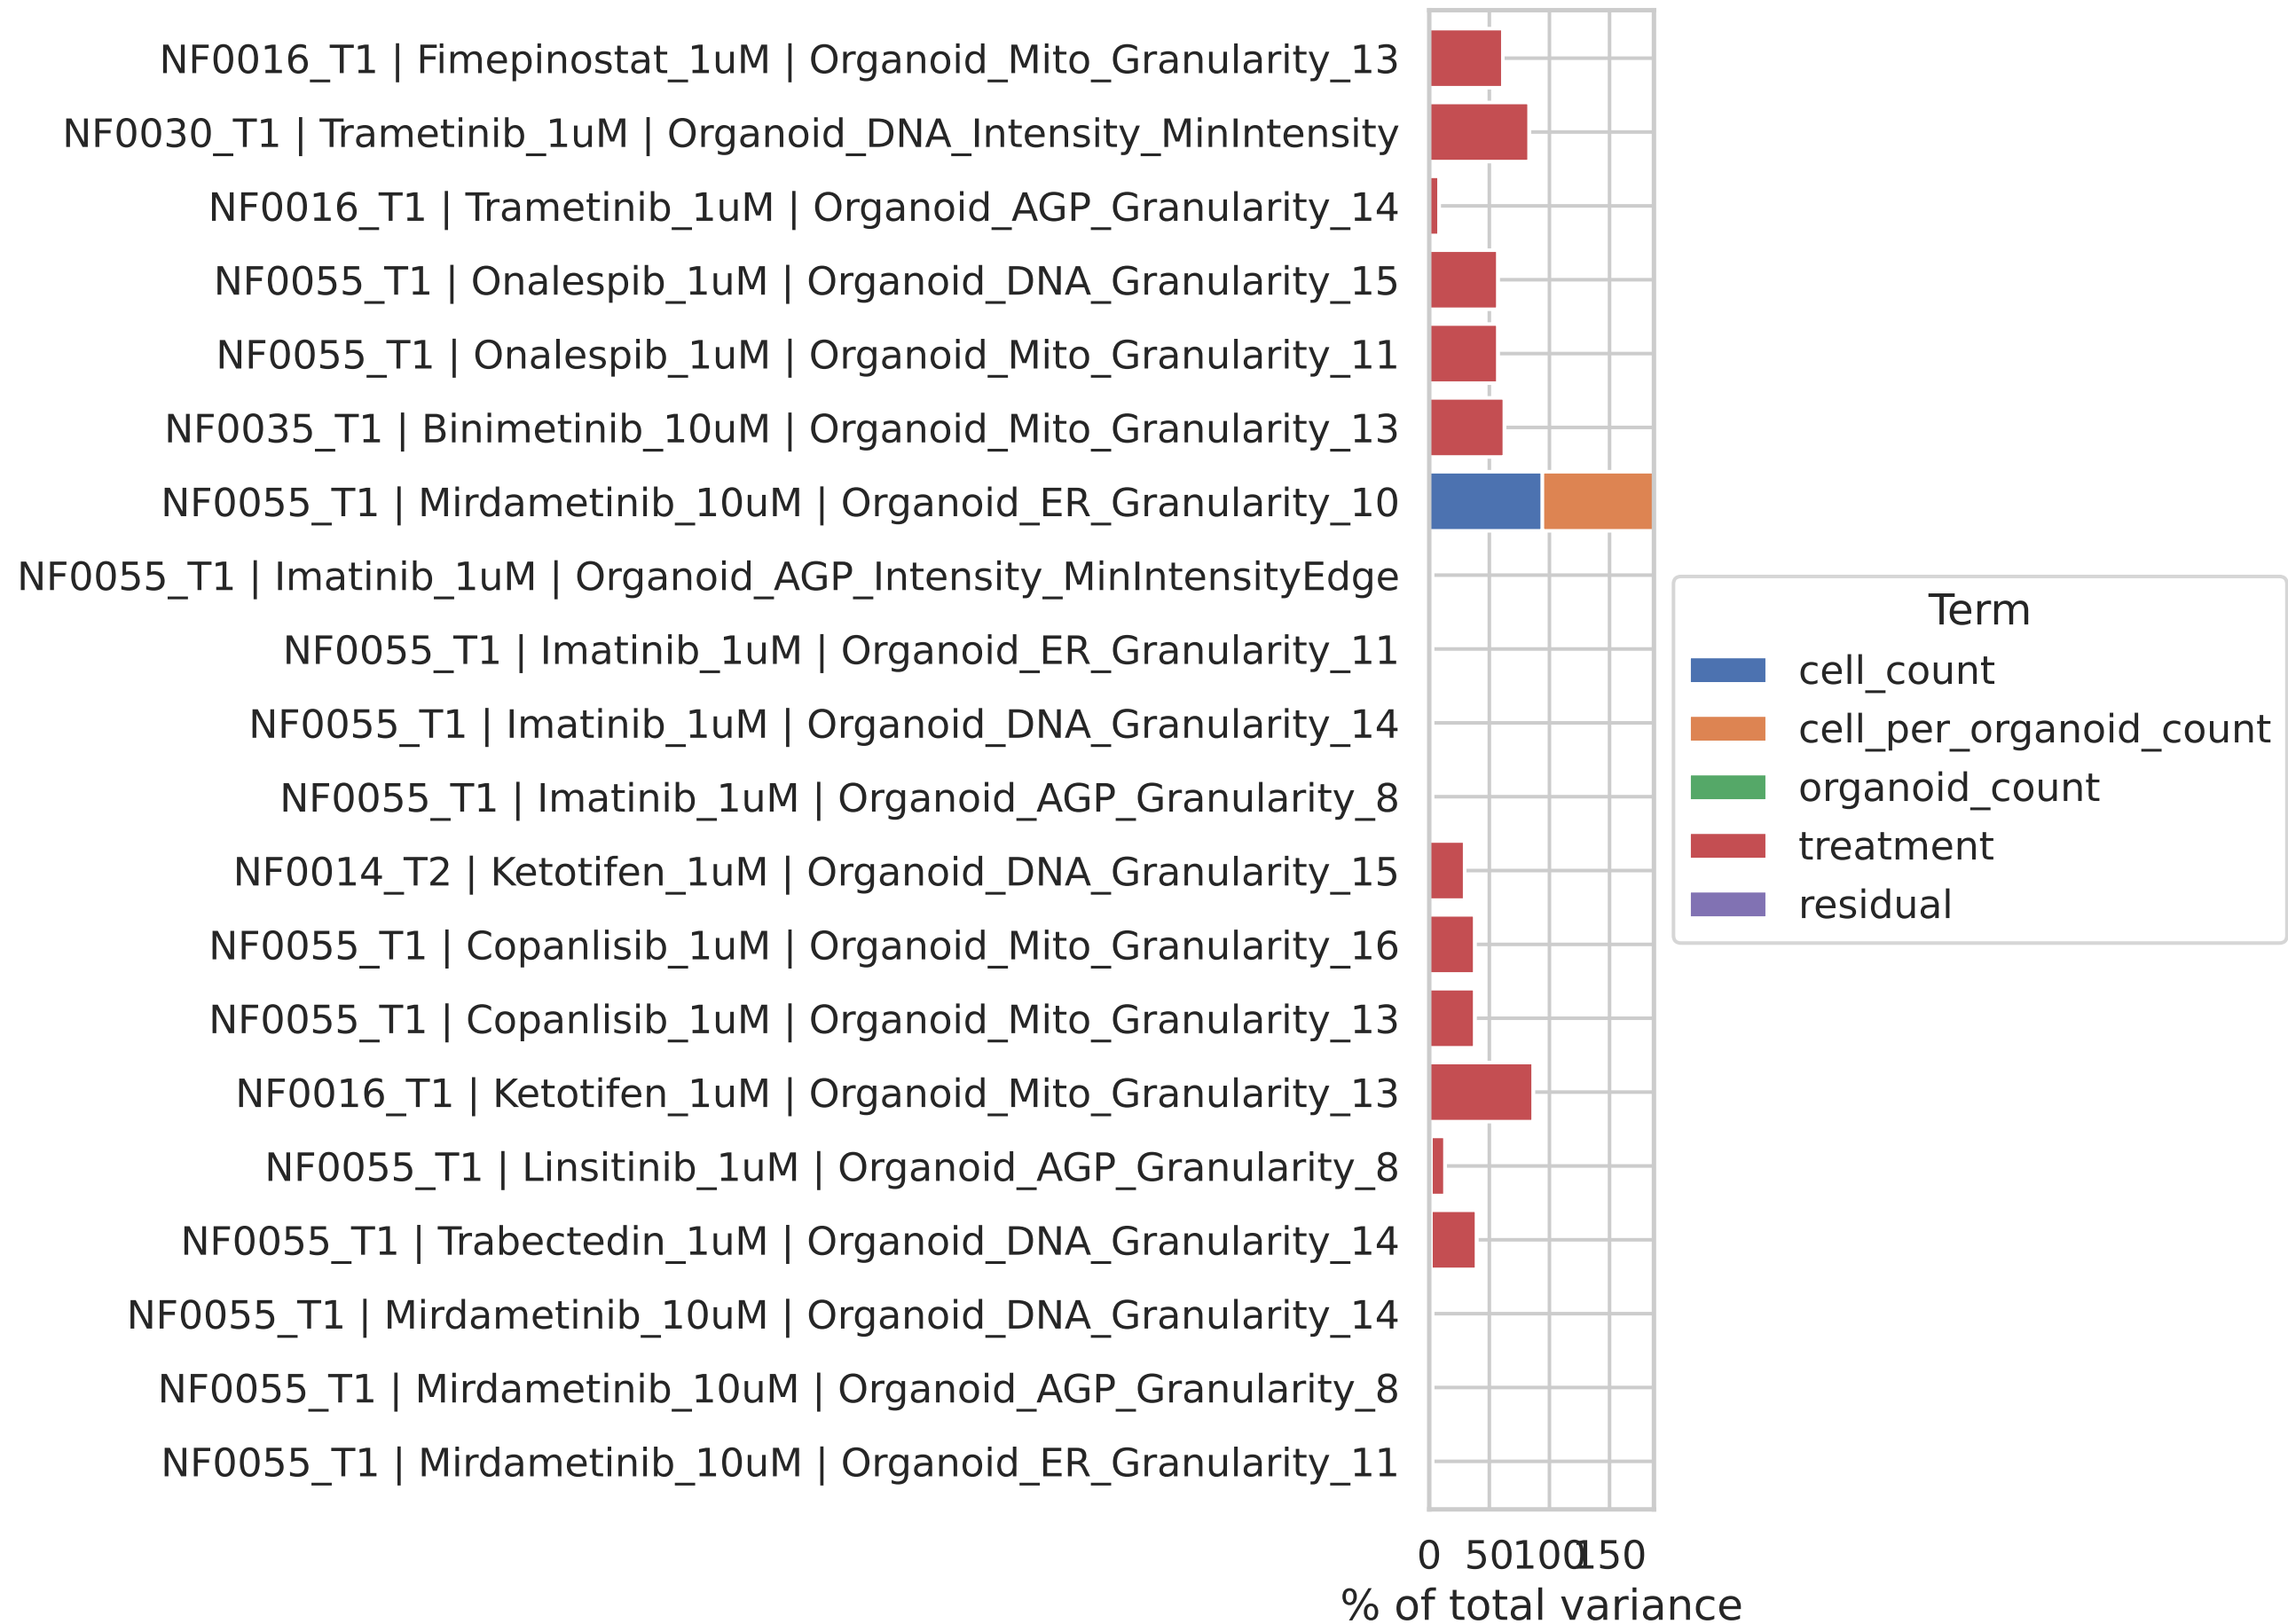

What drives the 500 best-explained models? (single_cell_norm_technical_model)

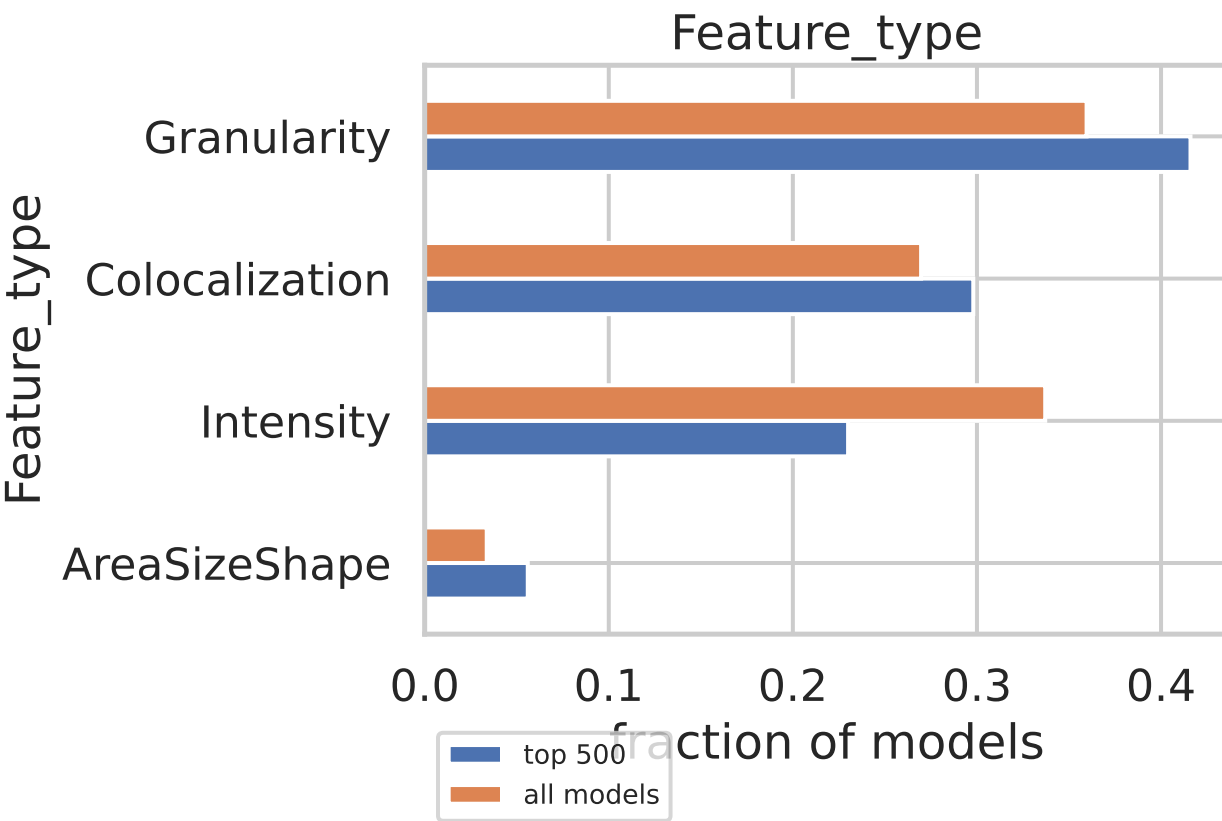

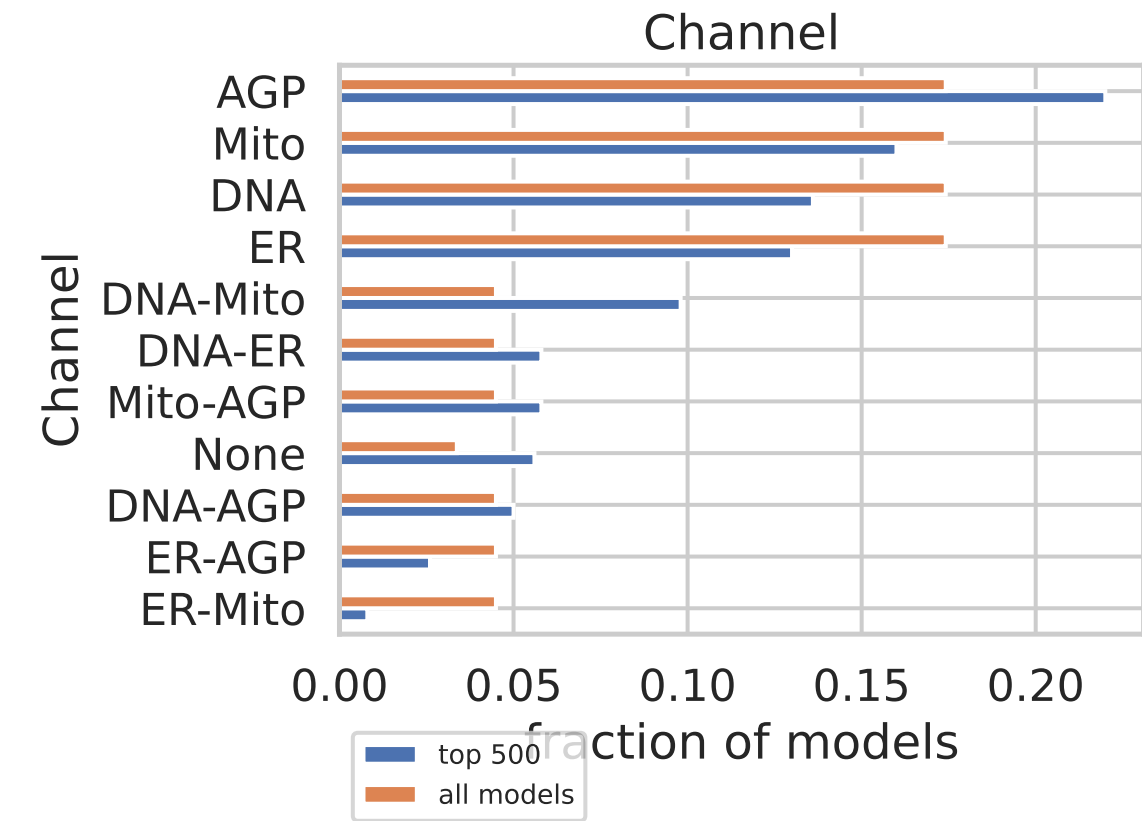

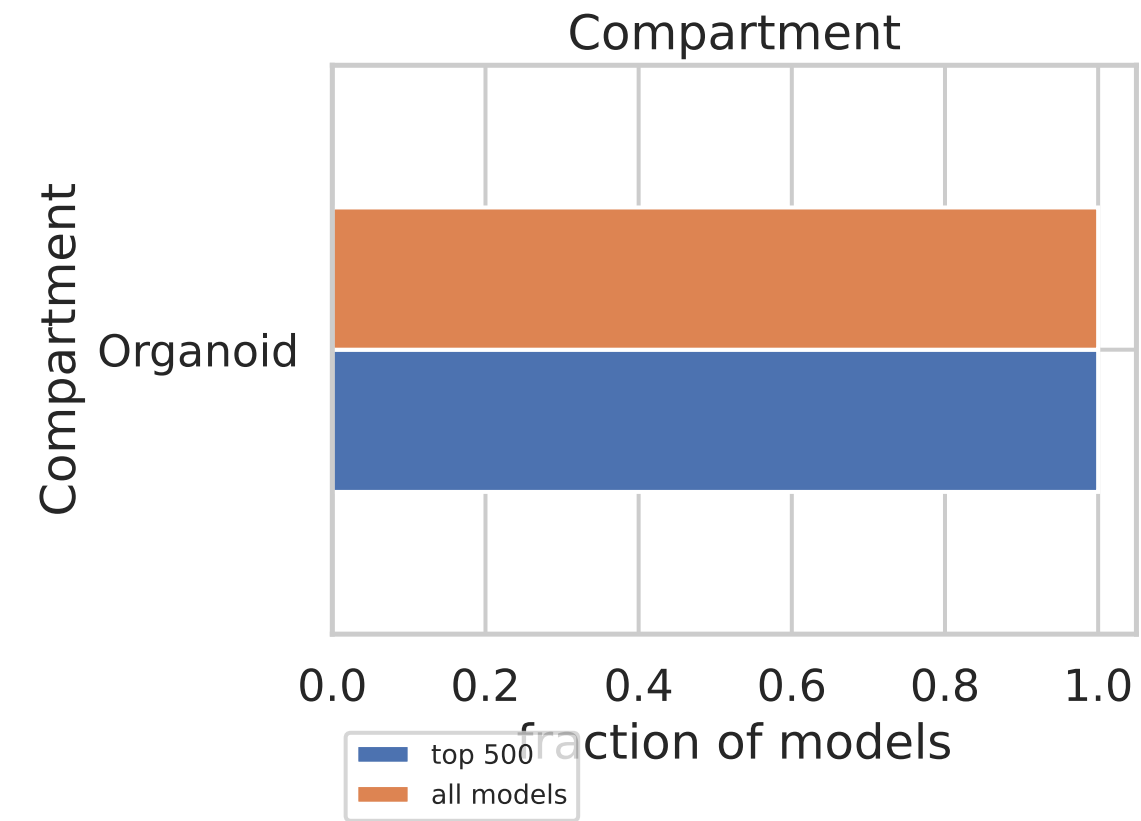

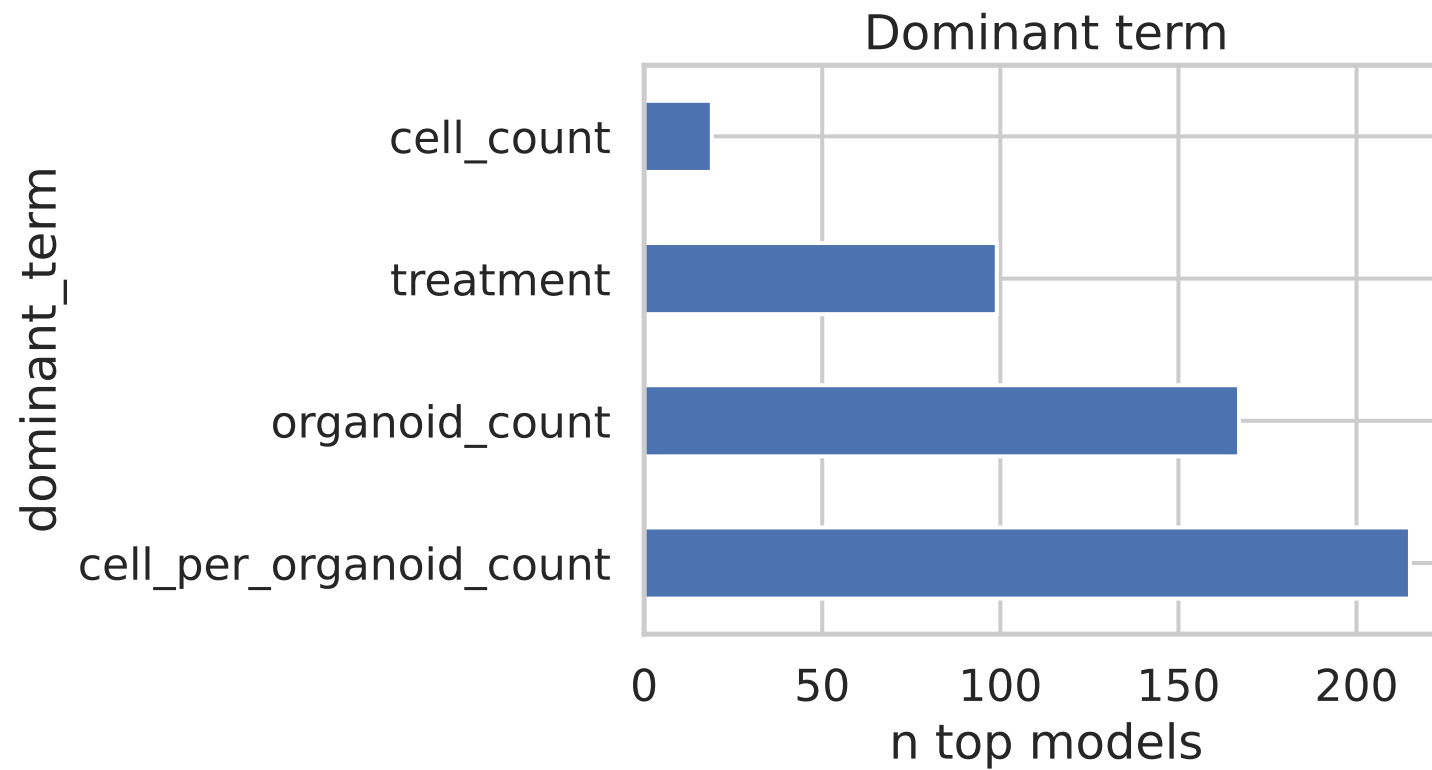

Variance explained by each term in the 20 best-explained models

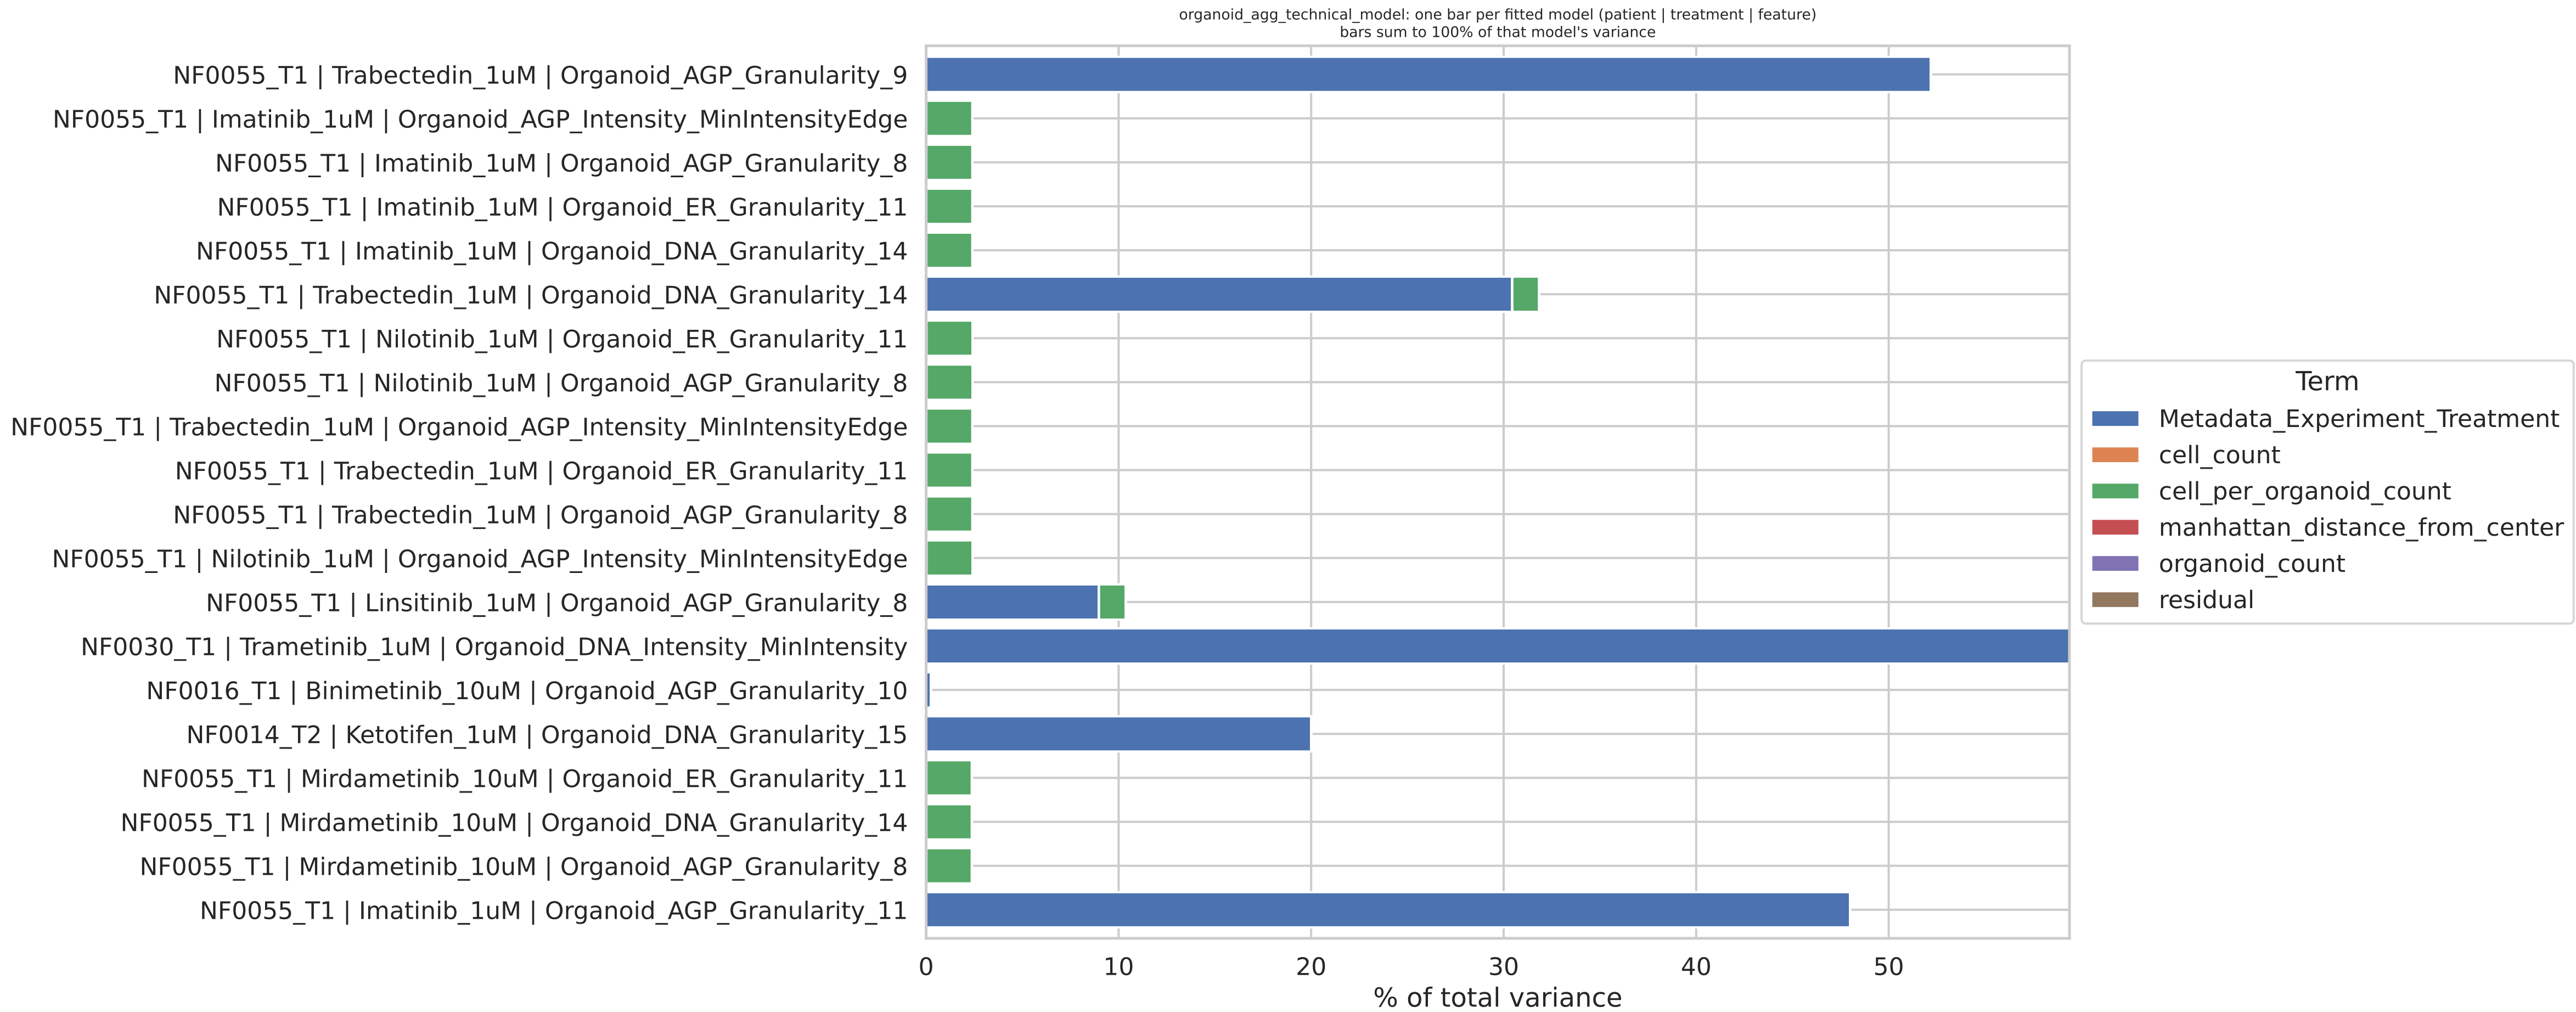

organoid_agg: one bar per fitted model (patient | treatment | feature)
bars sum to 100% of that model's variance

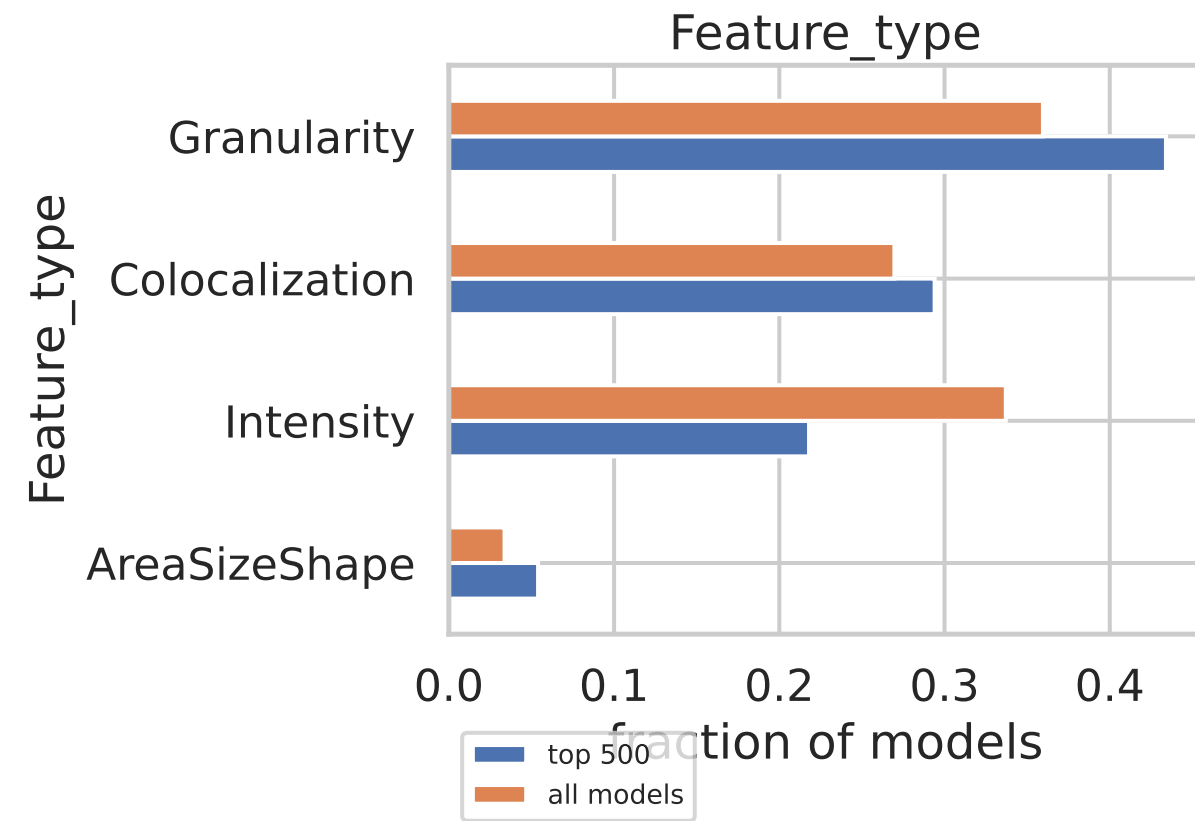

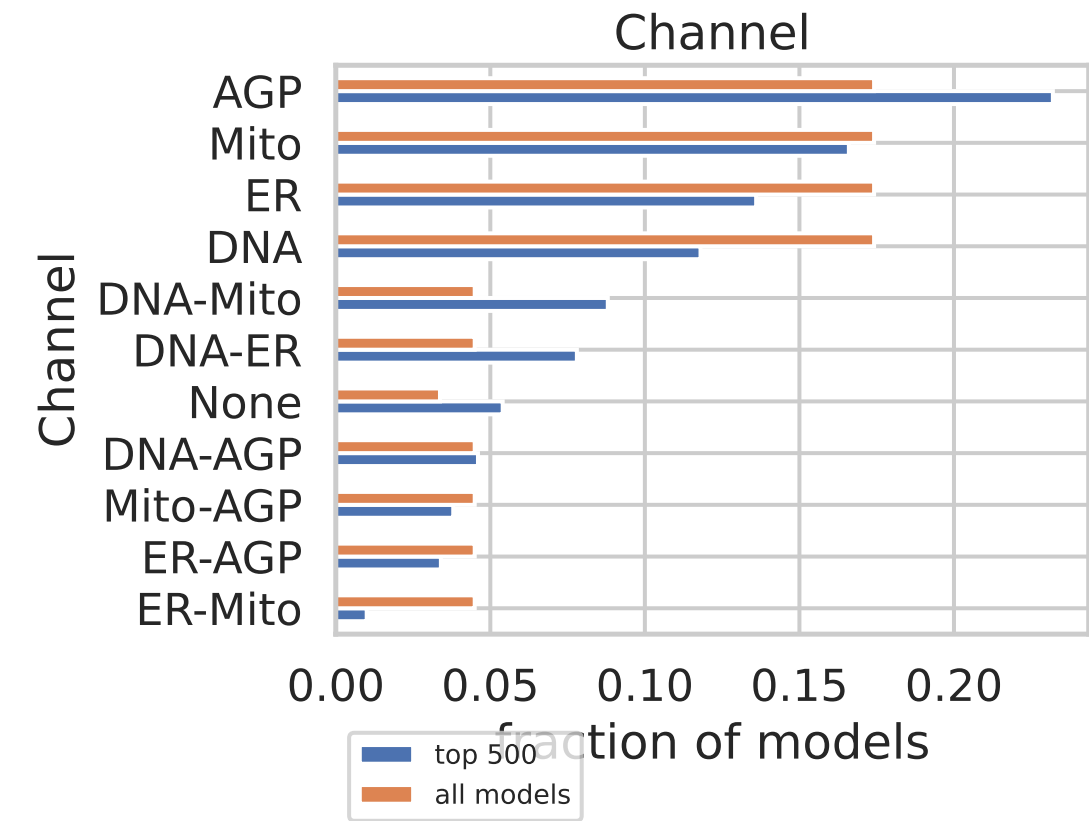

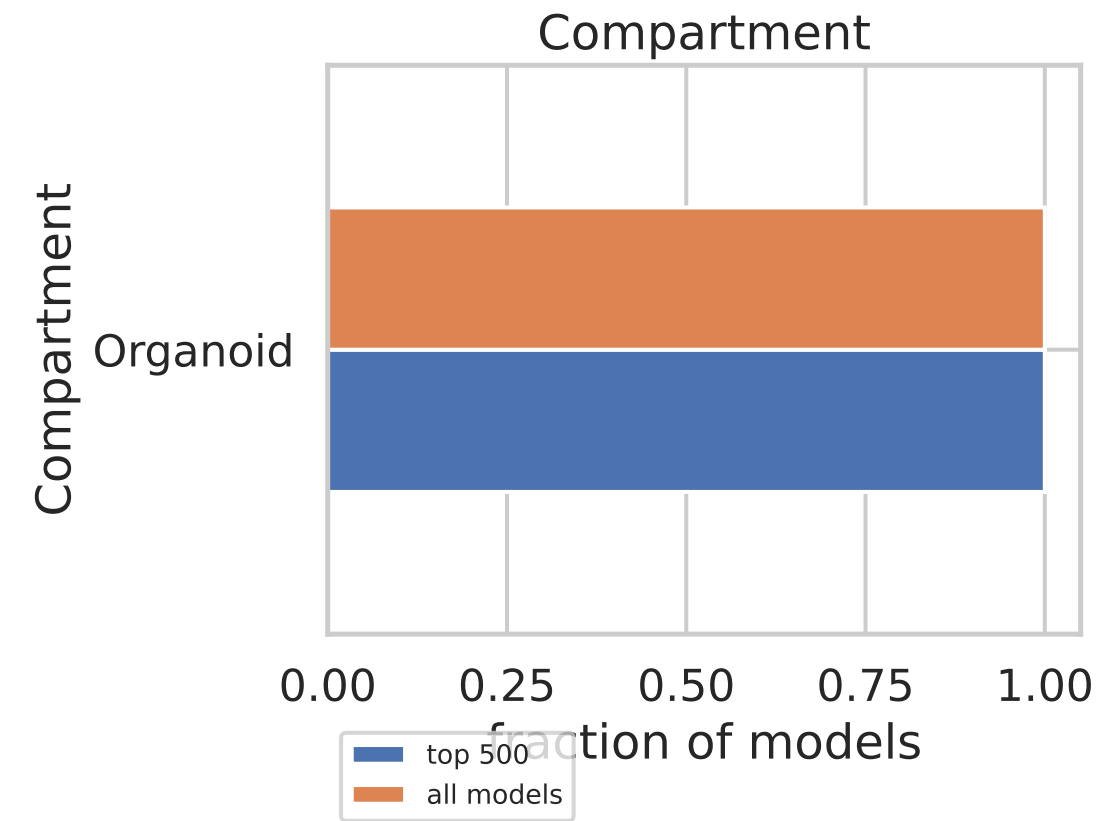

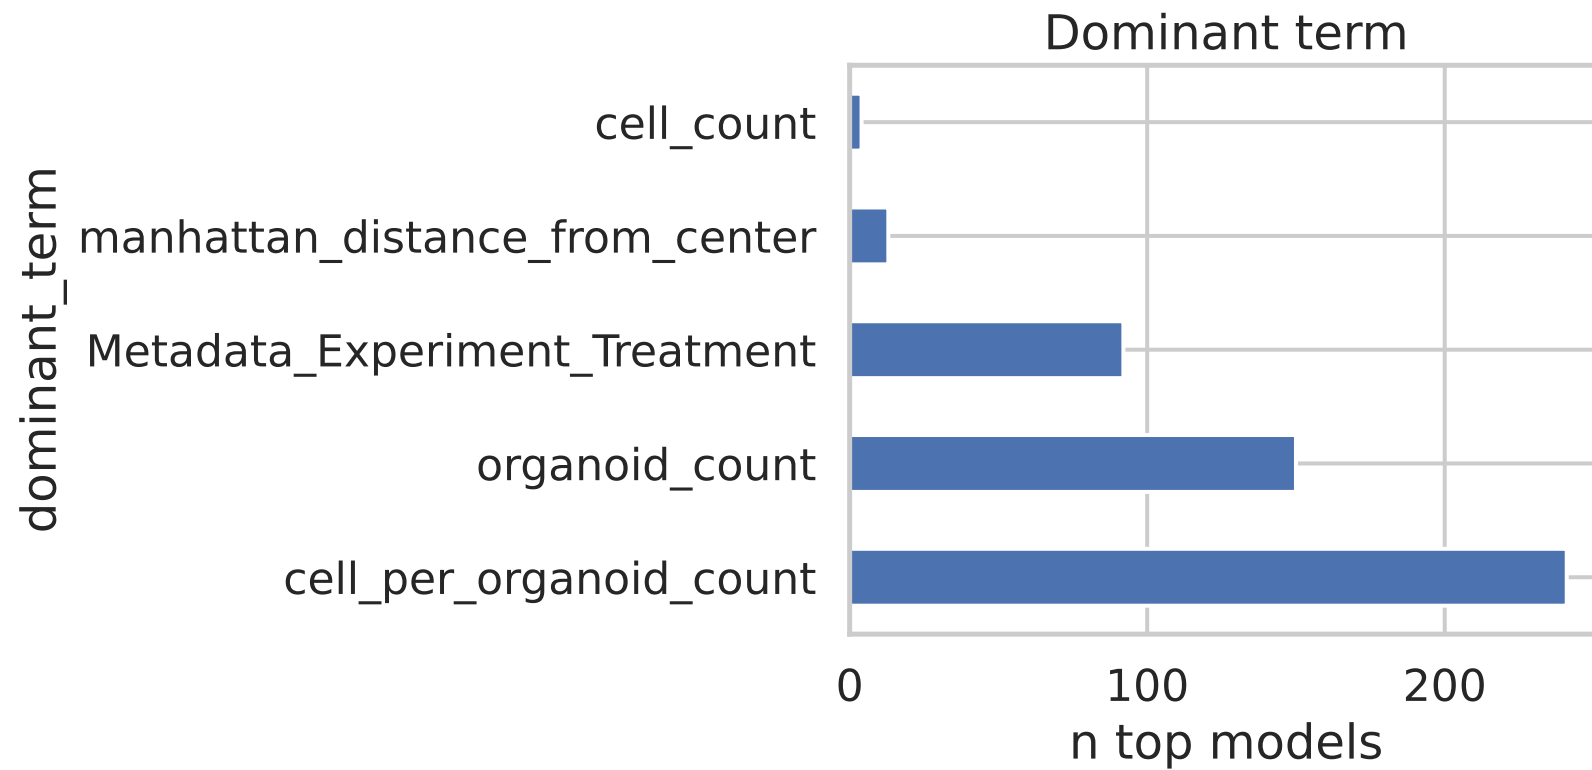

What drives the 500 best-explained models? (organoid_agg)

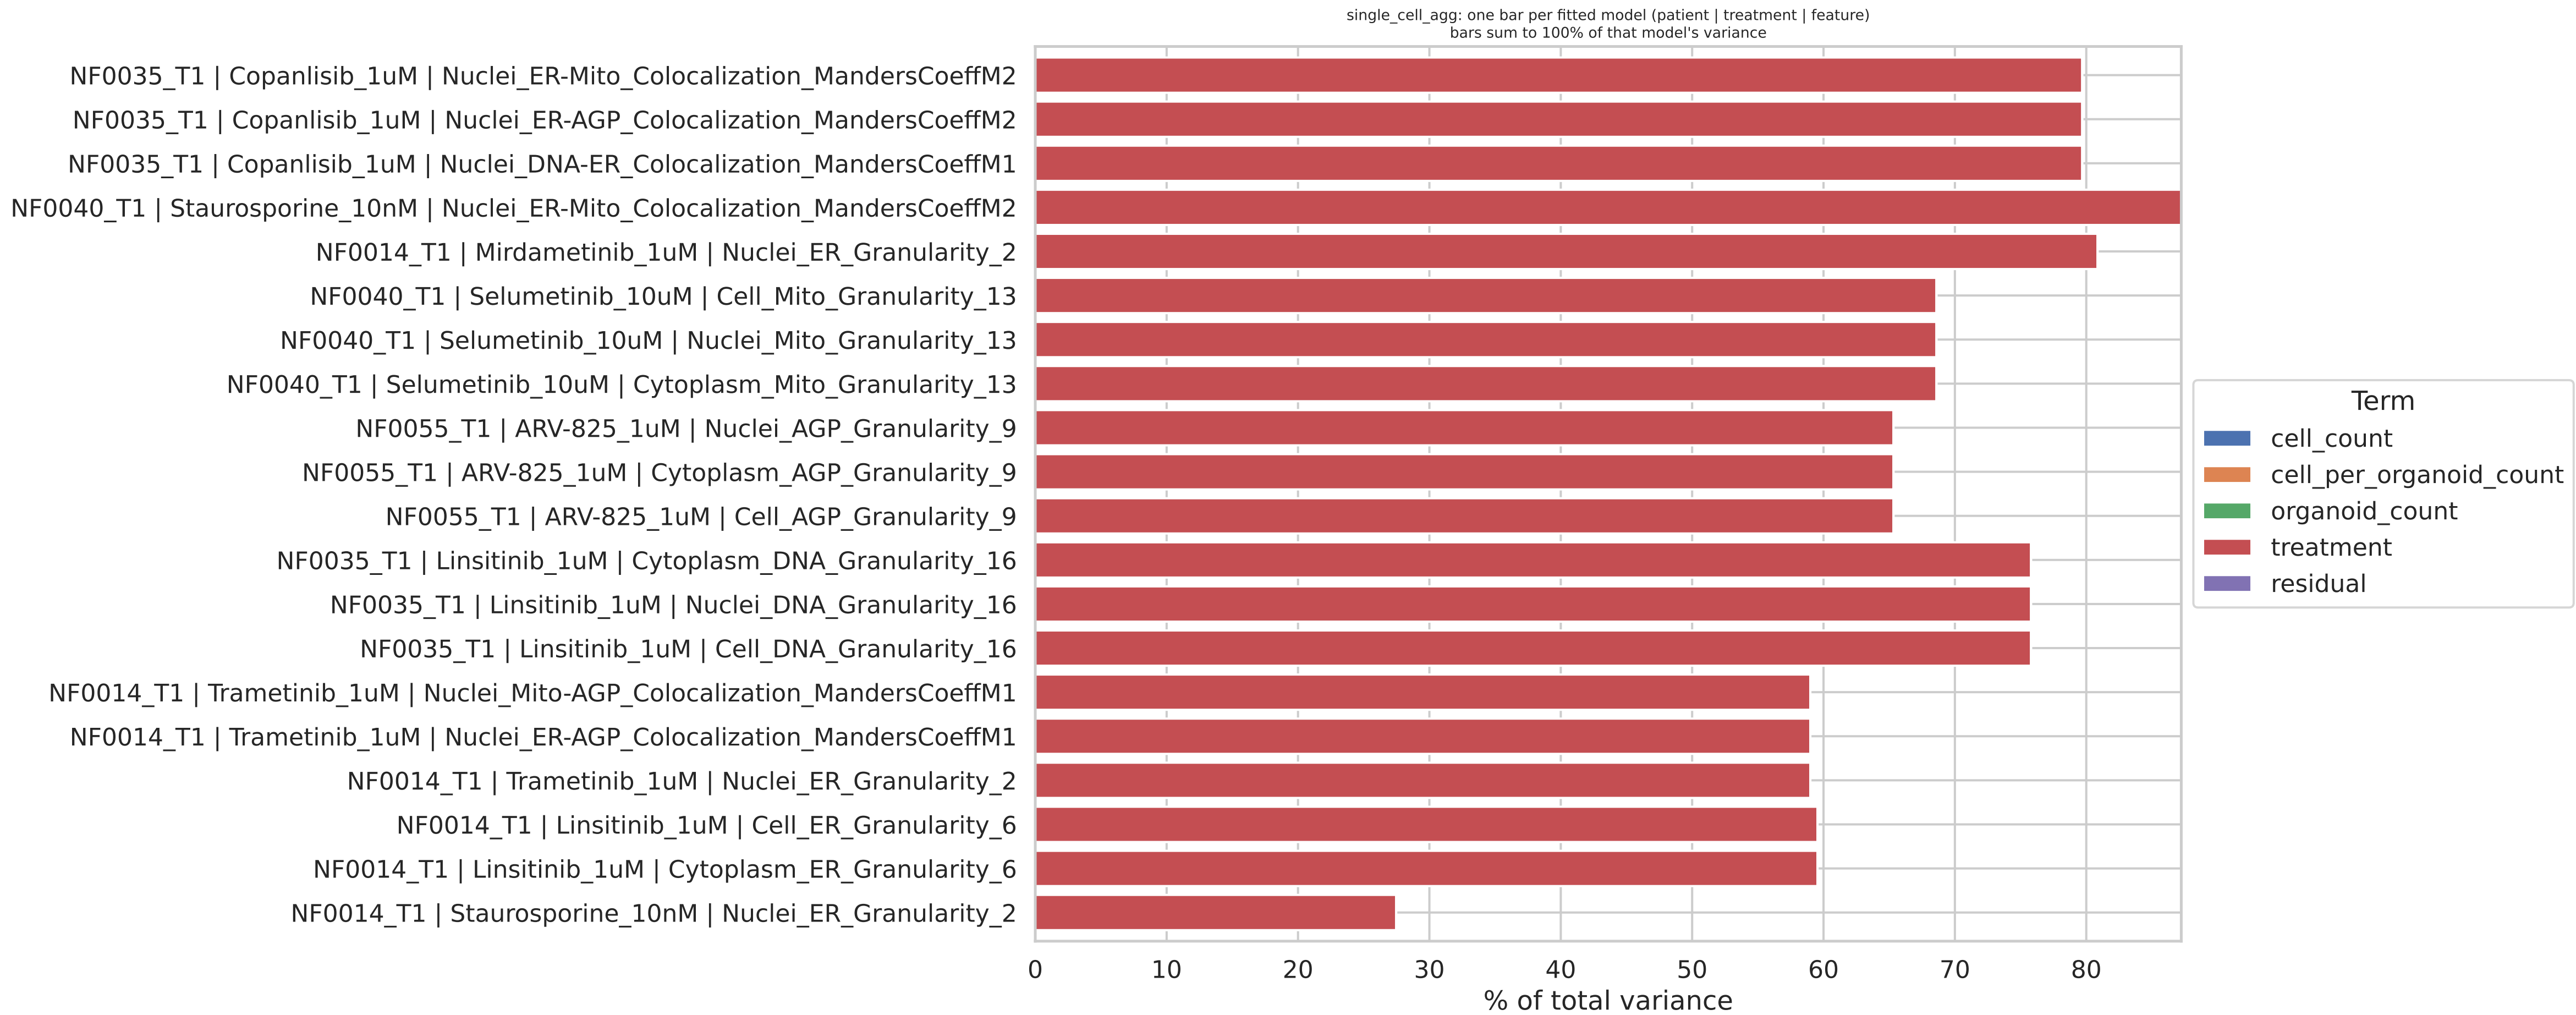

Variance explained by each term in the 20 best-explained models

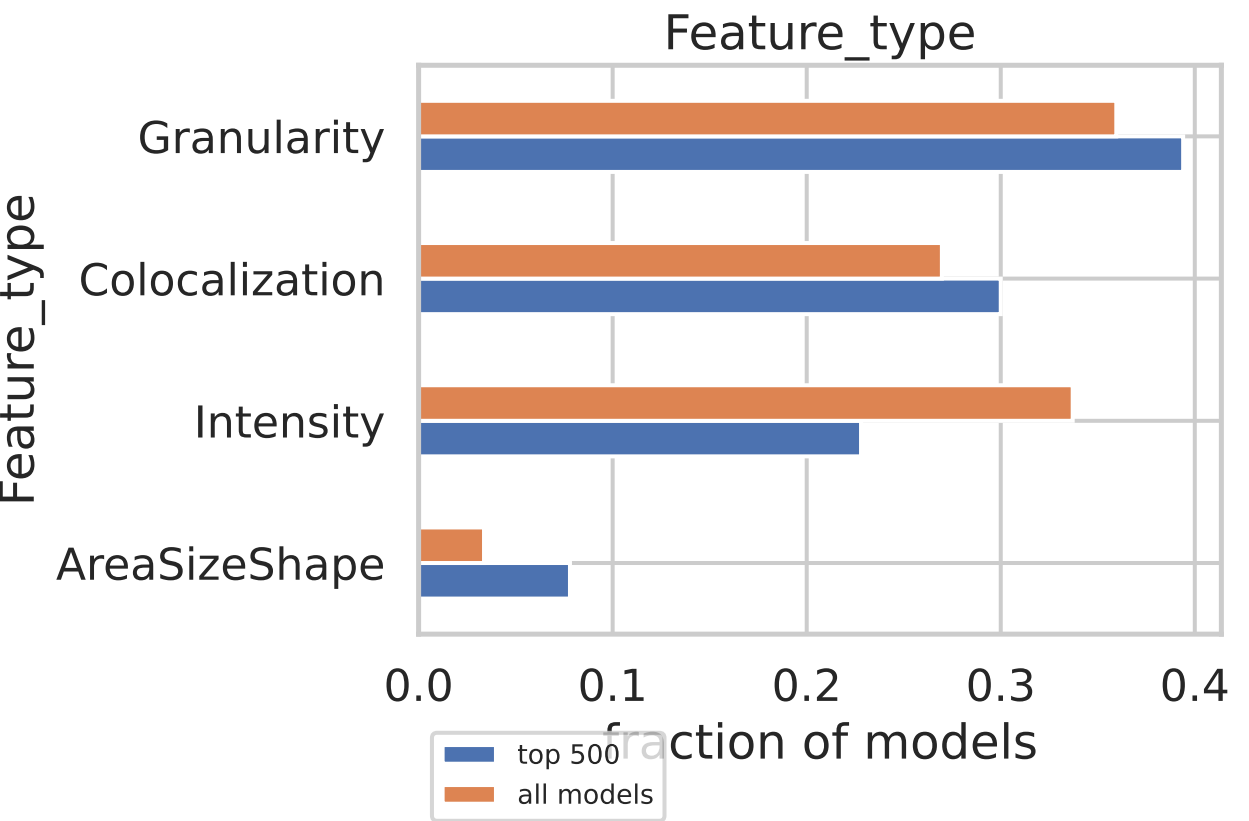

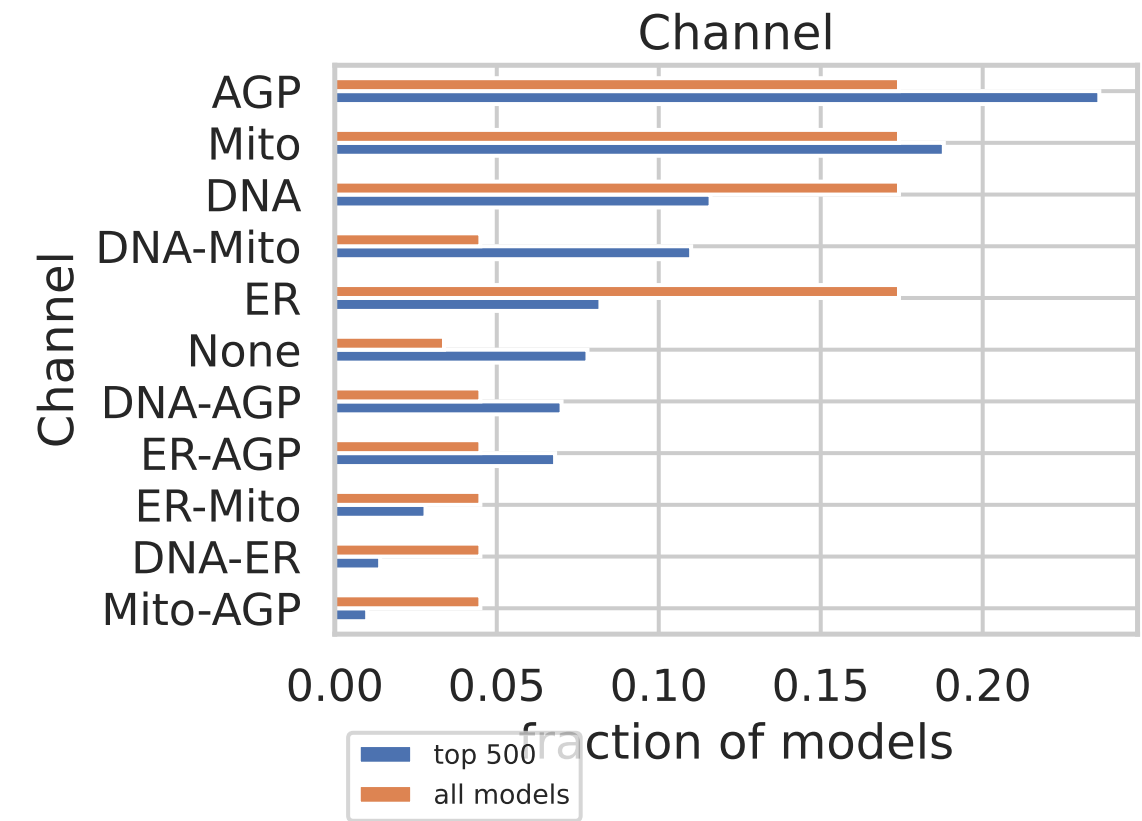

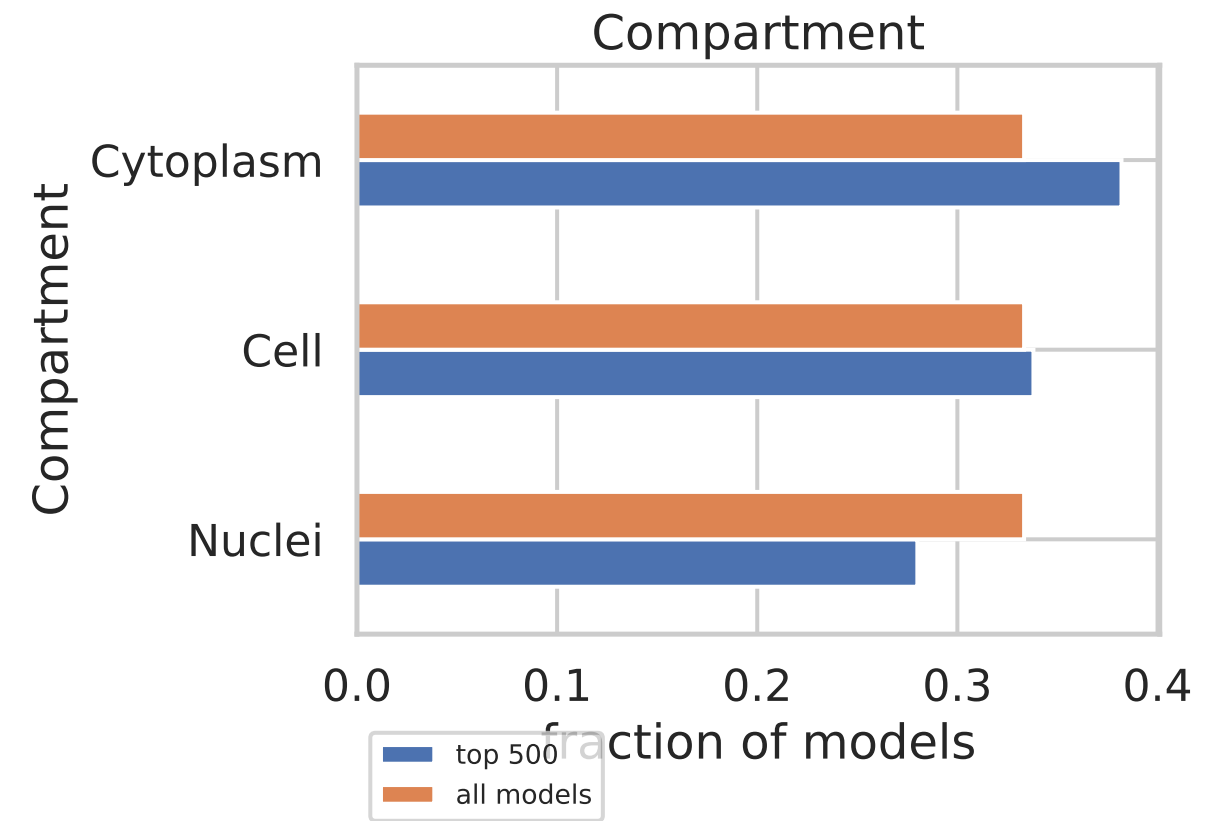

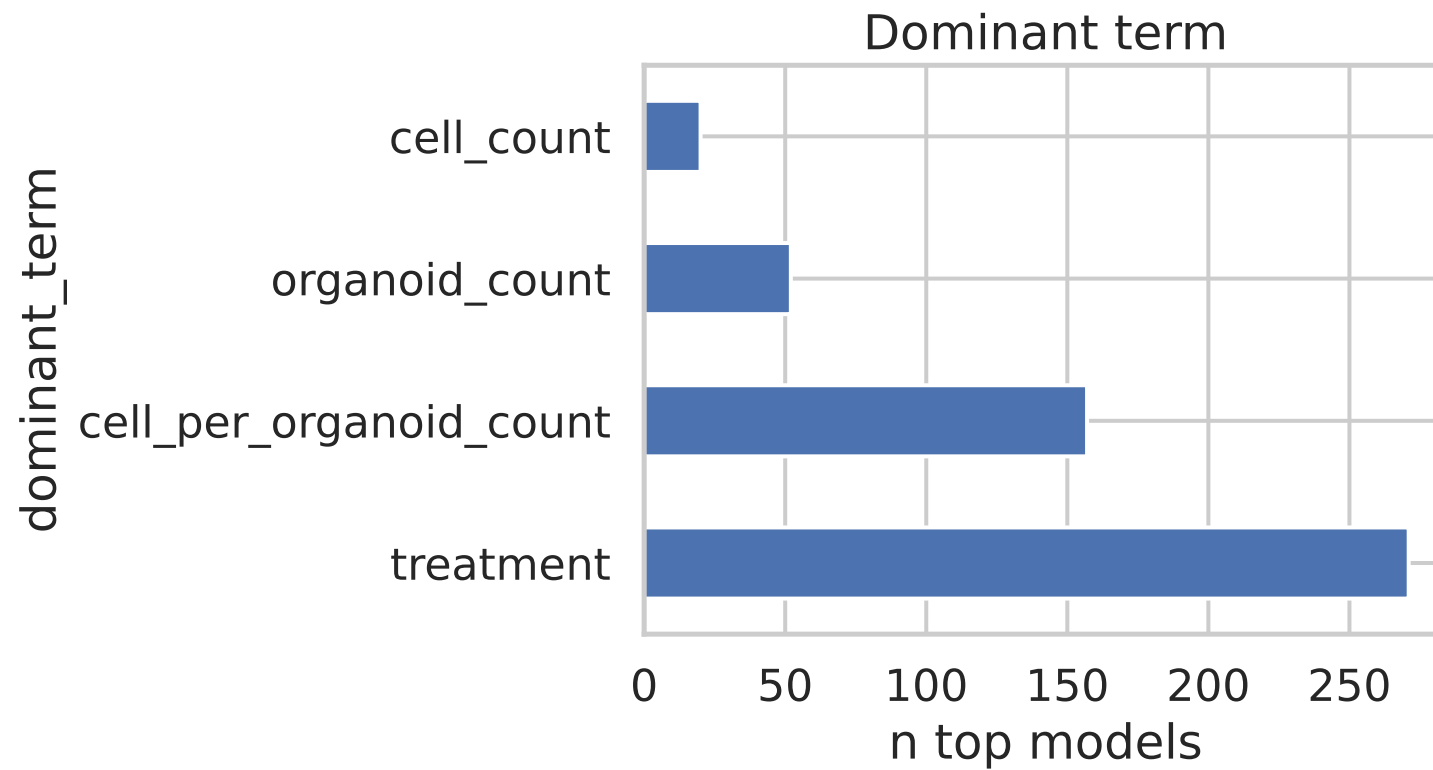

What drives the 500 best-explained models? (organoid_agg_technical_model)

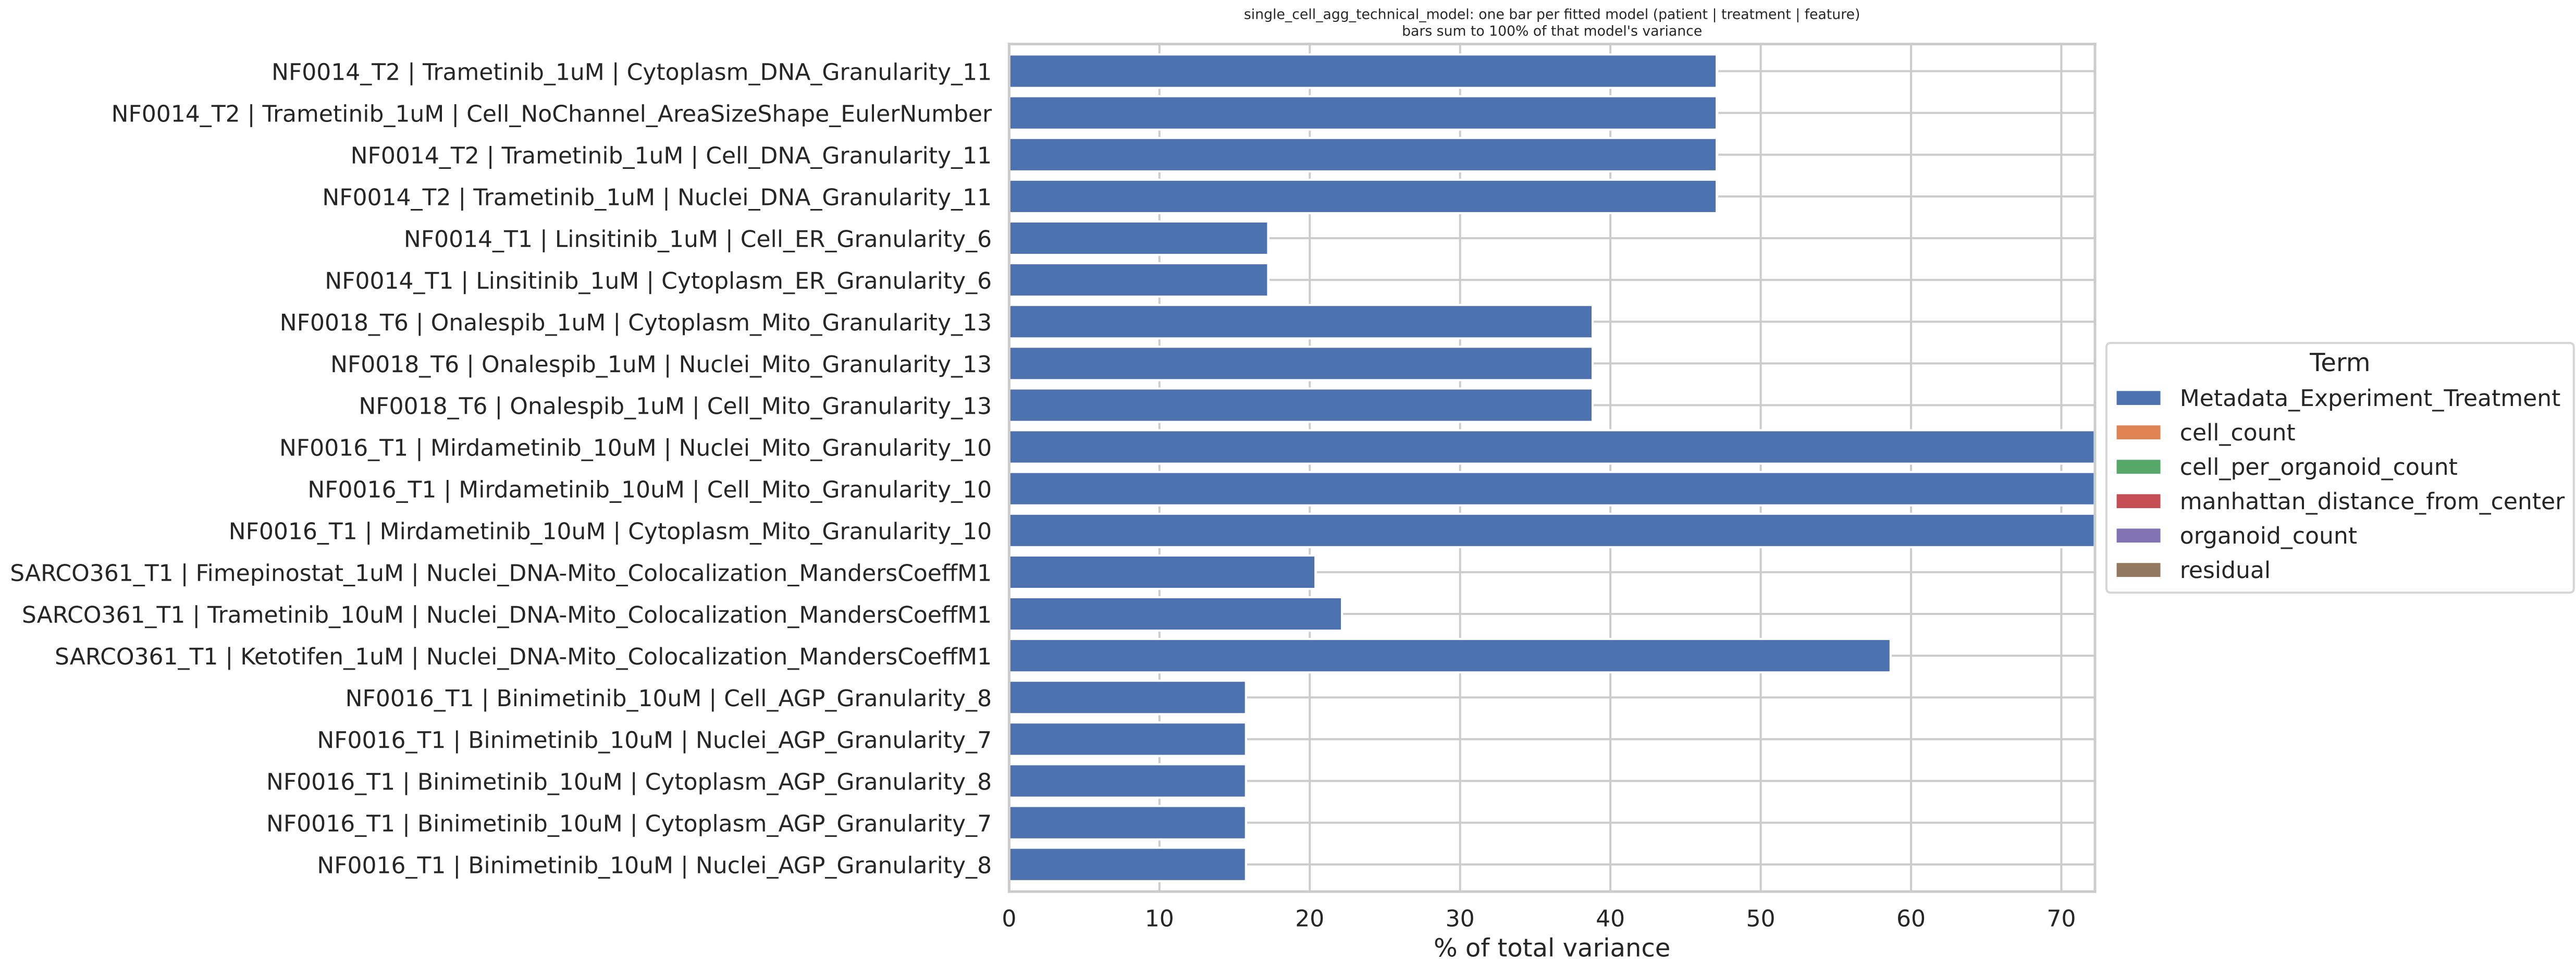

Variance explained by each term in the 20 best-explained models

What drives the 500 best-explained models? (single_cell_agg)

Variance explained by each term in the 20 best-explained models

What drives the 500 best-explained models? (single_cell_agg_technical_model)
