

Model performance (R^2) by profile and feature type ... lopo

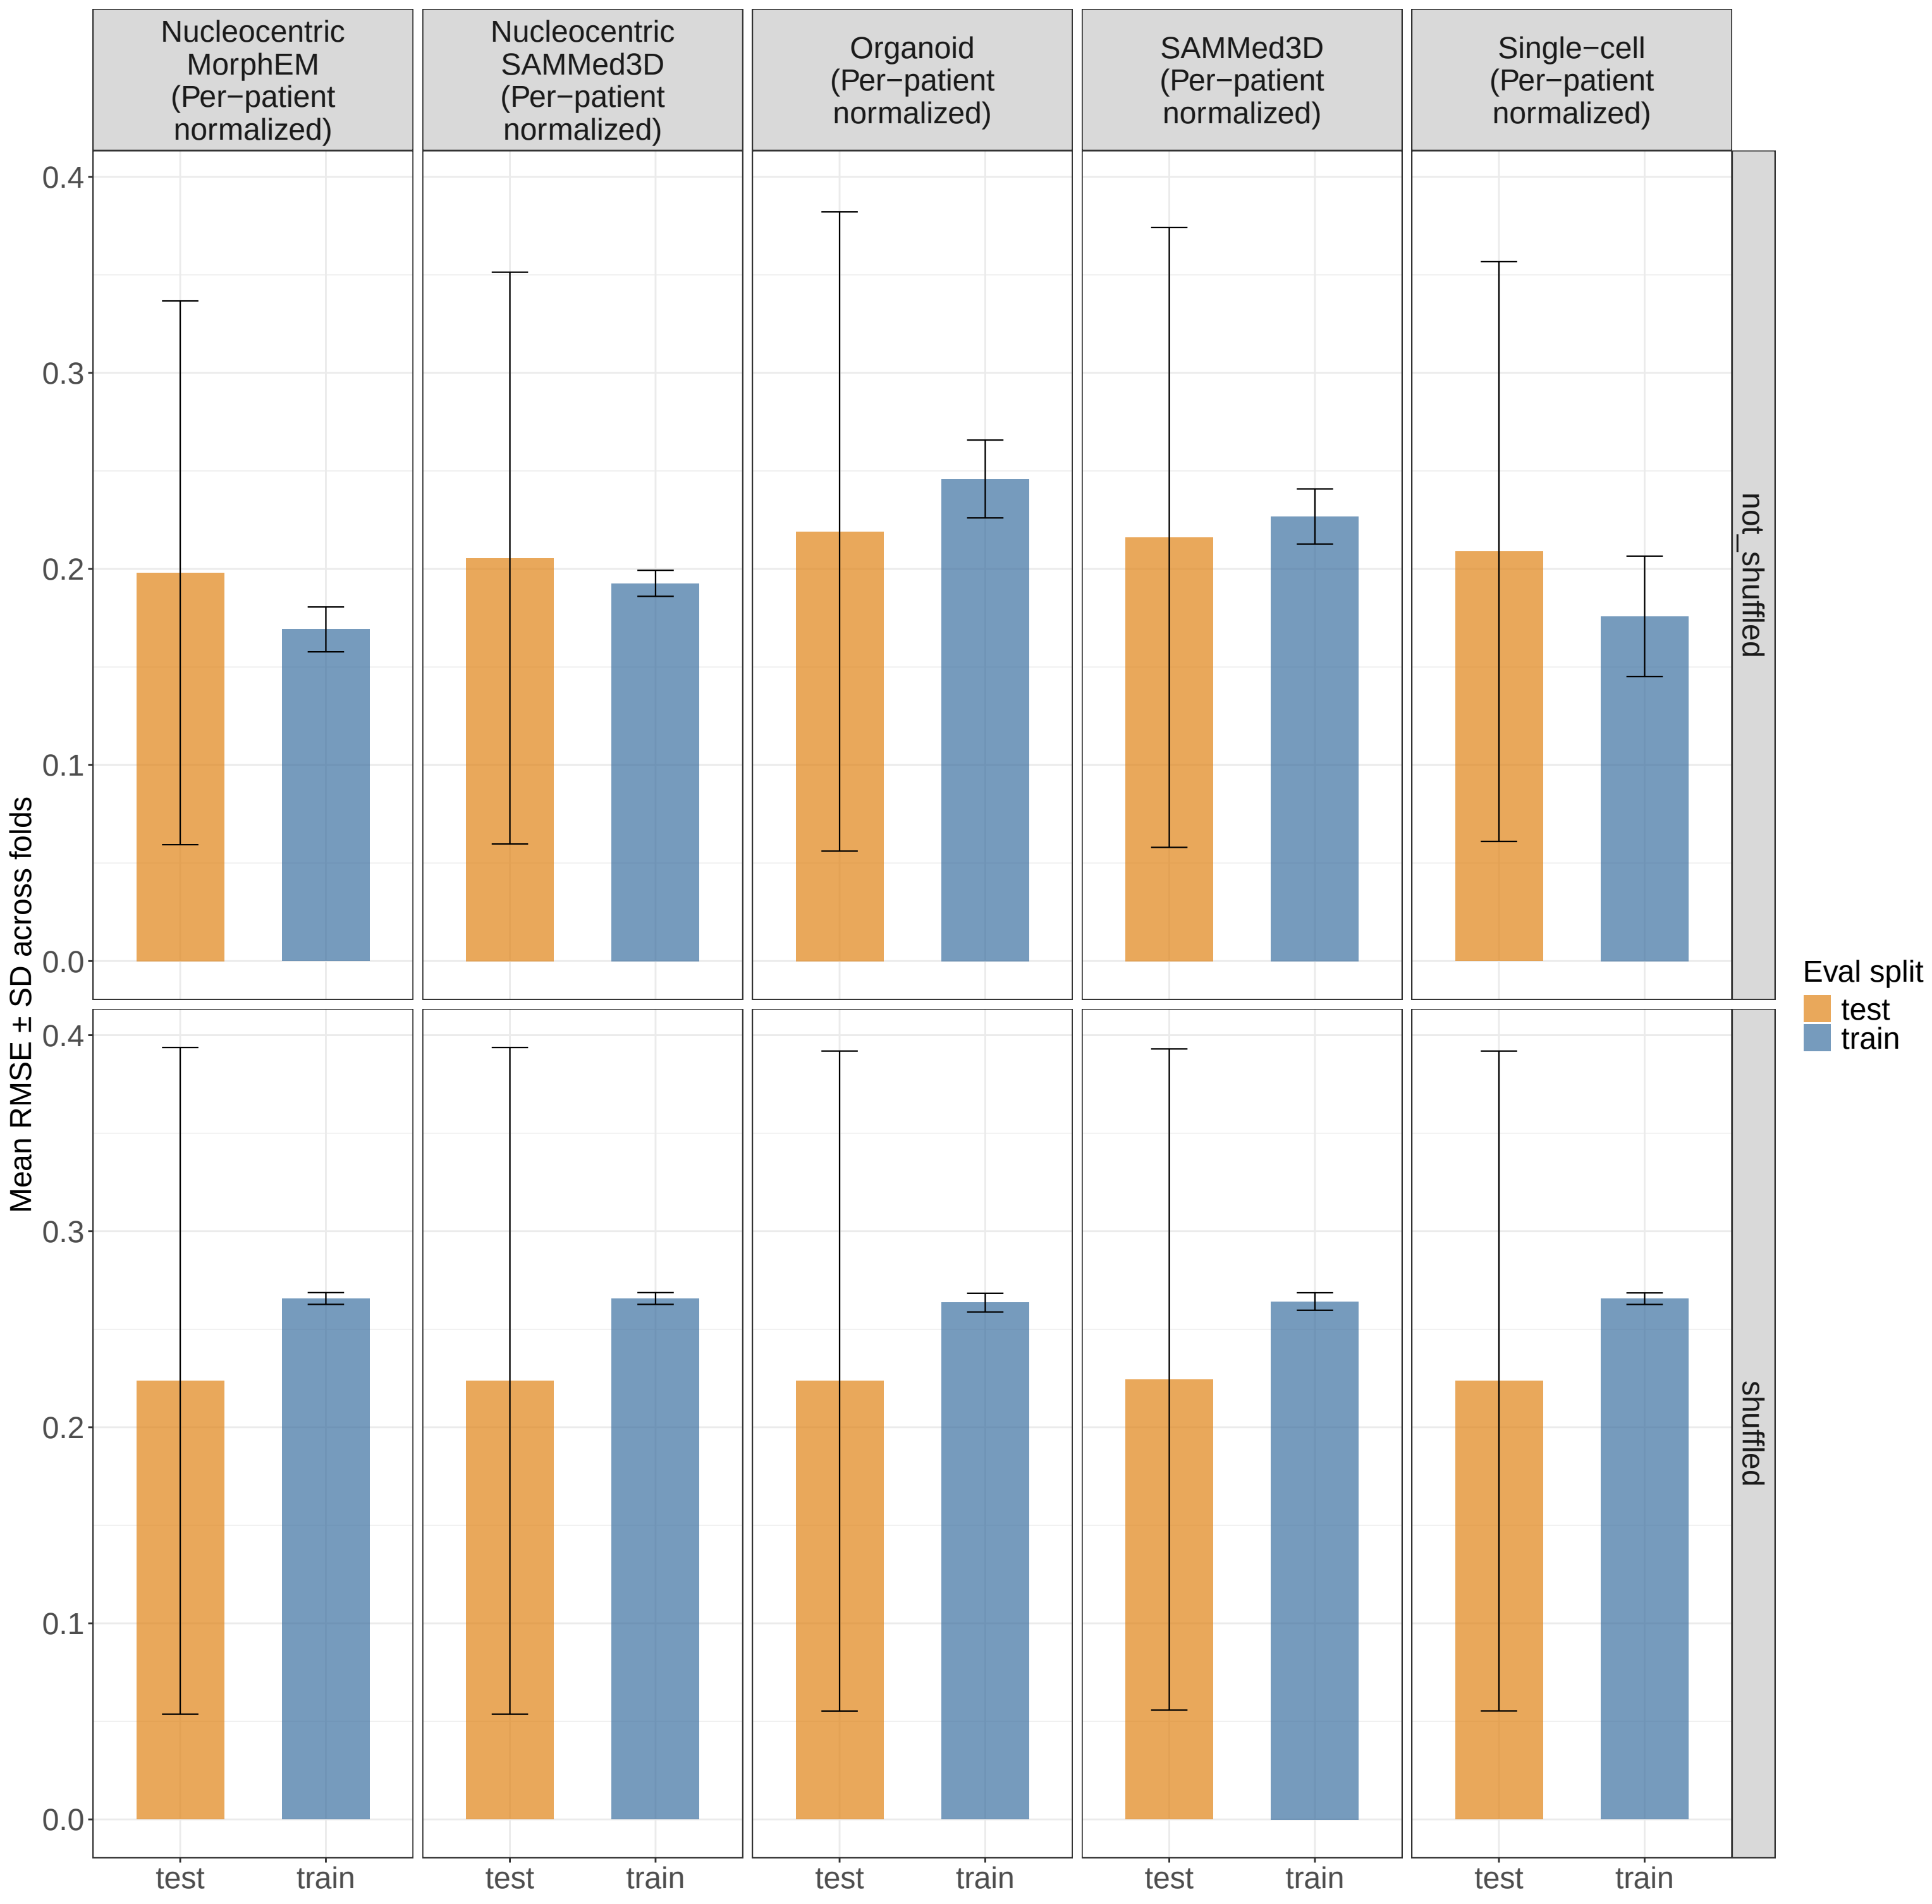

Model performance (RMSE) by profile and feature type ... lopo

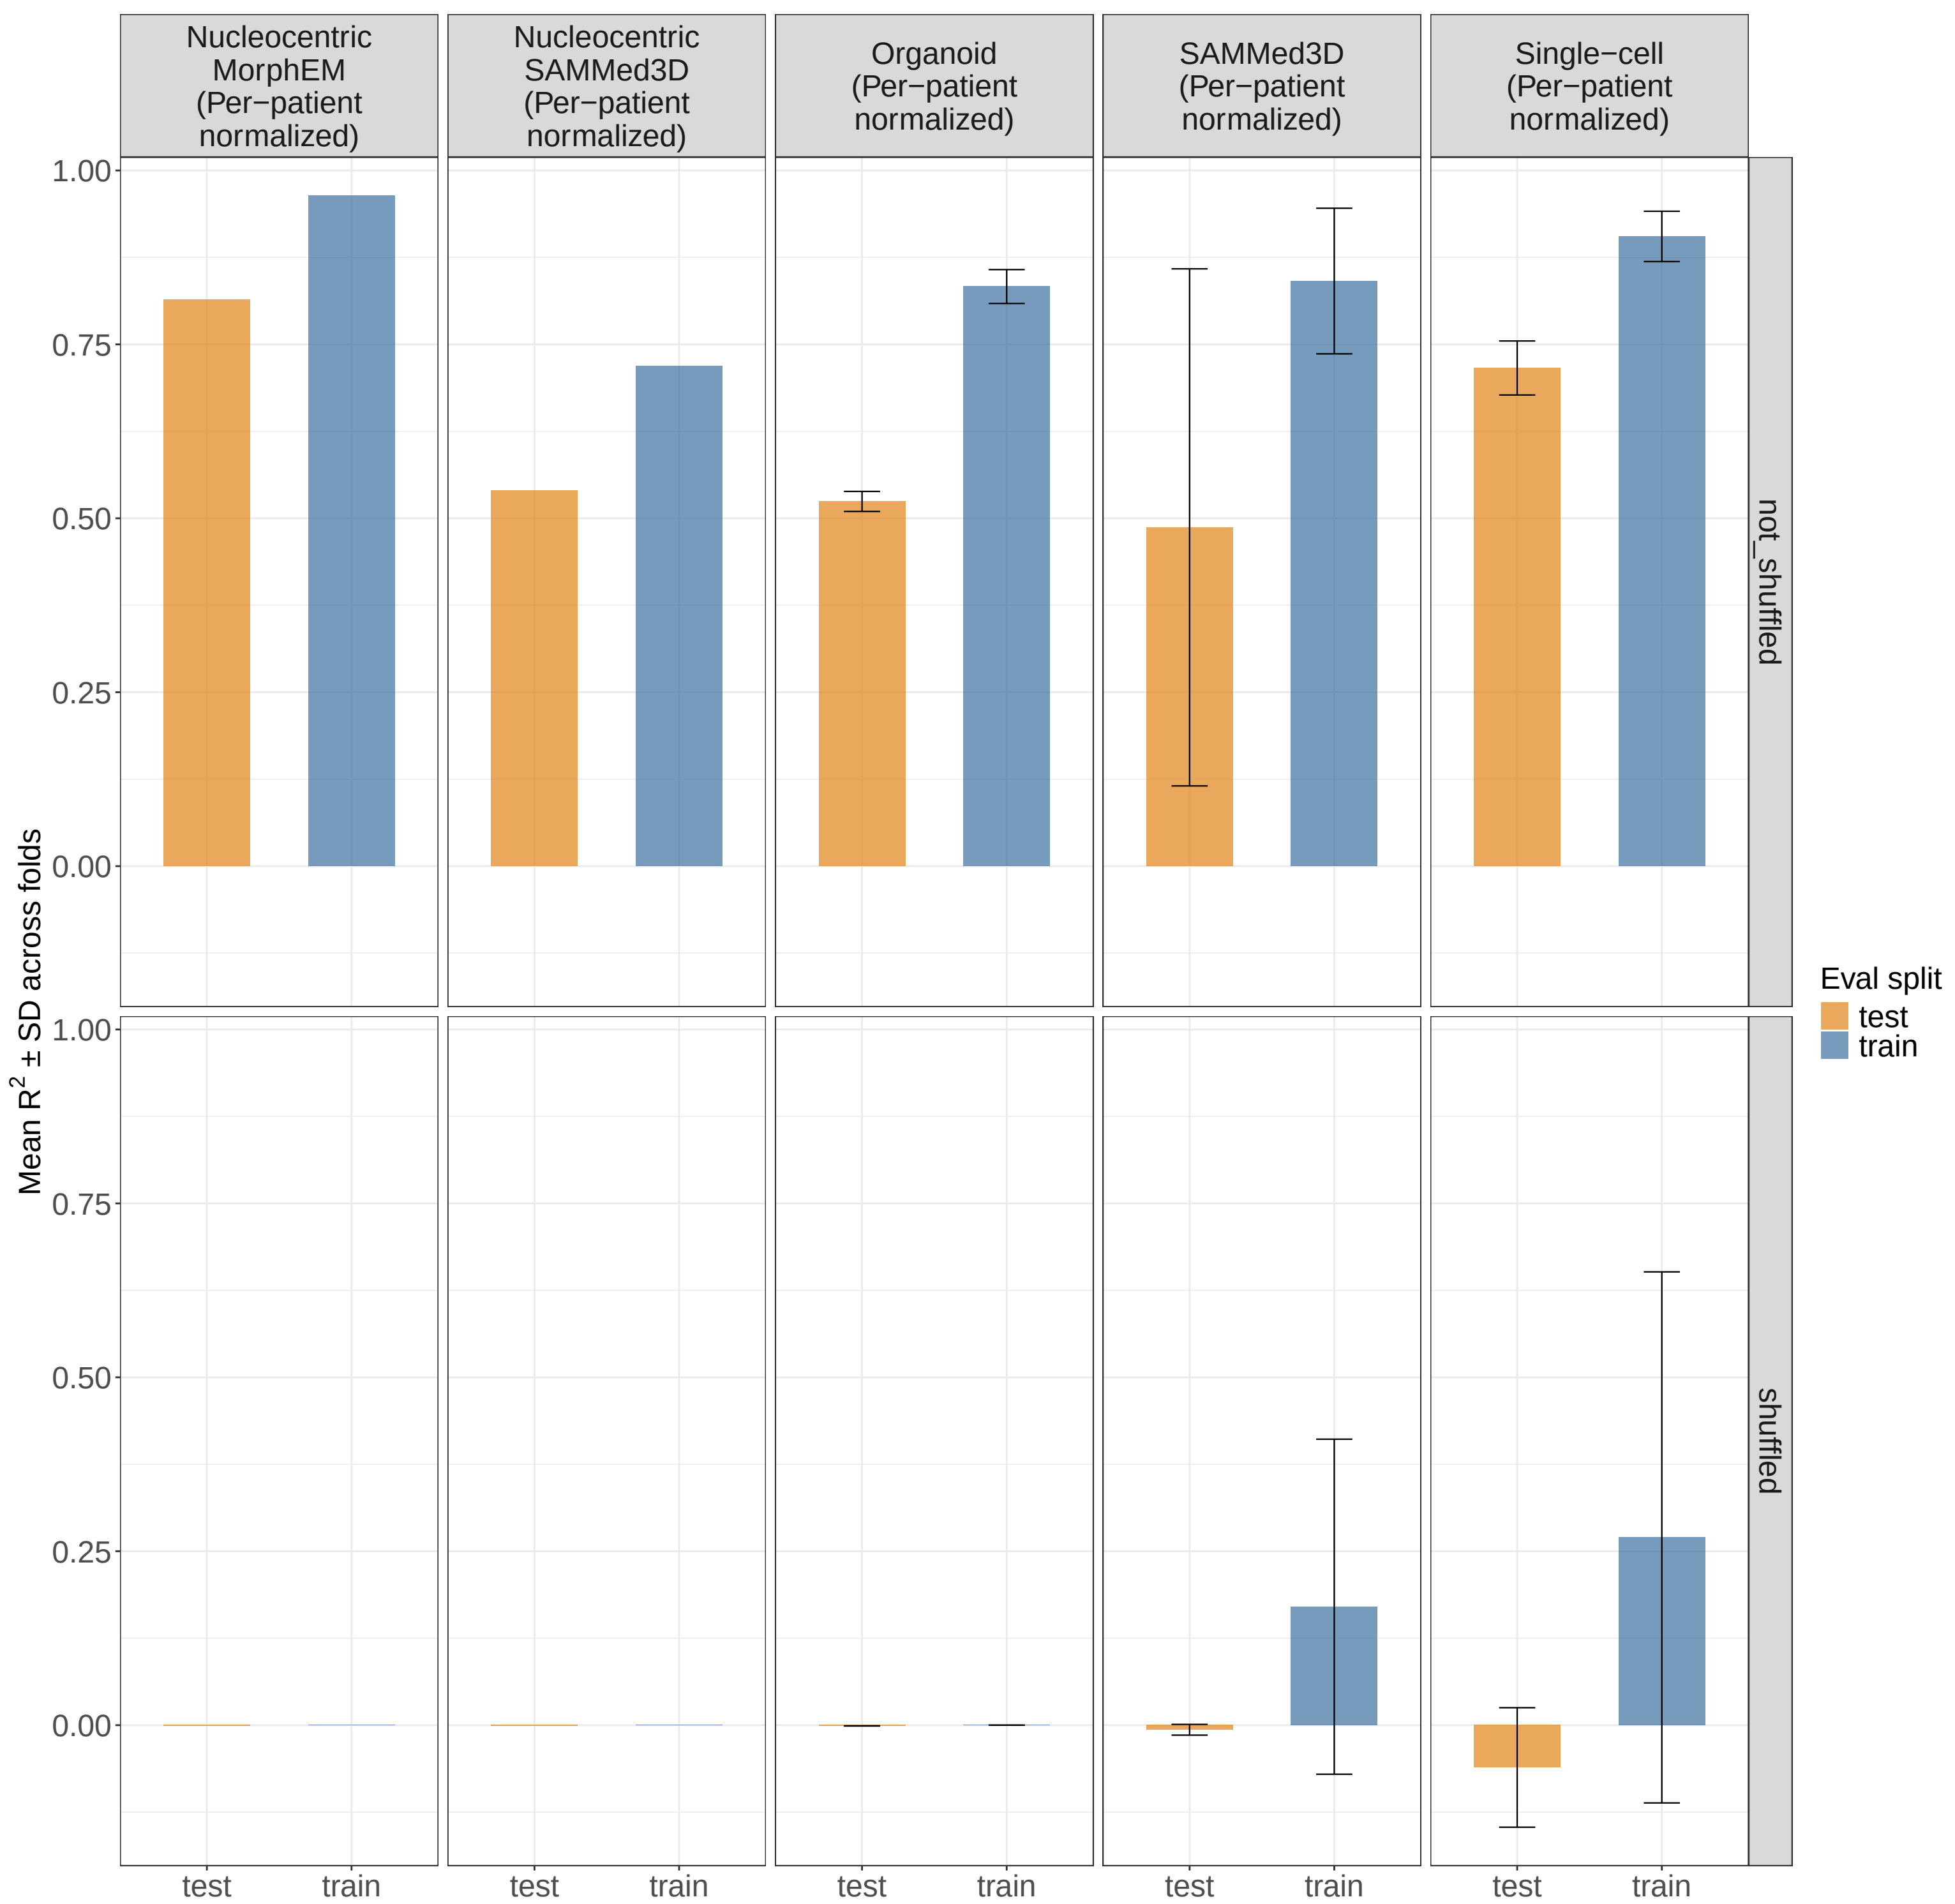

Model performance (R^2) by profile and feature type ... loto

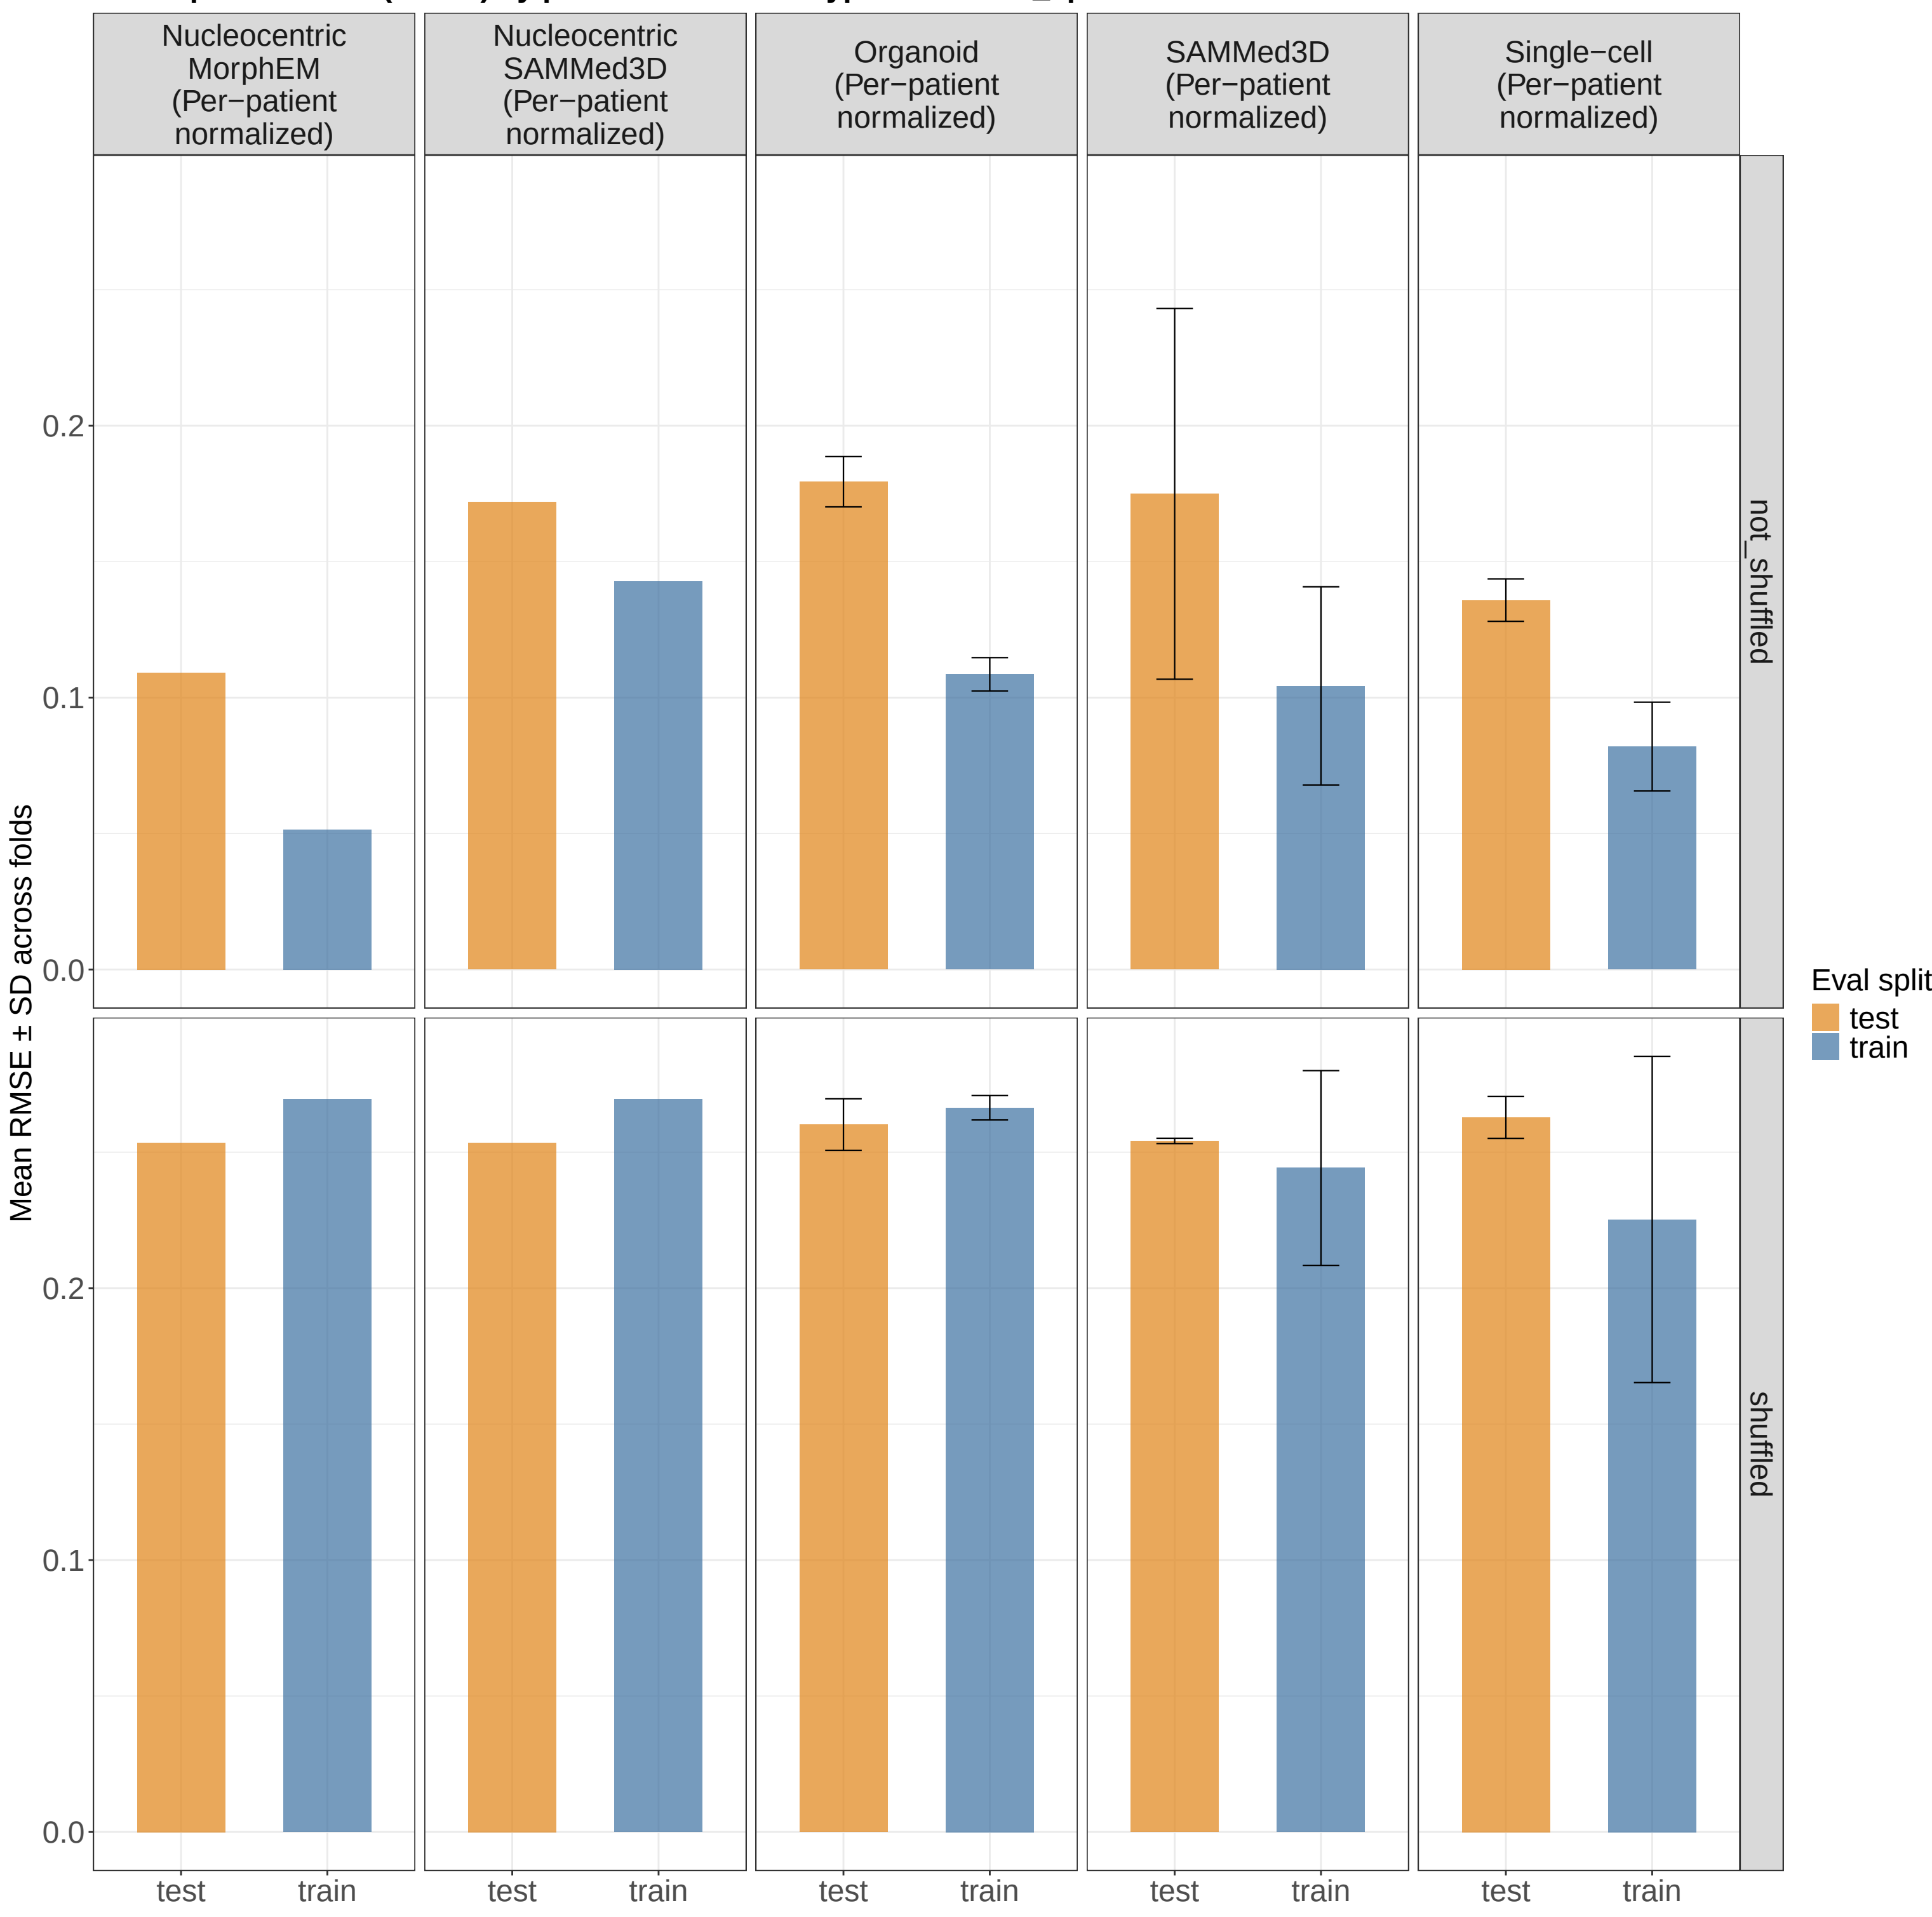

Model performance (RMSE) by profile and feature type ... loto

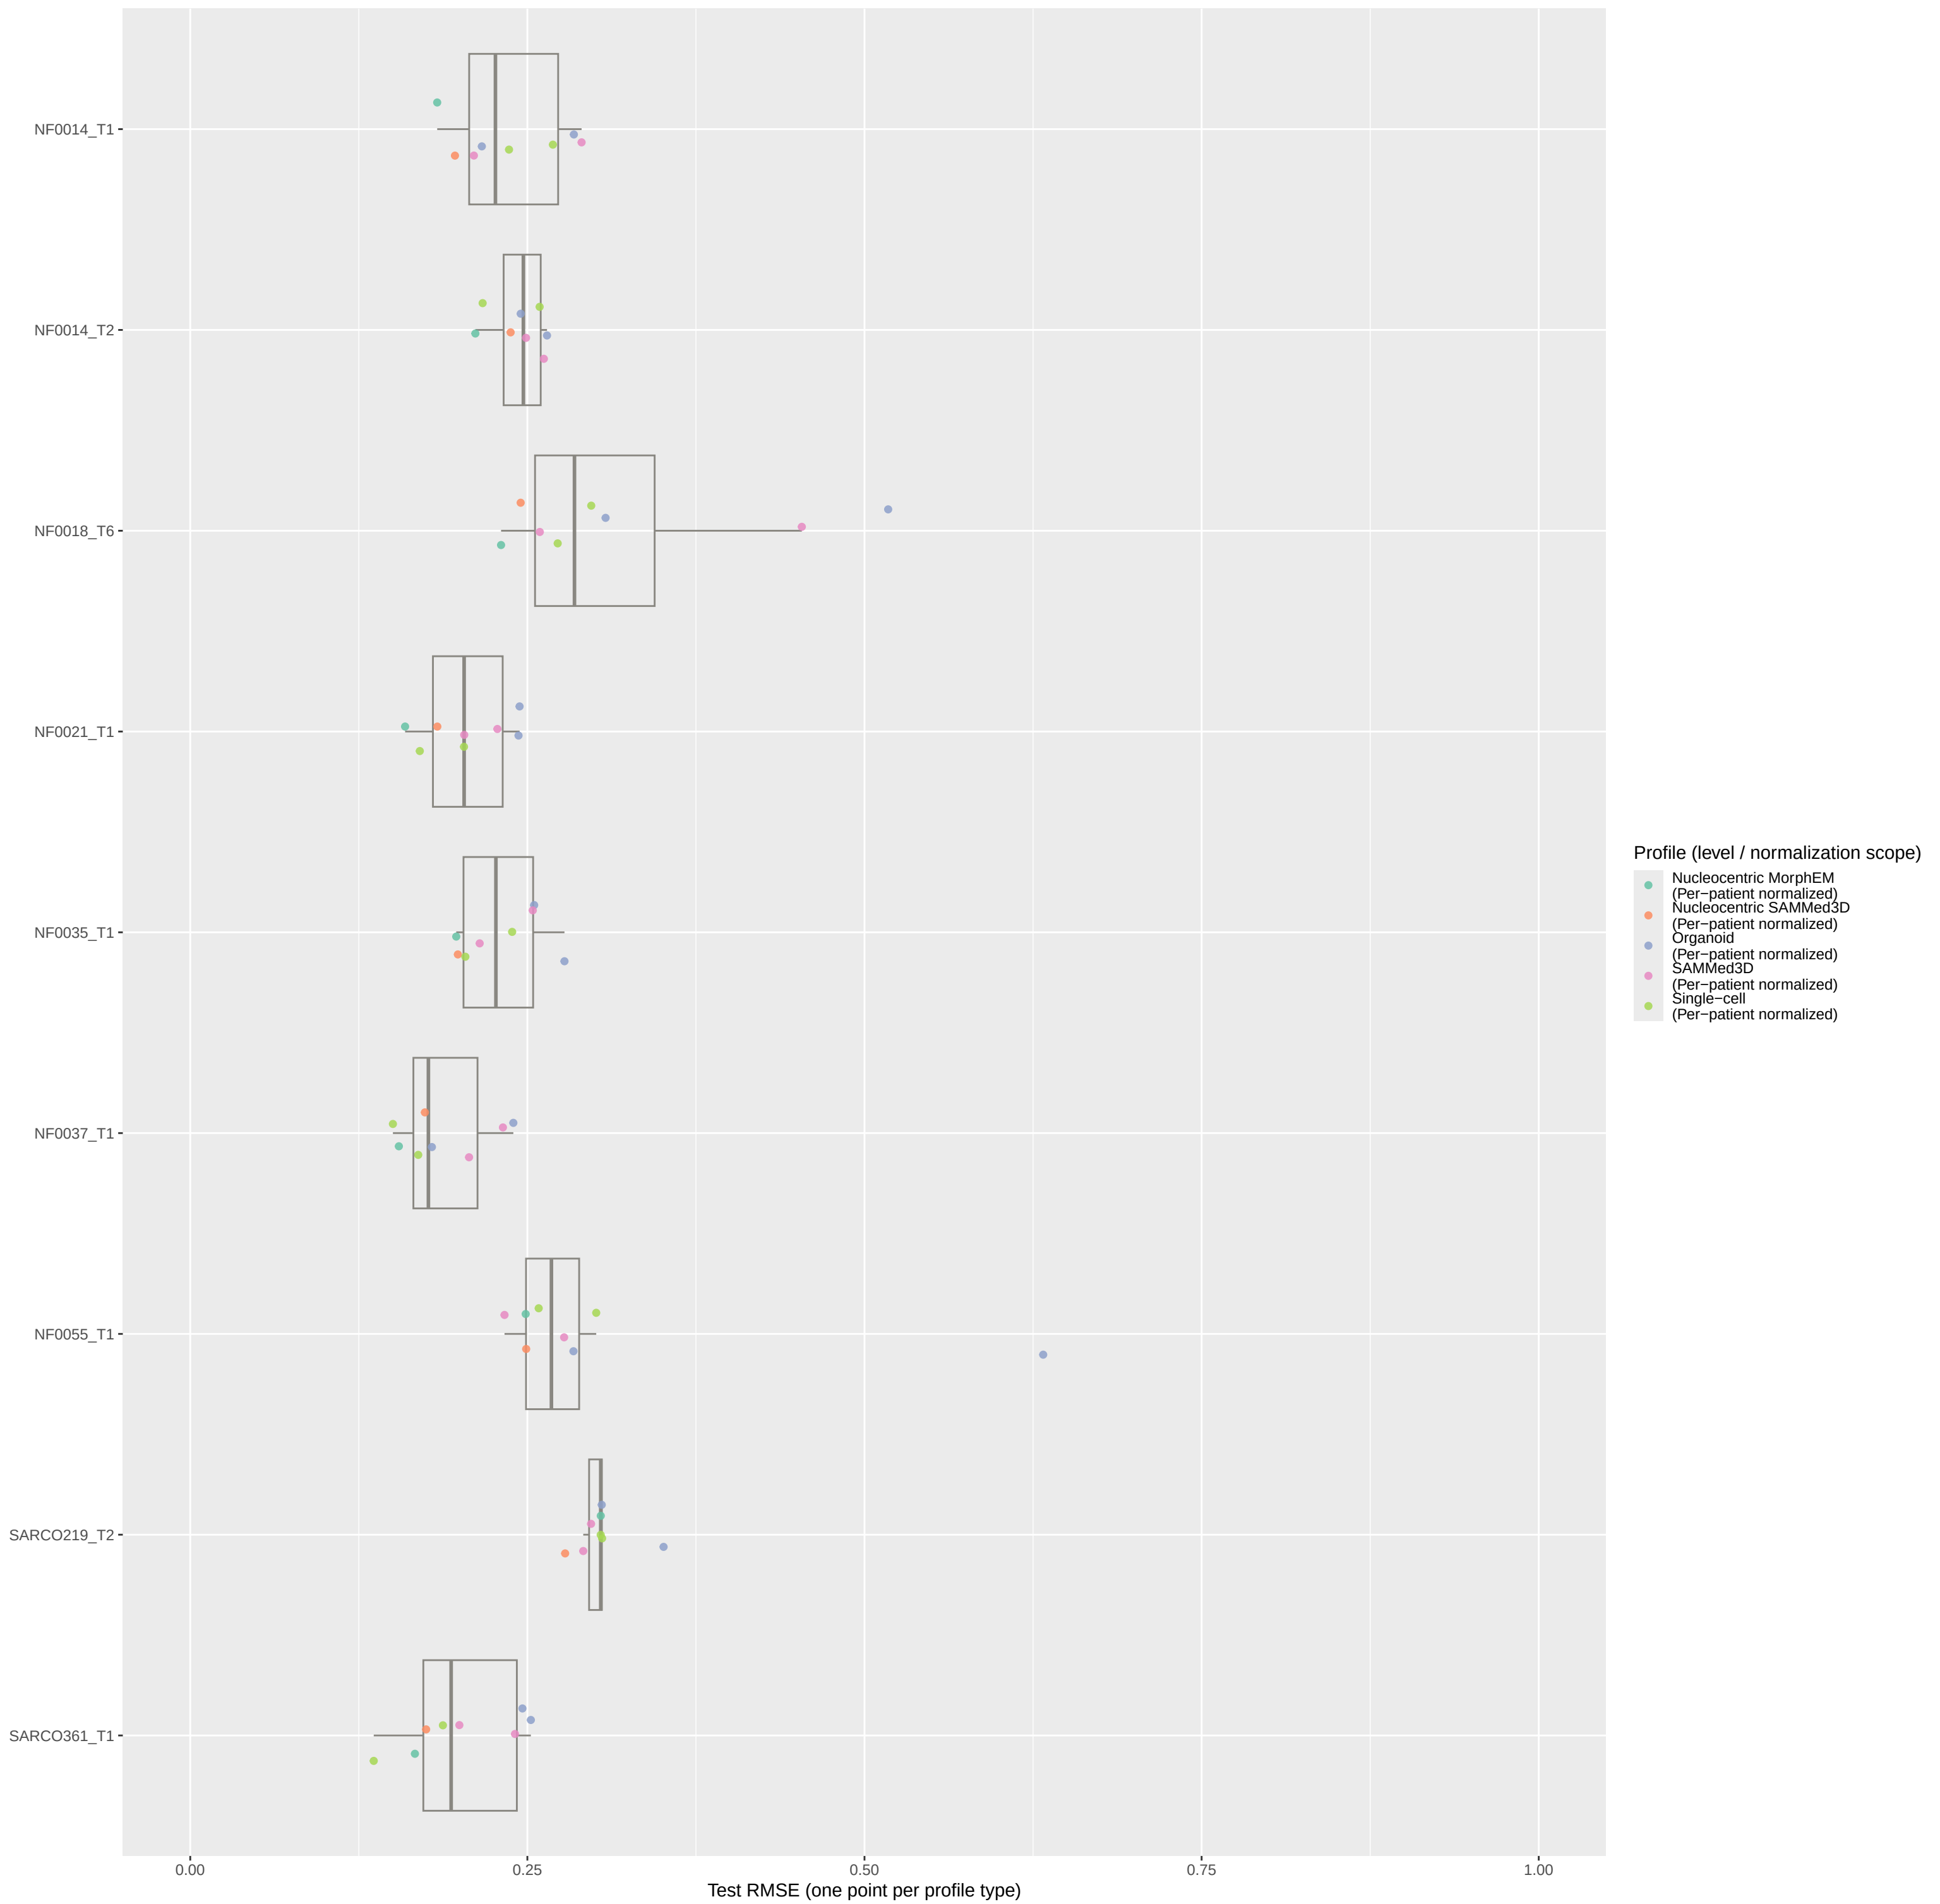

Model performance (R^2) by profile and feature type ... random_split

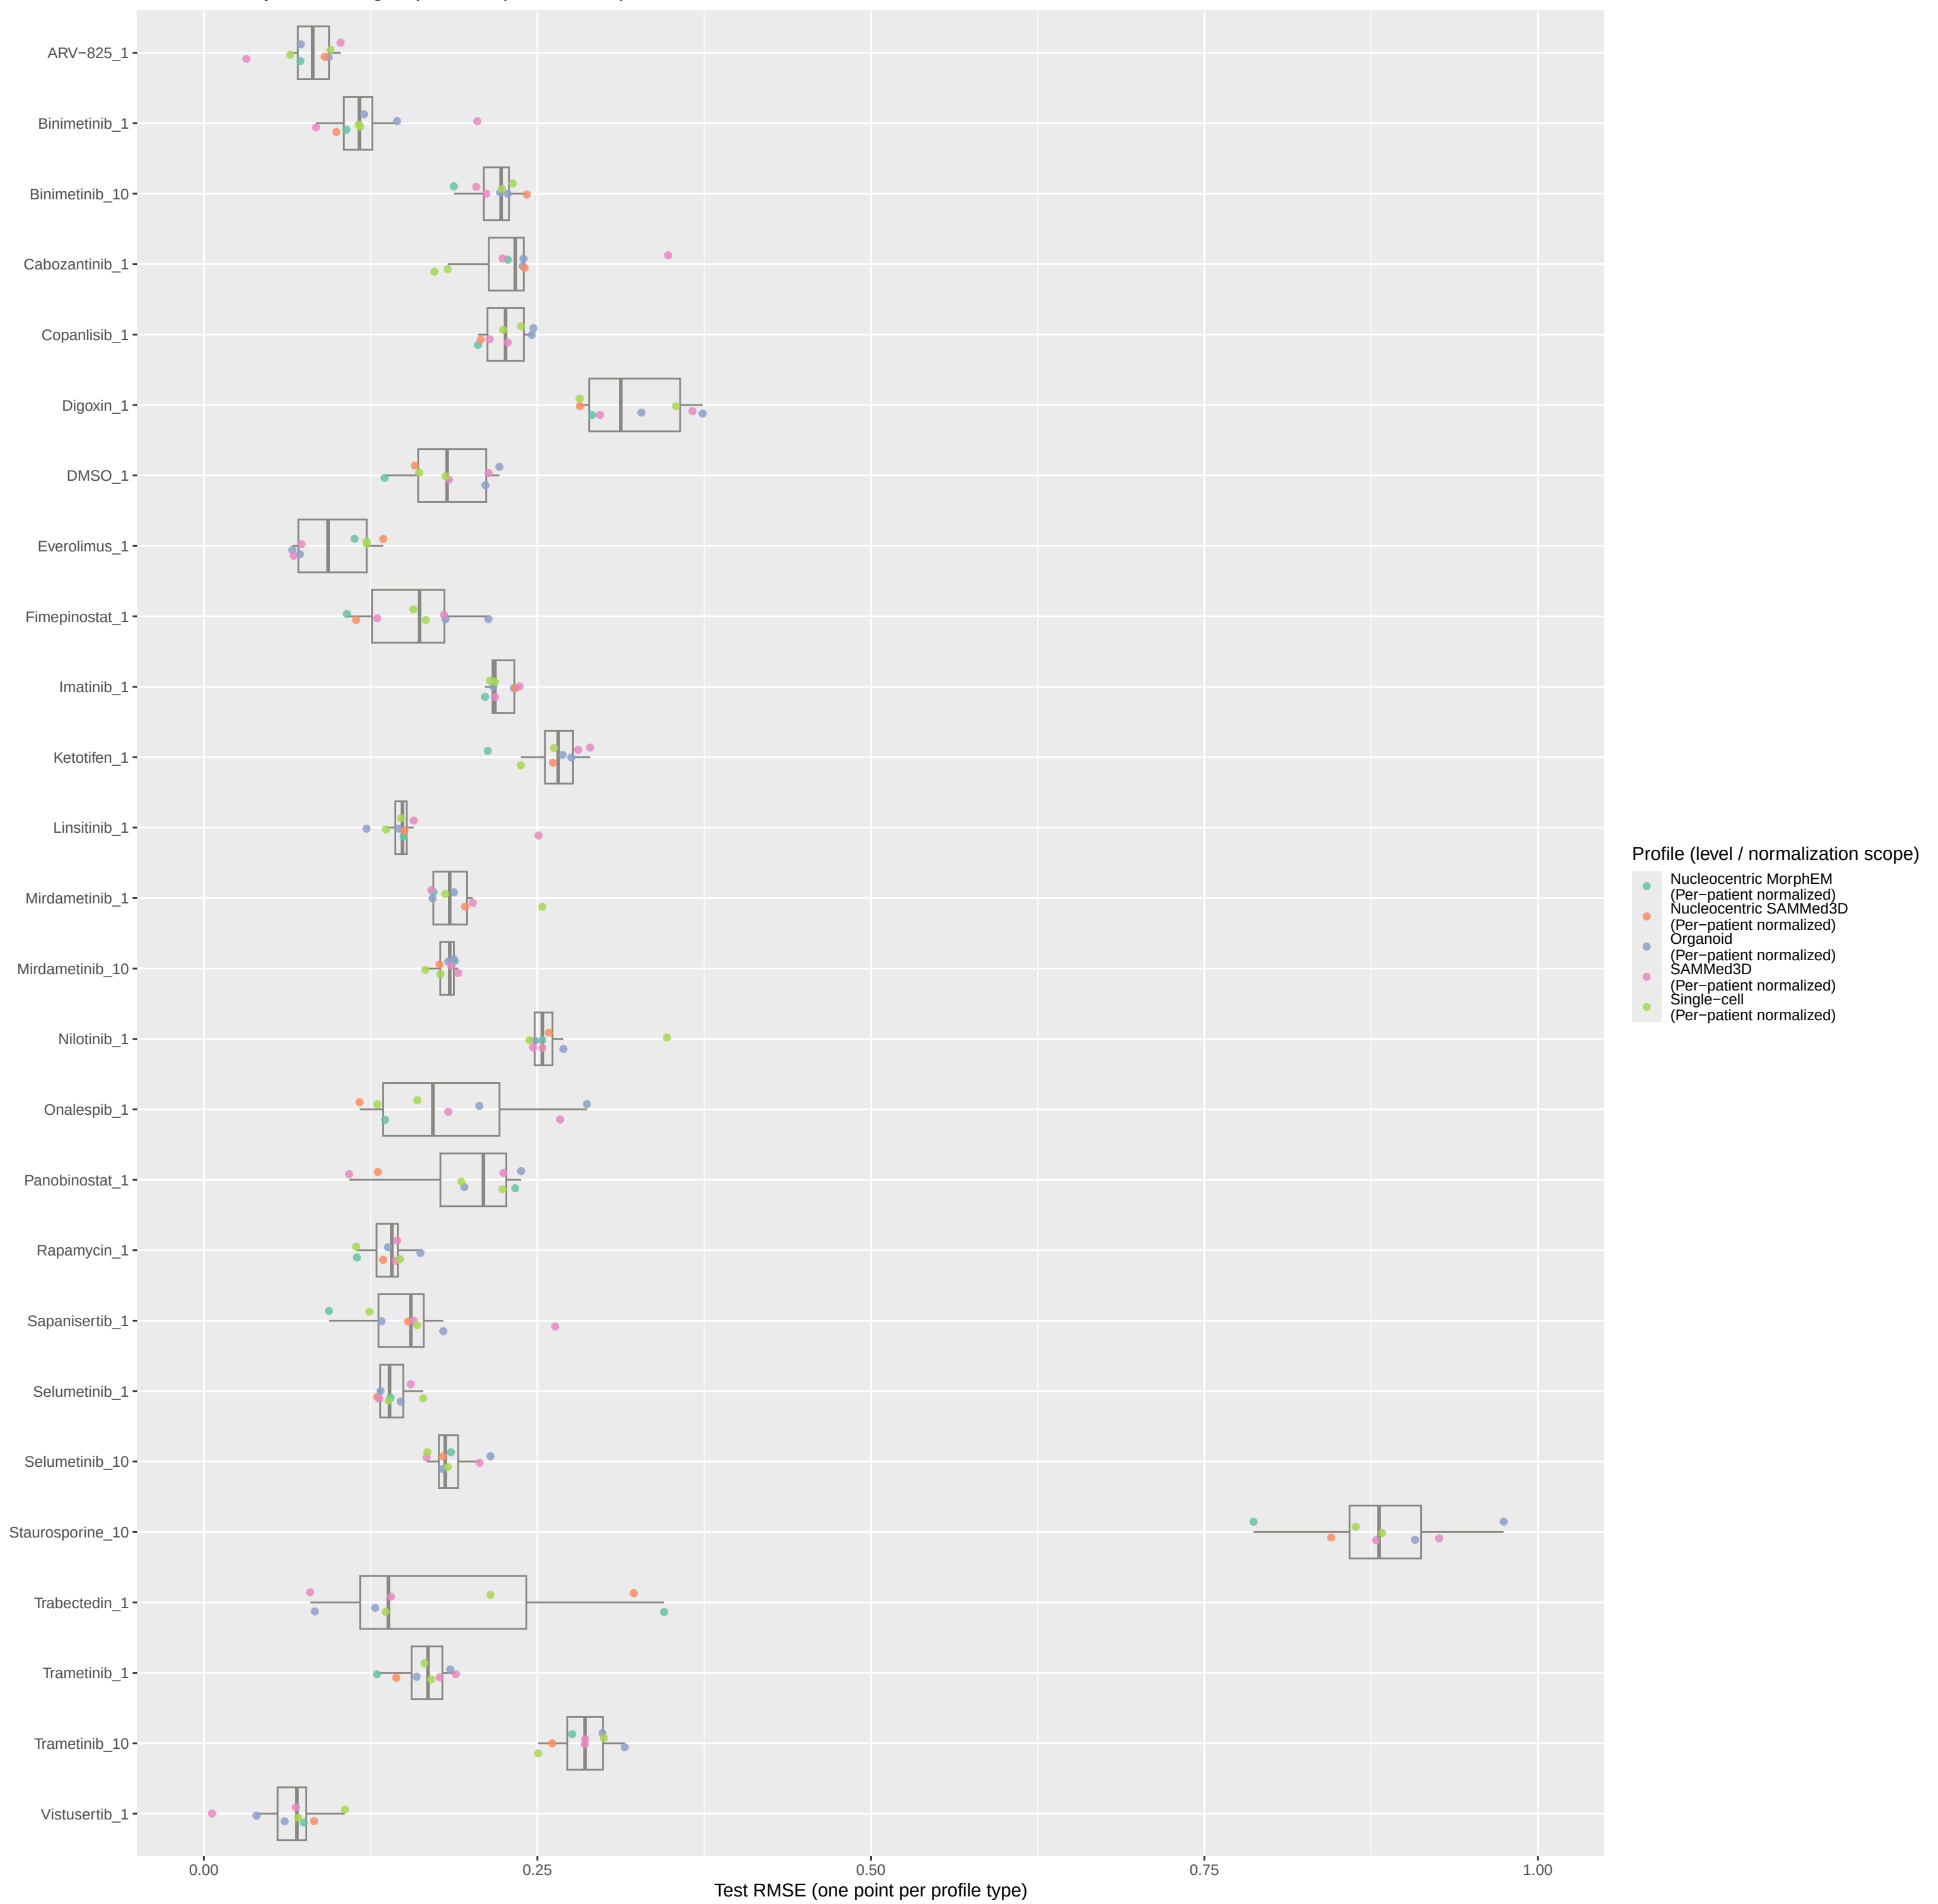

Model performance (RMSE) by profile and feature type ... random_split

Test RMSE by held-out group ... lo-po (not shuffled)

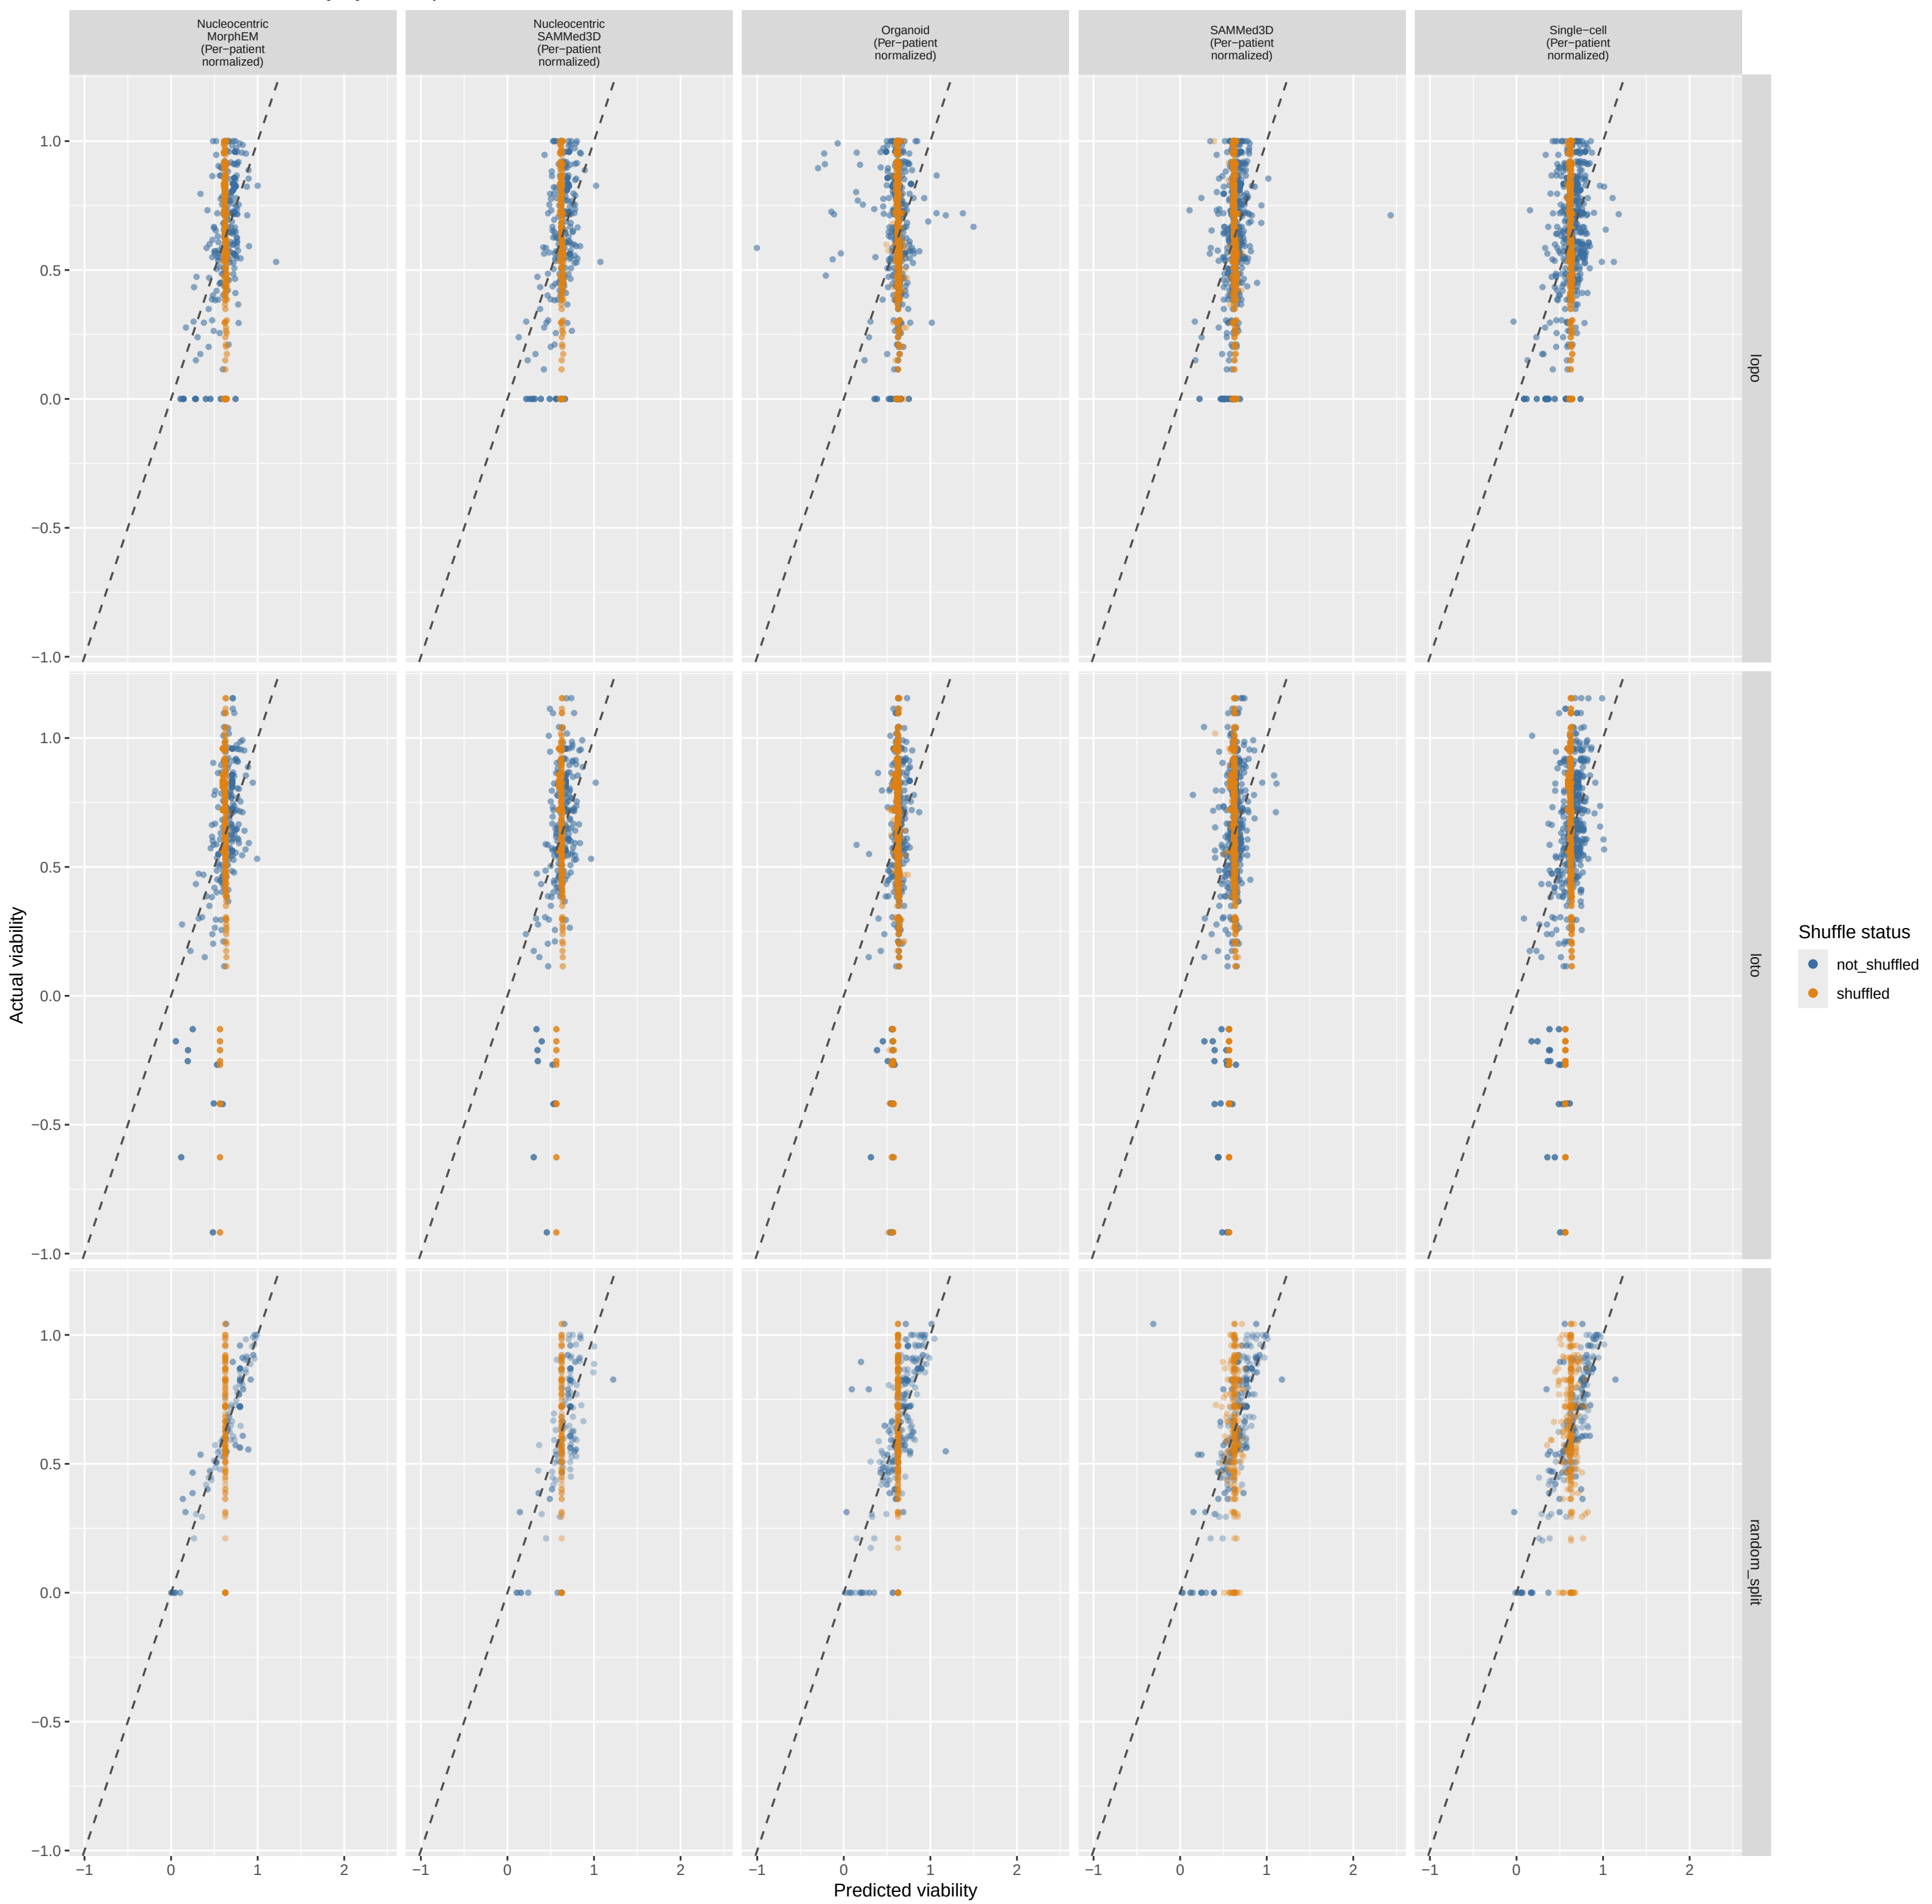

Test RMSE by held-out group ... loto (not shuffled)

Top 10 features by mean |coefficient|, per profile type and split method (model)

Predicted vs. actual viability by data split method and shuffle status

Distribution of each model's top-10 features across all profiles
